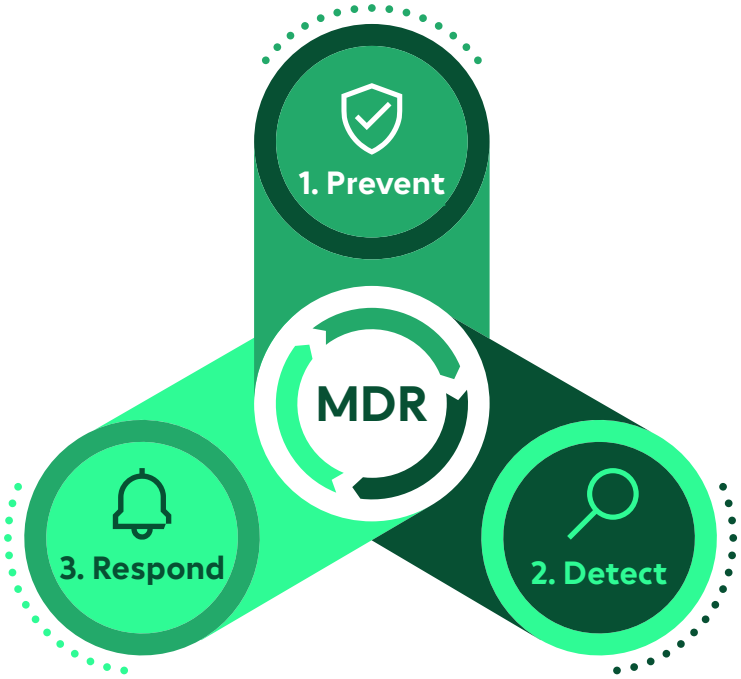
Managed Detection & Response

A Bechtle Packaged Solution

In today's threat landscape, where cyber-attacks are increasingly sophisticated and relentless, many organisations find it a challenge to maintain round-the-clock vigilance. With critical consequences, such as data-loss, financial-loss, loss of customer trust etc; the need to ensure 24/7 security has never been more important.

This is where Bechtle's Managed Detection & Response (MDR) service steps in, providing 24/7 monitoring, investigation, and threat response, helping organisations overcome the limitations of in-house resources. Designed to integrate seamlessly with tools such as CrowdStrike, SentinelOne, and Microsoft Defender, it supports a wide range of environments.

With expert-driven analysis and rapid containment, MDR strengthens cyber resilience and improves security outcomes. Flexible service tiers and integration with your existing tooling ensure a tailored approach that reduces dwell time, supports compliance, and enhances incident preparedness.



BENEFITS OF THIS PACKAGE

- 24/7 threat detection, investigation, and response
- Delivers expert threat analysis and rapid containment
- Reduces operational burden on internal teams
- Extends existing tooling with vendor-agnostic support
- Supports compliance needs (e.g., ISO 27001, Cyber Essentials)
- Reduces time to detect and respond

WHY BECHTLE?

- Supporting security strategies for 30+ years.
- Europe's largest IT provider.
- Specialised professional services, provided by security certified engineers.
- End to end support across industry leading IT security vendors.

WHAT'S THE COST?

Pricing is determined based on specific project requirements.
