

Solution Brief

BlueVoyant Third-Party Risk Management

A single configurable solution set to measurably reduce risk across your supply chain vendors

BlueVoyant Third-Party Risk Management (TPRM) is a fully managed, end-to-end solution that identifies, validates and resolves cybersecurity issues in your third-party ecosystem for measurable risk reduction. BlueVoyant TPRM leverages human expertise via our experienced Risk Operation Center analysts, superior data, and cutting-edge machine learning analytics to accurately identify risks and eliminate false positives.

BlueVoyant TPRM Offerings

A single configurable solution set to meet your third-party cyber risk management needs

Continuous Monitoring

THIRD PARTY CYBER REMEDIATION

The BV TPRM Core Offering: Analyst-reviewed, detailed third-party cyber risk reduction solution. Identifies, prioritizes and guides vendors on specific risk remediations.

THIRD PARTY CYBER MONITORING

Automated cyber risk visibility with granular information and analysis on vendor risks, but results are not curated by ROC Analysts.

BUSINESS RISK MONITORING

Continuous risk monitoring and analyst-validated risk event detection across eight additional types of business risk beyond just cyber, including factors like financial risk and foreign influence.

SOFTWARE BILL OF MATERIALS (SBOM)

Manage and review critical vendor software packages and components directly in the BlueVoyant TPRM platform.

Questionnaire Management

QUESTIONNAIRE MANAGEMENT PLATFORM

A streamlined, customizable vendor questionnaire platform for creating, sending and validating questionnaire assessments sent to third parties.

Point in Time Assessments

PRE-PROCUREMENT REPORTS

Informed summary reports on a target vendor's cyber risk posture for procurement decisions.

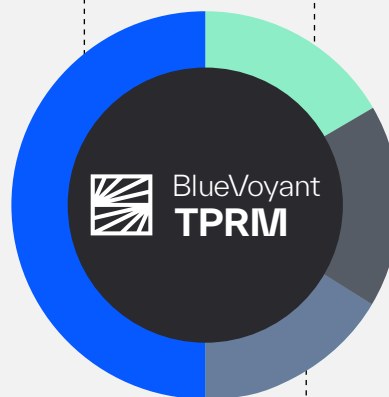

DUE DILIGENCE REPORTS

Detailed, comprehensive analysis of an acquisition target's risk posture.

Vendor Risk Program Consulting

TPRM PROGRAM CONSULTING

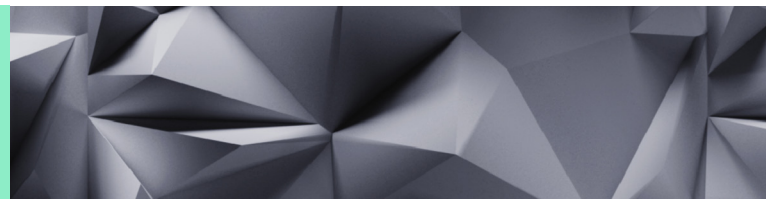

Expert-led workshops and consulting services to complement our products and help grow customers' third-party risk management programs.

Solution Set Highlights

- > See and prioritize your entire third-party ecosystem with validated mappings of your digital infrastructure
- > Continuously monitor third parties with guided remediation by Risk Operations Center (ROC) analysts
- > Identifies and alerts on newly disclosed Zero-Day vulnerabilities in as little as 90 minutes
- > Monitors the full breadth of vendors, regardless of criticality or resource constraints, with continuous monitoring
- > On-demand, easy-to-understand snapshots of acquisition or procurement targets' cyber risk posture
- > Validation of vendor questionnaire responses through AI-powered platform for managing cyber and risk questionnaires

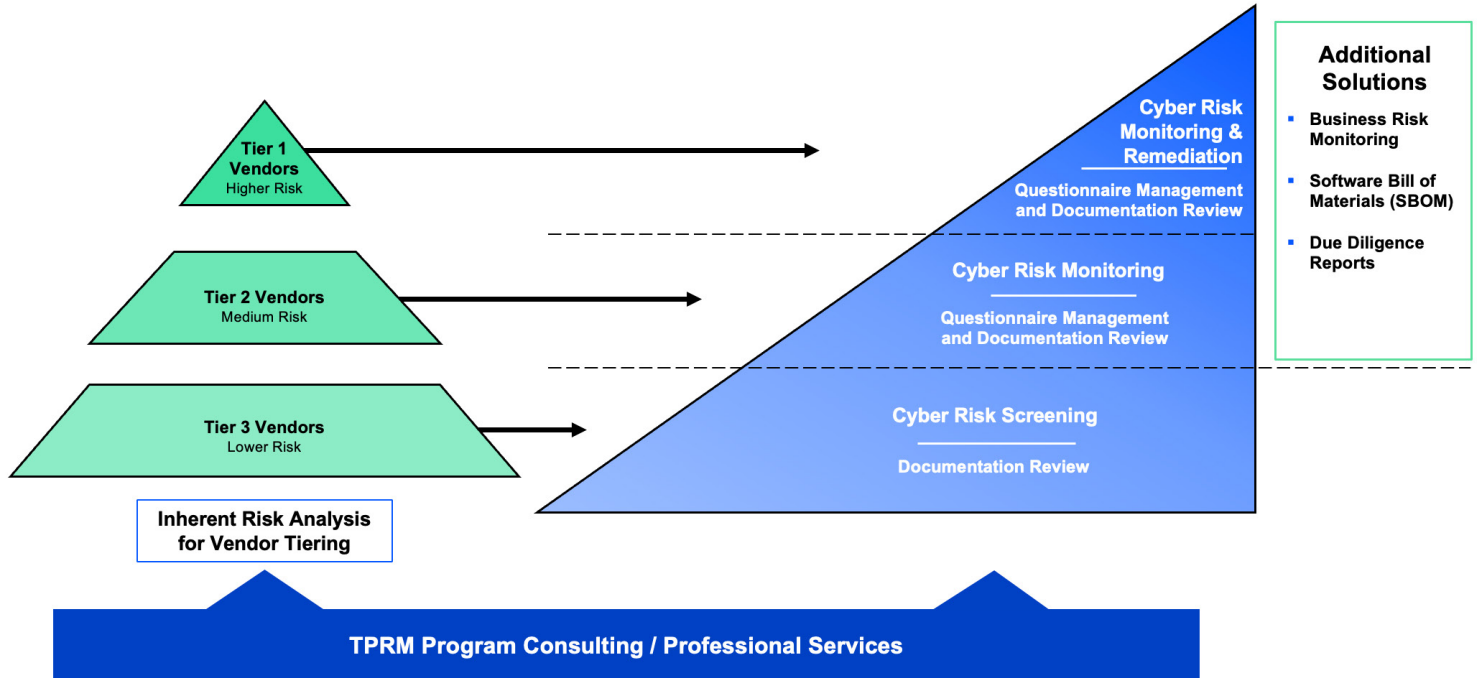

BlueVoyant

Distributing BlueVoyant TPRM Across Your Vendor Ecosystem

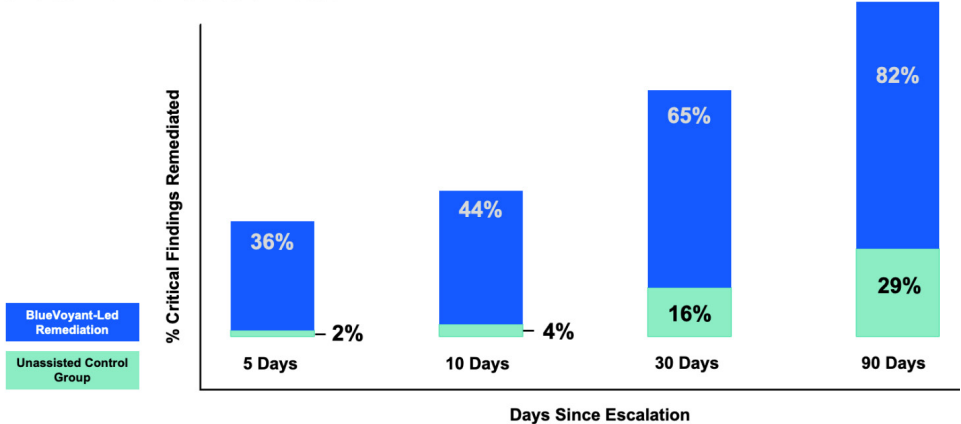

TPRM enables organizations to track and drive risk reduction across all tiers of their third-parties, from most- to least-critical vendors. From pre-procurement all the way through offboarding, TPRM's various modular components can be applied across the vendor lifecycle.

Measurable Accuracy, Effectiveness, and Speed

- > 98.5% true positive rate for risk findings
- > 18x standard remediation rate for vendors with BlueVoyant guidance
- > 3 hour average alert time for newly disclosed zero-day vulnerabilities

Critical risk remediation rates
