Service

Name of the Service Offering/Service: Idox Geospatial Express Custom

Service Overview

Idox Geospatial Express Custom service streamlines public sector access to and usage of licensed location content. Idox Geospatial Express Custom is fully aligned to the government's channel shifting 'digital by default' agenda and the INSPIRE regulations and is backed by enterprise grade service level terms.

Through the intelligent integration of a diverse portfolio of location content, underpinned by the Ordnance Survey data stack, with standard access protocols and delivery standards Idox Geospatial Express Custom is proven to simplify what can be complex processes, shorten delivery related activities, smooth location content integration, accelerate usage and adoption of valuable and sophisticated data sets and more easily support location and business intelligence analytics, extracting ever greater value for all types of organisations. Idox Geospatial Express Custom represents an accessible and affordable platform and toolkit for government.

The service delivery platform is hosted on a cluster of highly tuned servers in a state-of-the-art low carbon hosting facility with round the clock monitoring. Idox Geospatial specialists and technical teams ensure service level availability compliance, data currency, adherence to standards and service management.

Whilst primarily an open source and open standards based platform, Idox Geospatial is highly experienced in a range of technologies including a very wide range of GIS, CAD, modelling and ETL tool sets, database and big data technology, web map server tools, Open Geospatial Consortium (OGC) standards and web services. Furthermore, Idox Geospatial adhere to the principles of proven methodologies including DSDM and PRINCE2 as well as understanding the implications of the appropriate regulatory environment including INSPIRE.

Pricing

Idox Geospatial has refined its flexible service call model into a single tiered Service Plans for Idox Geospatial Express Custom:

- Central Government Department
- Arms Length Body, Government Agency or Non Departmental Public Body
- Unitary Authority, District Authority, County, London Borough or Metropolitan Borough
- Parish, Town or other small area administrative geography

These categories correlate by and large with population served and amount of infrastructure and serve as a useful proxy for the number of contractors and others to whom the licensees might reasonably expect to wish to extend self-service easy access tools such as Idox Geospatial Express Custom.

Organisations wishing to extend adoption using OGC web map services to contractors will be able to extend Idox Geospatial View services.

Description

At all tiers the service is designed to:

- Allow organisations to exploit fully the potential use of data available under the PSGA
- Provide simple-to-use access for external consumers (contractors et al)
- Provide a stepping stone to wider adoption and usage
- Simplify the data management process and free up resources
- Reduce data storage, management and support overhead costs

Features and Benefits

- Always up to date
- Always on
- Internal Business Use
- Secure
- Fully managed, SLA backed, hosted service

Plan Pricing

Requests and Transactions

The price of each tier is determined by the volume of queries over a 12 month period.

- Marine data

Ordering and Invoicing Process

An order for the Idox Geospatial Express Custom service can be initiated from the G-Cloud Catalogue/Cloudstore following Government Procurement Service ordering procedures. However, Idox Geospatial are very willing to discuss any potential use of the service prior to any order being initiated to ensure that the right level of service plan and content are selected. Subject to any such discussion ordering entails agreeing to terms and conditions and determining parameters for API Key.

Invoicing monthly in arrears according to usage.

Termination Terms

Typically 3 months' notice is required unless there is a material and persistent breach of any of the obligations agreed under a Call Off or other Contract under the G-Cloud framework or if a change of control of the Supplier causes conflicts of interest or other competition issues. Please see the terms and conditions document for full details.

Details of Trial Service
