

Digital Sensitivity Review Managed Service

PRICING PLAN

Make use of the Digital Sensitivity Review (DSR) Managed Service, which delivers unique a sophisticated solution to one of the most complex challenges facing global organisations today: ensuring sensitive content is correctly identified and redacted in digital files for public consumption.

Use DSR's Managed Service to deliver AI-driven automation in secure, sensitive public record data redaction, and automate the identification of ephemera, duplications and then sensitive information within digital records, suggesting redactions for fast user review and approval whilst ensuring compliance with the Public Records Acts, whilst enhancing cyber security.

The Digital Sensitivity Review provides a cost-effective managed service package to automatically assess and prepare files for public archiving through:

- **Assessment & Selection:** rapidly evaluate file integrity and assesses and which records should be retained for public archiving
- **Sensitivity Review:** Identify potential sensitivities and redactions for fast user approval.
- **Packaging & Delivery:** Redacted files with metadata and auditing for secure transfer to public archives

Digital Sensitivity Review Management Services are supplied on a defined requirement scope of supply, across a fixed term project delivery agreement basis. Pricing of the service will vary according to the outcomes of Feasibility Study scoping a service definition based upon scope, scale and classification.

For further details, please contact the DKIM service delivery team via mail@svgc.co.uk, quoting "GCloud DSR Service".
