

G-Cloud 15 Pricing – CasparGov

Licensing and Implementation

September 2026

Commercial in confidence

Pricing

Pricing Model

CasparGov is provided as a fully managed Software-as-a-Service (SaaS) solution. Pricing is based on the number of concurrent user licences required by the customer.

All prices are exclusive of VAT.

The annual licence fee includes:

- Access to the CasparGov cloud-hosted application
- All system and user licences
- Ongoing software maintenance and updates
- Secure hosting and infrastructure management
- Access to the CasparGov customer support service
- Standard service management and incident handling

Annual Licence Costs

Pricing is based on the number of concurrent user licences required.

Concurrent User Licences	Annual Cost (£)
1-5	£18,445
Up to 10	£24,038
Up to 15	£28,084
Up to 20	£31,773
Up to 25	£35,462
Up to 30	£39,151

Pricing for other concurrent user volumes (e.g., 12 or 18 users) and for more than 30 concurrent users is available upon request.

Implementation Services

Standard Implementation Package

A one-off implementation fee applies to all new CasparGov customers.

Price: £5,500 + VAT

This covers a structured, supported implementation using our standard delivery approach.

What's Included

The standard implementation package includes:

- Project kick-off and planning
- Provisioning of the customer's CasparGov environment
- Access to a dedicated project SharePoint area
- Supported data migration using the CasparGov Migration Workbook
- Core system configuration (users, roles, reference data)

- Provision of a training environment (time-limited)
- Online training sessions (administrator and core system functionality)
- User Acceptance Testing (UAT) support
- Go-live support period
- Handover to Business-as-Usual support
- Supported implementation of bank reconciliation functionality (up to 4 hours, including training)
- Access to documentation, user guides and the customer support portal

What's Not Included

The following are **out of scope** of the standard implementation package and are available at additional cost if required:

- Bespoke development or custom code
- Complex or historic data migration (including data cleansing or transformation)
- On-site training or extended training programmes
- Business process redesign beyond standard system alignment
- Extended go-live or post-implementation support
- Bespoke integrations beyond standard supported interfaces

Implementation Timelines

- Environment provisioning typically occurs within 1 week of contract commencement.
- Standard implementation delivery is typically 8–12 weeks, subject to:
 - Customer availability
 - Data readiness
 - Scope complexity

A detailed project plan is agreed during the implementation kick-off.

Professional Services (Optional)

Additional consultancy, training or support services can be provided if required.

Indicative day rates:

- £1,000 per day – Remote / Virtual
- £1,150 per day – On-site

All additional services must be agreed in advance.

Contract Terms

- Pricing is based on an annual subscription
- Licence fees are payable from the contract commencement date
- VAT is charged at the prevailing rate
