DIGITAL RISK PROTECTION - WATCHER SERVICES

BlueVoyant Threat Intelligence Services monitor your external attack surface, assess emerging risks, and deliver timely, actionable intelligence specific to your organization and your supply chain. BlueVoyant's advanced Cyber Threat Intelligence Service goes beyond your company's boundaries to see threat actor activities taking place outside your perimeter.

Domain: A domain is the address of your website that may also be used in standard email addresses. It is the name that people type into the URL bar of their browser to find your website. Domain names can be purchased through a domain registrar or through your hosting provider. They are also often provided for free by hosting companies or website builders.

Keyword: A keyword can be a domain or some other value that is relevant to your business. Example: product names, legal company name.
