

Microsoft Data Security Workshop

A Bechtle Packaged Solution

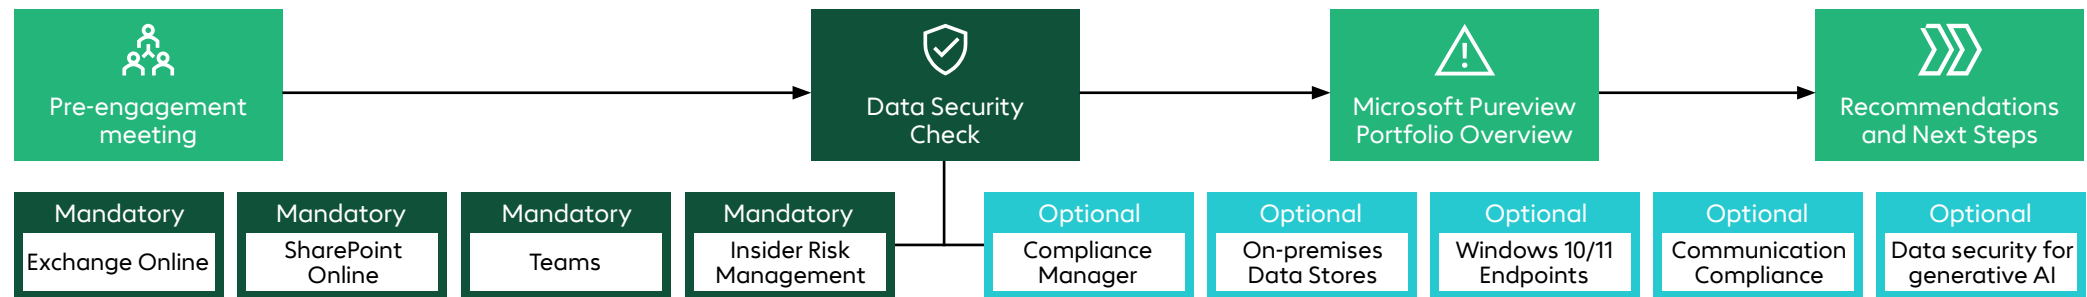

In today's digital age, data is the crux of any business, so its security is paramount to any business. With this in mind and reports forecasting the datasphere is to double in the next 2 years, the sheer volume and complexity of data will only increase, making it a prime target for security incidents.

Furthermore, with the rapid deployment of generative AI applications, data security risks are escalating, demanding robust protection and governance.

Bechtle's Data Security Workshop will provide reassurance and governance to take control and safeguard your business's future. This is for organisations with compliance requirements or data security concerns that are using or have the intention to start using Microsoft Cloud Solutions. This engagement gives you the insights you need to understand and mitigate data security, privacy and compliance risks in your organisation.

At a high level, below is the process flow on what the workshop would look like:

**This workshop is designed for customers with 300-5000 paid licenses for Microsoft Entra ID P1 AND 250+ Monthly Active Users (MAU) for Exchange Online, SharePoint Online*
