Overview

Innaxys provides an innovative, modular solution meeting CoP licensing requirements for the comprehensive management of officer training, skills, and specialist competencies and the issuing of firearms, Taser, and all other types of policing assets, all in a controlled, auditable environment.

FARM comprises modules of functionality can be used standalone or together for the flexible management of a force's firearms function. Together, the modules communicate seamlessly to enable instant updating of officer operational status from training records, and deliver qualification-based issuance of firearms.

FARM Functional Modules

Core Platform Features

Modern UI

Intuitive & logical user interface.

Dashboards

Configurable landing-page dashboards presenting key information and activity reports.

Reporting

Powerful integrated reporting function gives organisations comprehensive tools and controls to export and analyse their data.

Audit Logs

Full system audit logs, activity logs for asset maintenance, issues, movements, etc.

Document Management

Version controlled document repository to store and link documentation to assets, maintenance, and personnel.

Role-based access controls

Ensures secure and role-appropriate access levels for your teams.

Notifications & Alerts

Configurable alerts notify relevant teams about movements, usage, issues, and stock deficits.

Multilingual

User Interface available in multiple languages.

Interfaces

Integration with policing systems including duty, HR, LMS, command and control and mobilisation systems, finance, AD and SSO, email, MI universes, hardware interface with scanners, lockers, and access control systems.

FARM Firearms Assets & Equipment

The **FARM Firearms Assets & Equipment** module provides for the specialist management of firearms, Tasers, and other issuable policing equipment across their full lifecycle, from acquisition and tagging through issuing, maintenance, and disposal. FARM delivers real time visibility of asset location, status, and condition to ensure you always know where your assets are and who is using them.

Configurable features and workflows along with an advanced metadata provision makes it easy for FARM to align with your internal asset management procedures and classifications.

Works seamlessly with the **FARM Operational Training, Specialist Competencies & Skills** module to deliver qualification-based access control to assets.

Lifecycle Management

- An open, configurable framework allows FARM to be tailored to your organisation and assets, with instant scalability and no limit on the number of records.
- Standardised asset data provides a centralised, searchable inventory that supports effective control, reporting, and assurance.
- Each asset is maintained as a unique record capturing lifecycle and usage history, with service intervals and key dates linked to notifications.
- Link documentation to asset and servicing records, maintaining a complete and defensible compliance history.
- Complex asset hierarchies are supported, including individual items, kits, parent child relationships, collections, and indexation and management of consumables, parts, and ancillary stock.
- Asset behaviours, compliance rules, and maintenance requirements are defined centrally to ensure consistent application across all assets

Inventory & Stock Control

- Continuous tracking of asset location, movement, and availability
- Tag and scan technology for efficient and accurate stocktake
- Controlled issue and return with full activity logging and audit
- Alerts and exception reporting for overdue, missing, or unauthorised assets
- Reordering workflows and stock receiving
- Record purchase, maintenance and repair costs for expenditure reporting

Workshop, Maintenance and Repairs

- Dynamic asset state and status to monitor conditions at all times
- Record scheduled and ad-hoc maintenance, inspections, tests, checks, and calibrations
- Management of defects and repairs including risk calculations
- Set up multiple preventative maintenance schedules, automated scheduling
- Integrated maintenance calendar to manage all scheduled events
- Assign qualified individuals and crews to events.
- Alerts for outstanding events
- Create bespoke servicing forms and add completion signatures for events and work orders
- Tracking of spares, consumables, and maintenance actions including labour and costs for compliance reporting

Issuing & Booking

- Comprehensive issue/return processes for armourers and weapons issuing officers
- Qualification-based access to assets: assets can only be issued to users with correct operational roles in-ticket when connected with **FARM Operational Training, Specialist Competencies & Skills** module
- Differentiated workflows for firearms and Tasers, and for training, deployment, and transport issue.
- Self-issue and WIO workflow routes
- Dynamic transaction logs, audit history and reports on usage - visibility over which assets are issued, to who, why, and when
- Alerts for overdue returns and non-compliance
- Stocktake functions for complete armoury management

Operational Deployment

- Links with the issue/return function to capture details about the deployment of specialist competency roles and assets used
- The operational deployment record gives a full picture of incident and response such as incident number, the officers present, their roles, assets and consumables used, etc.

Tag and Scan

- Supports RFID, barcode, QR, NFC, dot peen asset identification and marking systems
- End users benefit from rapid workflow processes, freeing up their time and delivering reassurance through infallible verification of items
- Integration with access-controlled storage and intelligent locker systems

Ask us about options for scanners, lockers, and asset marking systems – we work with a number of suppliers to offer the best solution for your organisation

Mobile Applications

- Mobile asset management supports field-based maintenance and inventory activities. Add, move, inspect, report, and stocktake tag-enabled assets and equipment.
- Quick-issue firearms and Taser kiosk tablet for self-service or staffed asset issue. Syncs in real-time with changes to training records in the main application (if the FARM Training Management module is activated).
- Secure online and offline operation with synchronisation back to the main database when connected, ensures continuity in remote or signal-restricted environments.

FARM Operational Training, Specialist Competencies & Skills

Manage, run and record police training with total freedom and ease

The FARM Operational Training, Specialist Competencies and Skills module supports the creation, planning, and delivery of training, the assessment of officers and the continuing management of their skills and competencies, meeting College of Policing licensing requirements.

FARM records and updates training outcomes and authorisations in real time, tracking validities to expiry, enabling strategic training planning, and delivering the reassurance of continuing compliance and up-to-date skills within your teams.

It works in partnership with the FARM Firearms Assets module to deliver the complete solution functionality to your force, determining officer operational status and authorisations related to the compliant usage of assets and equipment.

Role Profiles

- Create, maintain, and link primary and additional skill profiles
- Build each role up with a specific combination of training elements, competencies, and accreditation requirements that must be met per individual training year or cycle
- Roles, qualification codes, competencies, and other training elements can be input and structured to align with the College of Policing National Firearms Curriculum and are fully configurable.

Curricula & Course Creation

- Define, set up and run full curricula of training programmes, qualifications, courses and sessions, whether they are led by national standards, regulatory programmes, or internal policy.
- Course creation wizard to session level with a multitude of options and configuration available to define your courses by portfolio, type, duration, venue, risk, documentation, etc.
- Supports practical, tactical, range, and classroom-based training types.
- Supervisor approval workflows for designed courses

Schedule, Book, & Deliver

- Interactive planning calendars
- Training venue, capacity, and instructor management
- Booking on and allocation, prioritisation of urgent training requirements
- Instructor-focused delivery interface – record attendance, notes, and results in real time

Risk Assessments & Safety Briefs

- Create and attach activity-based risk assessments and safety briefs to be available during training
- Enables instructors and students to digitally confirm delivery, attendance and compliance.

Please contact us for more information about our risk assessment and safety brief function.

Training Records

- Officer portfolio and summary views on training progression
- Officer training records are updated as each course is completed, authorisations and validities refreshed in real time
- Records are retained to provide detailed audit trail of each course completed down to session content, documents, outcome, notes
- Fully searchable and exportable

Digital Delivery Application

An optional tablet-based application* enables mobile training delivery, from recording attendance to provision of course materials, and real-time capture of results and outcomes, for example out in the field, on firing ranges or in remote locations. Results recorded remotely via the mobile app are synchronised with the main database and changes to training records and learner operational status are instantly visible on the web app.

*Priced separately

Future Training Planning

- Training planning, scheduling, and booking onto courses in an integrated workflow
- Non-attendance can be tracked, accounted for and reported against.
- The system reports on upcoming training expiries per user, role, etc. to ensure compliance within teams
- Business planning tools enable large-scale strategic planning of training across a whole force for the training year or cycle
- Input required minimum levels of qualified staff per department and role, and let the system do the rest
- Drag and drop courses onto a calendar to build and plan your training year

FARM Fleet

The DVSA-compliant FARM Fleet Management module delivers an efficient management and the continued roadworthiness of your vehicle fleet. It gives an organisation-wide visibility of vehicles, tyres, drivers, accidents, fuel and workshop maintenance to support cost control, reduce downtime, improve vehicle availability, and improve data-driven decision-making.

FARM Fleet encompasses all the functionalities of the core platform, as well as those in the Assets and Equipment module, plus:

Vehicle Assets

- Bespoke asset record layout tailored for indexing vehicle information

Driver Management

- Maintain DVLA-compliant driver records
- Manage driver competencies and training to control vehicle eligibility
- Record and report on driver points, penalties and training status

Tyre Management

- Manage the full tyre lifecycle from purchase to disposal
- Fit tyres to vehicles, record specifications and fitment details
- Perform ad hoc and scheduled tyre inspections
- Report on tyre cost and efficiency

Fuel Management

- Record fuel usage through fuel card integrations or manual entry
- Report on fuel consumption and cost by vehicle/vehicle type/department.
- Support emissions tracking and environmental reporting.

Accident Management

- Capture accident data, including images, witness statements and supporting evidence.
- Manage accident repairs and associated actions.
- Record insurance claims linked to accidents.

FARM Aviation - Continued Airworthiness

TRAM Camelia supports the continued airworthiness of aircraft fleets by enabling Continued Airworthiness Management organisations, teams, and technicians to plan, monitor, and manage maintenance and compliance activities, ensuring aircraft meet all regulatory requirements to allow Airworthiness Review Certificates (ARC) can be issued.

TRAM Camelia encompasses all the functionalities of the core platform, Lifecycle Management, Inventory & Stock, Workshop, Maintenance and Repairs, Mobile app plus:

Aviation KARDEX

- Bespoke asset record layout tailored for indexing aircraft including key parts, Airworthiness Directives, and dynamic RAG statuses on every maintenance trigger and part.
- Each aircraft and each of its parts holds a full usage log and maintenance audit trail

Maintenance and Activity Triggers

- Set time-bound and/or usage-based maintenance triggers for aircraft components (e.g., engines).

Track Flight Hours and Usage

- Review and record aircraft hours, flying logs, and operational usage.

Catalogues and classifications

- Import and manage Airworthiness Directives
- Link or disassociate parts from aircraft

CAMO-focused work orders

- Request proposals for tasks from workshops or suppliers
- Issue, track, and manage work orders and follow-on maintenance.

Onboarding & Service Provision

Innaxys provides comprehensive implementation services for all our cloud software systems. Depending on your organisation's individual requirements, our services include:

- Discovery & configuration workshops
- Hosting & technical configuration
- Data migration
- UAT support
- Training

All onboarding implementation activities are led by a dedicated, experienced project manager working in-house with our technical teams.

We work with major blue light and public sector clients including police forces, fire services, and UK government organisations, so we have a wealth of experience and understanding of implementing our digital solutions in these sectors.

Working with Innaxys, you will also benefit from:

- UK-based, ITIL-compliant technical and end user support following SLAs
- In-life contract management and support
- Our systems follow full roadmaps and release schedules, with new customer-led functionalities introduced twice annually

Secure by Design - Trusted by Many

Our company and services are entirely UK-based

Public/private cloud, hybrid, & on-premise deployment options available

UK data centres are PASF & ISO 27001 accredited

Certified to ISO/IEC 27001:2022 & Cyber Essentials Plus

Systems & data encrypted to industry standards

Secure, multi-factor authentication, system & audit logging, role-based access controls

Systems operate to Official Level

Police-vetted personnel

Our Vision

We bring innovation to policing and the public sector through solutions crafted from decades of industry experience

Founded in 2011, Innaxys creates and delivers cutting edge training and asset management software solutions to emergency services and public sector organisations both in the UK and Europe. We harness technology, innovation and forward thinking to design solutions that help our clients to evolve and meet the needs of modern practices, achieve greater efficiencies, minimise paperwork and duplication, improve productivity, and reduce wasted resources.

Each member of our carefully selected development team holds a science related degree, complemented by computer engineering expertise, experience and training. Our engineers are directly employed, and we work closely together from our offices in the heart of Derbyshire. This enables us collectively to bring a dynamic and accomplished approach to software development, driven by a firm focus on the client.

We believe that technology should be a vehicle to deliver better business processes, and that close communication and partnership with the customer is vital to provide them with the most effective solution.

We practice Agile project management methodology, involving our clients at every step of the journey, whether that be for simple configuration of existing Solutions to meet your ways of working, or a full development project to introduce new functionality. This ensures a collaborative approach to each and every project, builds an environment of trust and transparency, and results in exceptional value for money and positive change for all our clients.
