

INFRASTRUCTURE REVIEW

BECHTLE PACKAGED SOLUTION

IT transformation can seem risky without a clear, comprehensive view of current IT environments and workloads. To optimise your infrastructure in a multi-cloud world, you need to know how workloads impact each other in a shared environment over time.

Bechtle's Infrastructure review creates transparency, so you can accurately see and diagnose your unique IT needs. Whether you are looking for a light touch analysis or an in-depth review of your estate, Bechtle's consultants will spend time understanding your business and business goals. We will deliver a bespoke infrastructure review and help design an infrastructure that can 'do more with less'.

Bechtle provide detailed information and analysis to support any infrastructure change and business justification. For example...

What's included?

 CPU Peak CPU: 62.29 GHz Net CPU: 134.40 GHz Cores: 64	 Capacity Used: 18.40 TiB Free: 17.10 TiB Total: 35.50 TiB
