resillion

Service Definition Document
Cyber - G-Cloud 15

1 Services

Resillion provides a suite of solutions that work together in a complementary fashion, meaning you can select a single service or choose Resillion as your fully outsourced managed security partner knowing you will get the same, outstanding level of service every time.

1.1 Technical testing and Assurance

Test and verify security controls ranging from technical to procedural to human behavioural. Our services span the entire complexity and exploitation spectrum from low impact scanning to assessment of highly mature security through our Advanced Persistent Threat (APT) simulation and Red Team testing services.

- External and internal network and infrastructure penetration testing
- Web and mobile application vulnerability assessment and penetration testing
- Wireless network testing
- Configuration and architecture review
- Source code review
- Social Engineering, APT simulation and Red Team testing
- Vulnerability research
- Fully managed testing and technical assurance programs
- Testing of Cloud, OT, Autonomous vehicles and AI systems

1.2 Consulting

Resillion's highly experienced Subject Matter Experts are able to assist with the entire spectrum of information security, governance, risk management and compliance requirements. This ranges from simple project based engagements or auditing to highly integrated outsourced services.

- Standards (ISO 27001, PCI DSS, etc.) implementation and compliance consulting
- Information Security Governance, Risk Management & Compliance (GRC) project consulting
- Data Protection & Privacy
- Technology selection
- Outsourced CISO, ISO, Data Protection Officer services

1.3 Education and Mentoring

Resillion's training delivery team members are able to deliver a range of bespoke or off the shelf courses. Able to deliver complex global programmes combining eLearning, face to face classroom learning and mentoring to highly specialised, bespoke courses and knowledge transfer programmes for specific groups.

- Information Security Awareness
- Cyber Incident response -technical
- Cyber Incident Response – C-Suite and senior management
- Vulnerability scanning tools training
- ISO Mentoring

1.4 Cyber Incident Response Services

If you suspect a cyber incident or data breach has occurred and you need a team of experts to investigate, manage and remediate the incident, Resillion is available 24/7 to provide forensic analysts, expert witnesses and senior incident managers to take care of everything from working with victims, the authorities, the press, third party stakeholders such as regulators as well as managing internal communications, allowing business to return to normal operations quickly.

- 24/7 telephone and onsite response
- Forensic/technical response
- Senior Incident Managers

1.5 Managed Security Services

Resillion provides a range of fully managed security services allowing 24/7 real time management and monitoring of network perimeter and internal networks providing a complete and single pane view of Indicators of Compromise before they manifest.

Additionally, our outsourced testing and assurance programmes provide the complete service any enterprise may require of a security partner.

- Managed Detection & Response (MDR)
- Endpoint Detection & Response
- Network Detection & Response
- 24/7 Security Operations Centre (SOC)
- Managed Firewall and security technology
- Managed Domain and Reputation Abuse Monitoring Service (DRAMS)
- Managed scanning and vulnerability management

2 Company Certifications

- ISO 27001
- ISO 9001
- Cyber Essentials PLUS
- Full CREST Member
- CREST STAR
- UK NCSC CHECK Scheme member
- UK NCSC Assured Service Provider
- Crown Commercial Service Supplier

3 Consultant Certifications, Accreditations & Professional Memberships

- Certified GDPR Practitioner
- ISO 27001 Lead Auditor and Lead Implementer
- CREST Certified Simulated Attack Manager (CCSAM)
- CREST Certified Simulated Attack Specialist (CCSAS)
- Certified Information Systems Manager (CISM)
- Certified Ethical Hacker (CEH)
- Certified in the Governance of Enterprise IT (CGEIT)
- Licensed Penetration Tester (LPT)
- CREST Registered Network Intrusion Analyst
- Masters (GCHQ Accredited) Cyber Security
- Certified Information System Security Professional (CISSP[1])
- NCSC **CHECK**[2] Team Leader/Member
- Certified Information Security Auditor (CISA[3])
- KÜRT[4] Certified Ethical Hacker
- Various vendor specific qualifications e.g. ISS, DRS/NX System Administration, Check Point, Microsoft, Cisco, Symantec, EnCase, etc.

[1] Certified Information Security Systems Professional (CISSP) from (ISC)[2]. (ISC)[2] – an organization for certifying industry professionals and practitioners to an international Information Security (IS) standard; and ensuring credentials are maintained, primarily through continuing education. CISSP certification is recognised as an international standard for information security and for understanding of a common body of knowledge. (www.isc2.org)

[2] NCSC approved scheme for Information Security testing of critical government infrastructure.

[3] Certification from the Information Systems Audit and Control Association. In the three decades since its inception, ISACA has become a pace-setting global organization for information governance, control, security and audit professionals. Its IS auditing and IS control standards are followed by practitioners worldwide.

[4] KÜRT Academy founded course to advance students beyond those available in industry such as the Certified Ethical Hacker (CEH) course. This advanced, intensive course includes 240 hours of tutorial and practical study.
