

Full-stack observability. One view. Infinite clarity.

Faster answers, predictable costs, and no lock-in — built by the team helping to make observability accessible to anyone.

Start fast, learn fast

Get insights in minutes with AI-assisted onboarding

Scale without surprises

Simplify cost management with Adaptive Telemetry

Build without barriers

Flexible, open, and free from vendor lock-in

Stay resilient

Enterprise-grade security and expert support

Trusted by thousands of innovators. Leader Gartner® Magic Quadrant™ in Observability Platforms.

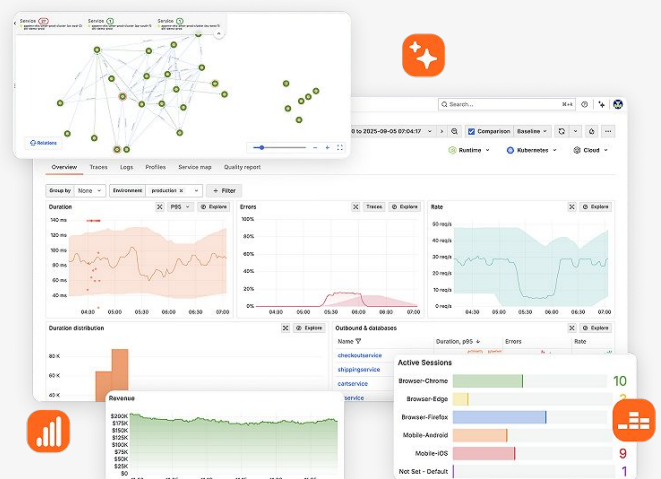

What can Grafana Cloud help you do?

See value from day one

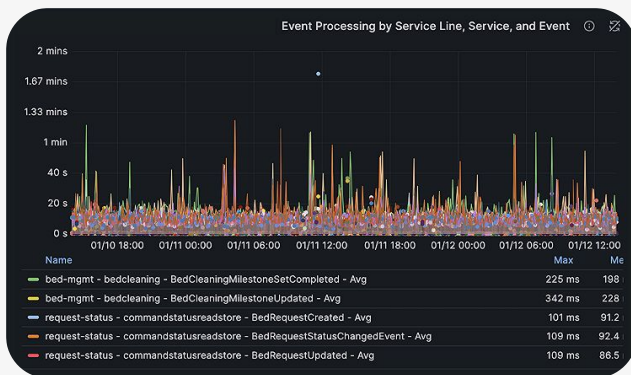

Quickly get the insights you need to keep your systems running smoothly.

- ✓ Start fast with AI-assisted onboarding and workflows
- ✓ Get instant visibility with out-of-the-box monitoring
- ✓ Stay focused on reliability while we manage your stack for you

Control costs, maximize insight

Keep the right data, cut the noise, and grow without waste.

- ✓ Keep the right signals with Adaptive Telemetry, which automatically amplifies what matters most
- ✓ Save 35-50% across metrics, logs, and traces
- ✓ Scale confidently with a service designed for small teams to global enterprises

Unify your stack, your way

Love your stack? Keep it. Grafana Cloud unifies the tools you already use and makes them work better together. No lock-in.

- ✓ Get more from what you already use by connecting your existing tools and data sources to Grafana Cloud
- ✓ Standardize with ease using open standards like OpenTelemetry
- ✓ Tap into a growing ecosystem of plugins and integrations

Troubleshoot faster

Contextual alerts integrated into Grafana Cloud's workflows for application, Kubernetes, and infrastructure observability – and more – speed up root cause analysis.

At BlackRock, this “put our telemetry into action and ultimately resolved issues faster,” Head of Observability Olin Gay said at ObservabilityCON.
