

Managed Cyber Risk Services

Bridging the operational gap between vendor risk and cybersecurity

Organizations often lack the capacity, resources, and expertise to properly identify and mitigate cyber risks that, if left undiscovered, can lead to increased threat exposure and unhealthy vendor relationships.

SecurityScorecard's Managed Cyber Risk Services bridge the gap between vendor risk and cybersecurity by helping organizations augment their existing third-party risk cyber programs with a team of cybersecurity professionals with experience in incident response to uncover vulnerabilities and improve cyber hygiene across their vendor landscape.

Using powerful risk signals and threat insights from the SecurityScorecard platform, Managed Cyber Risk Service experts go beyond vendor onboarding and questionnaire management by proactively analyzing and mitigating risk associated with your vendor landscape. With third-party cyber defenders by your side, you strengthen your TPRM cybersecurity defenses while reducing unnecessary interruptions in your day so you can reallocate resources to other key business initiatives.

Enhance and scale your vendor risk management program with a trusted team of cybersecurity experts

Improve the security posture of your business ecosystem with faster incident discovery, alerting, and investigation to stop attacks.

DELIVERED BY SECURITYSCORECARD'S RISK OPERATIONS CENTER (ROC)

SecurityScorecard's Risk Operations Center (ROC) is comprised of cybersecurity professionals with **100+ years of collective experience** in cybersecurity investigations across government and private sectors with expertise in digital forensics, incident response, threat hunting, and third-party risk management.

- Draw on **deep, expert knowledge** of SecurityScorecard products and services to assess vendor cyber risk
- Apply the **principles of incident response** to the cyber vendor risk space
- **Monitor** scoring changes, risk levels, outdated technologies, and security gaps
- Engage vendors on **serious incidents**, such as ransomware threats and data breaches
- Work alongside vendors to ensure **appropriate mitigating measures** are implemented

Give your vendor risk management program a cyber boost with expert partners to manage and proactively stop vendor risk from wreaking havoc on your business.

Managed Cyber Risk Services Solutions

Choose between Silver, Gold, Platinum, and custom assessments to meet your organization's needs.

	SILVER Manage and monitor non-critical vendors	GOLD Outsource vendor management; continue managing vendor communications	PLATINUM Outsource both vendor management <i>and</i> communications.

ENABLING EVERY
COMPANY IN THE WORLD
WITH THE **TRUST AND
CONFIDENCE TO MAKE
SMARTER CYBERSECURITY
DECISIONS.**

ONE PLATFORM, MANY USE CASES.

SecurityScorecard is the global leader in cybersecurity ratings, helping thousands of organizations of all types and sizes gain instant visibility into their own security posture and that of their third parties. CISOs and security teams around the world turn to SecurityScorecard for help with managing cybersecurity risk, which is at the intersection of numerous internal and external threats - especially, in terms of operational, legal, compliance and reputational risk. **Our comprehensive suite of solutions provides a true 360° view** of risk and the resources to strengthen and protect your cyber risk posture across multiple use cases.

LEARN HOW THE
**#1 CYBERSECURITY
RATINGS SOLUTION
CAN HELP YOU.**

Third-Party Risk Management

Take control of third-party risk and improve the cyberhealth of your entire vendor ecosystem. Reduce your vendor questionnaire preparation time and effort by 83%, with transparency into vulnerabilities in your third-party ecosystem and with industry- leading collaborative remediation tools.

Cyber Insurance

Accurately assess the security posture of insureds and continuously monitor your portfolio. Leverage the largest network of rated companies to accelerate the time to quote, enhance cyber risk modeling, and provide value-added services to your clients.

Cyber Due Diligence

Gain insight into the cyber risk of any company, make data driven business decisions, and reduce financial risk. Perform more in-depth due diligence on an acquisition target, for a credit underwriting decision, or for a financial trade, minimizing the risk of costly cyber-related mistakes.

Executive-Level Reporting

Effectively communicate your cybersecurity strategy and risk posture to the Board and C-Suite in an easy-to-understand ratings language. Align cybersecurity with business needs, report on your organization's performance, and demonstrate the efficacy and ROI of your cybersecurity programs.

Enterprise Cyber Risk Management

Continuously monitor your cybersecurity posture, manage your reputational risk, and address realtime issues and findings against your business. Create a data-driven narrative with metrics that shows stakeholders the current and potential business impact of security risks and the efforts to mitigate them.

Service Providers

Enhance your offering with valuable SecurityScorecard data. Whether you're a data service provider, managed service provider, or advisory service provider, leverage SecurityScorecard to provide more value to your clients.

Compliance

Enable cybersecurity compliance, audit remediation, and attestation with evolving regulations and industry standards. Instantly map SecurityScorecard ratings to industry frameworks, track changes, and build remediation plans to remain compliant with mandates.

Regulatory Oversight

Regulators and government entities can prioritize cybersecurity reviews with continuous monitoring to identify who is most at risk. Whether you are auditing your organization's compliance or reviewing your agencies, contractors, and regulated entities, security ratings provide actionable intelligence to improve sector-wide resilience.

"We're logging into SecurityScorecard multiple times per day — myself, our cyber threat hunter, and our security manager who deals with vendor risk management. We couldn't do our jobs without SecurityScorecard."

Nuno Teodoro,
Chief Information Security
Officer, Truphone

GO BEYOND A SECURITY RATING

The world's most comprehensive platform for quantifying and reducing security risk.

PRODUCTS

Security Ratings

Continuously monitor and measure the cyber hygiene of any organization—even improve your own, with the industry's most accurate and transparent ratings platform.

Automatic Vendor Detection

Avoid your vendors' problems becoming your own with the industry's only cybersecurity risk score for your 4th parties and entire supply chain.

Security Data

Power your existing business workflows with the industry's most trusted security data about your organization and business ecosystem.

Marketplace

Optimize your security workflows and deliver intelligence everywhere you work with the largest ecosystem of integrated technology partners in cyber risk ratings.

Attack Surface Intelligence

Prevent cyber attacks by reaching clear decisions from the industry's only global threat intelligence with context from your ecosystem.

Evidence Locker

Increase your visibility and quickly gain trust by showcasing your certificates of compliance across the industry's largest vendor ecosystem.

Cyber Risk Quantification

Be seen as a business leader and justify your security budget to the Board with the most scalable and actionable cyber risk quantification solution.

Assessments

Save time and gain a 360-degree view of your vendors with the only customizable questionnaire to automatically validate responses against cybersecurity hygiene.

CYBER RESILIENCE SERVICES

Some battles shouldn't be fought alone. Partner with cyber experts to defend, respond, and transform your security posture.

Third-Party Risk Program Development

Transform your third-party risk program to improve efficiencies, bolster security posture, and ultimately reduce vendor risk.

Digital Forensics and Incident Response

Respond confidently and mitigate business interruptions from a cyber attack by partnering with industry-leading experts in digital forensic and incident response services—24x7.

Cyber Risk Intelligence

Gain clarity to proactively eliminate cyber risk with actionable intelligence tailored to your unique security team.

Proactive Security Services

Defend your organization with a range of services that battle test your security controls to eliminate risk, including penetration testing, red team exercises, and tabletop exercises.

Attack Surface Intelligence

Make Decisions Faster with More Variety and Accurate Actionable Intelligence

Challenge

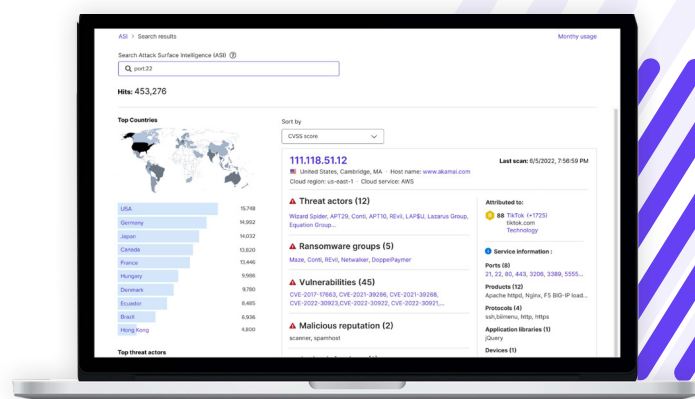

Threat Intelligence That Over-Promises and Under Delivers

Threat researchers lose confidence in making intelligent business decisions when threat intelligence sources lack the quality, variety, and depth of cyber risk information needed to prevent disruption. Lacking a reliable source of truth with contextual threat intelligence makes it difficult for security teams to take a proactive approach and streamline their limited resources focused on threat hunting.

Solution

Contextualized Global Threat Intelligence You Demand

SecurityScorecard's Attack Surface Intelligence detects more unknown unknowns, including those of your third-party vendors and how they pose a risk to your business, arming you with deep contextual insights and attribution to prioritize your next steps - all in one single platform.

When data volume, quality, and speed matter, turn to SecurityScorecard's threat intelligence. Gain confidence in knowing the intelligence collected is engineered for you to prevent future disruptions with precision-built data that is unrivaled and up-to-date.

KEY BENEFITS:

Find the Unknowns

Capture a complete global view of cyber risk, including third-party vendors, to find vulnerabilities and emerging threats you weren't aware of.

Make Confident Decisions

Act immediately with actionable intelligence on all critical and non-critical threats by region, organization, footprint, and individual assets.

Prevent Disruption

Easily prioritize remediation with attribution and contextual information to proactively pinpoint which threats expose the most significant risk.

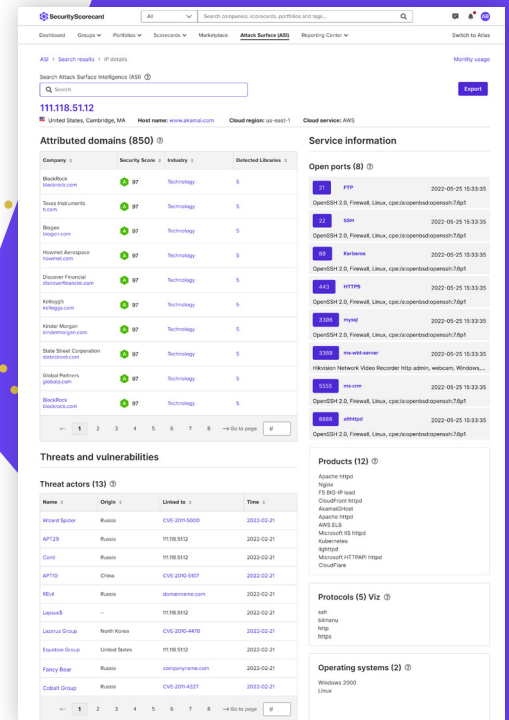

Take Control

Understand the adversary's next step, empowering your cybersecurity team with the proactive knowledge to build and maintain a solid threat-first approach.

Capabilities

Holistic Intelligence Platform With a Punch

- ✓ **UNPARALLELED DATA - TESTED AND PROVEN**
Access the most up-to-date threat intelligence you can't get anywhere else, all in one place.
- ✓ **CONTINUOUSLY UPDATED SEARCH - DRIVEN INTERFACE**
Prioritize and remediate risk with the ability to globally search across any public IP, network, or domain to deliver.
- ✓ **EXPAND BEYOND RATINGS**
Gain contextualized insights and a global view of threat actors, CVEs, open ports, and more across all of the vendors tracked in your SecurityScorecard portfolio.
- ✓ **INTEGRATION FOR GREATER VISIBILITY**
In one powerful portal or via API understand who is targeting you, create automated workflows, and integrate ASI data into other security tools.

Trust

Why Choose SecurityScorecard?

SecurityScorecard is a data company, first and foremost, building contextual intelligence to power its Scorecards.

We have built the most comprehensive data collection and attribution infrastructure over a decade, giving customers relevant, actionable, and trusted cyber risk information.

333M+

Threat actor associations made and growing daily tied to exposed assets, malicious IPs, file hashes, and more

100B+

Vulnerabilities and attributions published weekly
[Learn More](#)

4.1B

IPs and domains scanned in-house every 7 days across 1,500 ports globally

7B+

Normalized leaked databases records from across the dark web and forums

2B+

Sinkhole Malware requests per day ingested - world's most enormous malware DNS sinkhole

20M+

Top websites crawled every week using full browsers imitating real users
