THIRD PARTY RISK MANAGEMENT
BlueVoyant Third Party Risk Management is a managed service that reduces cyber security risks with third-party vendors by continuously monitoring their security posture to ensure they meet the client's enterprise security standards and optionally engaging them on the client's behalf to resolve key security findings.
Assumptions: Billed annually as a default 5% change in monitored entities per each year at no charge Playbooks for automation/triage are applied across entire supply chain Client risk thresholds/tying/OOB reporting available for all supply chain Contextual data available for all supply chain

A BlueVoyant Technical Customer Success Manager (CSM) will get assigned to a client whose Managed Security Service contract annual value is greater or equal to 125K USD ARR.

Items:

- ☐ Provides world-class service for custom engagement.
- ☐ Owns BlueVoyant Managed Security customer journey
- ☐ Safeguard the customer's MSS Experience, providing consistency, reliability and repeatability in communication and documentation.
- ☐ Interface between the customer and BlueVoyant Managed Security operations
- ☐ Owns customer issues from identification to resolution
- ☐ Uses professional and technical concepts to advise on best security practices to apply to customer environments
- ☐ Manages customer base independently based on their needs

The BlueVoyant CSM will support clients under 100K USD annual contract value that purchased a managed service that include CSM services. The CSM service for these smaller clients includes direct email support from a BlueVoyant CSM team member. A client may purchase CSM services annually for 10K USD annually, if the product/service they have purchased does not include a CSM.

Pricing Instructions: Select the tier that covers the vendor count for the prospect. Multiply the annual fee by the number of years in quotation.
