1 Pricing

1.1 Pricing

SigningHub is a secure document workflow and digital signature approval service. SigningHub provides online document viewing and signing for internal and external users with full tracking of the business document approval process. The pricing shown is for basic & advanced signatures. Ascertia also offers qualified signatures, priced according to individual requirements and available for procurement outside the G-Cloud framework. Please get in touch with the Ascertia Sales Team for more information.

SigningHub pricing is determined by:

- the number of users with unlimited signatures each (see table 1); or
- on a per signature per year basis, where the number of users is unknown (see table 2); or
- for special situations, a combination can be used, see the pricing examples on page 2.

Table 1: Pricing based on the number of users, each allowed unlimited signatures

Number of users	Price per user / month	Equivalent price per year
10	£12.15	£1,458
15	£11.25	£2,025
20	£10.35	£2,484
25	£9.45	£2,835
50	£8.10	£4,860
100	£7.20	£8,640
250	£6.30	£18,900
500	£5.40	£32,400
1000	£4.05	£48,600
2000	£3.05	£73,200
5000	£1.80	£108,000

Table 2: Pricing based on the number of signatures per year for any number of users

Number of signatures	Price per signature	Price per signature block per year
2,500	£0.45	£1,125
5,000	£0.41	£2,025
10,000	£0.35	£3,490
20,000	£0.31	£6,120
40,000	£0.26	£10,440
60,000	£0.23	£14,040
80,000	£0.20	£16,200
100,000	£0.18	£17,980
125,000	£0.16	£19,690
150,000	£0.14	£20,925
175,000	£0.12	£21,285
200,000	£0.11	£22,390
250,000	£0.10	£24,388

Additional user licenses and signature blocks can be purchased at any time.

No minimum contract period.

A free evaluation period is available to enable you to check whether the service meets your needs. Training support and professional services are available on a project-specific basis. The cost for remote delivery is £2,050 per day.

1.2 Pricing Examples

- 1) Organisation A has 100 internal staff members using SigningHub for internal document sign-off and approval. Each user can sign an unlimited number of times.

Using table 1 the pricing is:

Price: $100 \times £7.20 \times 12 = £8,860$ per year

Assuming users would sign an average of 5 documents per day each, this would result in 100 staff members signing 220 days' worth of documents, totaling 110,000 documents. The cost per document in this case is £0.0785.

- 2) Organisation B has a variable number of internal staff that use SigningHub and an unknown number of external third parties each required to digitally sign at least one document per year. The number of documents to be signed is 5,000 per year. Two signatures are required on each document, therefore a total of 10,000 digital signatures is required per year.

Using table 2 the pricing is:

Price: $10,000 \times £0.35 = £3,500$ per year

The cost per document is £0.70 and the cost per signature is £0.35.

- 3) Organisation C has 25 internal staff that use SigningHub and also requires a further 100,000 signatures from an unknown number of external users. Two digital signatures are required on each document.

The price will be calculated as:

Internal staff: $25 \times £9.45 \times 12 = £2,835$ per year (from table 1) plus

External staff: 200,000 signatures = £22,390 per year (from table 2) making a total of £25,225.
