

Virtual Chief Information Security Officer (vCISO) Services

A Bechtle Packaged Solution

Bechtle's vCISO service provides flexible, senior cyber security leadership and advisory support without the need for a full time Chief Information Security Officer. The service is tailored to organisational priorities, security maturity, and risk appetite.

vCISO services support strategic decision making, strengthen security governance, and provide clear, executive level insight to help organisations manage cyber risk effectively.

How does it work? While the steps will vary depending on your organisation's requirements, let's take a look at the typical engagement stages:

1. Understand

Assess organisational priorities, risks, and security maturity.

2. Advise

Provide strategic cyber security guidance and recommendations.

3. Govern

Support policy development, risk management, and assurance.

4. Report

Deliver clear, executive level security insight.

5. Evolve

Adapt focus as organisational needs and risks change.

BENEFITS OF THIS PACKAGE

- Access to senior cyber security leadership without full time cost
- Improved visibility and management of cyber risk
- Stronger governance, policy, and security accountability
- Clear, executive level security advice and reporting
- Flexible support that scales with organisational needs

WHY BECHTLE?

- Europe's largest IT provider.
