1. Introduction

This Pricing Document sets out the prices for Sage Intacct under G-Cloud 15. Sage Intacct is a modular cloud financial management solution which is licensed to end-user organisations.

2. Sage Intacct Core Subscription (Annual)

Below are the solutions offered for **public sector customers** throughout Intacct deployments. Below is special pricing for all public sector customers, which includes education organisations.

All subscription prices payable annually in advance.

2.1 Core Platform

SKU / Module	Description	Annual Price
Sage Intacct Financial Management for Public Sector	Sage Intacct Financial Management for Public Sector provides a complete financial management foundation for public sector organisations that need reliable reporting, strong controls, and clear visibility across departments, programmes, and funding sources. The package brings together core financials, multi-dimensional accounting, real-time reporting, planning, spend management, project tracking, fixed asset	**£19,500.00**

SKU / Module	Description	Annual Price
	management, and multi-entity support in one cloud-native system. It allows for the managing of daily finance operations, capturing spend and commitments, automating payables, supporting project delivery, and producing role-based reports and dashboards that reflect how public sector organisations structure their services. Multi-dimensional accounting enables tracking by programme, grant, campus, or pathway, while planning capabilities allow teams to collaborate on budgets and models that respond to changing funding conditions. The package also supports governance and oversight through sector reporting, audit trails, outlier detection, and board-ready insights. Users can configure workflows, dimensions, and dashboards using standard platform services, while self-service access allows wider teams to raise requisitions, enter time and expenses, and view dashboards without relying on finance. Multiple business entities can operate within a single environment, with visibility across sites or service areas. Capacity for users, entities, planning roles, reporting tools, and automation volumes can be expanded through add-ons where needed, allowing public sector organisations to scale the system in line with service growth, structural changes, or increasing demand for automation and analytics.	

2.2 Entities

Additional Public Sector Business Entity	Adds one operating/legal entity with multi-entity roll-up.	**£690.00**
