

Pricing - Cloud GIS Geospatial Platform as a Service

September 2026

Commercial in confidence

Pricing

Once an initial enquiry is received, a customer platform specification will be produced. Whilst the standard implementation of our geospatial platform, theMapCloud, will meet many business requirements, additional development or consultancy may be required e.g. help with the migration to theMapCloud, the development of specific business applications or custom APIs.

A development/setup fee will start from £5495, with the exact fee being agreed using the standard day rates in our Government Digital and Data Roles document. The cost will depend on numerous factors including:

- Volume of data storage required.
- Data update frequency.
- Expected level of usage and transactions.
- Level of bespoke development and platform configuration required to meet customer requirements.

Depending on the scale and complexity of the development work, we will agree appropriate project and payment milestones with our client.

The annual subscription fee is on a minimum term of 12 months and typically covers:

- Access to theMapCloud platform
- Enterprise class data centre, hosting and infrastructure management services.
- Backup and recovery.
- Service management
- Provision of technical support, guidance and advice.
- Access to staffed service desk (Monday-Friday, 08:30-17:30, excluding public holidays).
- Optional - access to a suite of national coverage commercial, Open Data and free to use data products.

The annual hosting, support and maintenance fee will be dependent on data storage, updates and transactional use.
