

Go To Cloud Workshop

A Bechtle Packaged Solution

The Go to Cloud Workshop has been designed to help organisations transition their workloads and infrastructure to the cloud.

In this workshop, our Azure experts will help you define a strategy for migrating your existing data and applications to the cloud that best fits the requirements of your business. Once we have built an understanding of your current infrastructure and the best approach for migration, we can work with you to map out the anticipated costs to migrate, deploy and maintain your business' cloud infrastructure. Once you are happy with the proposal, we will support you in facilitating the transfer of your applications to a hosting provider.

What's included with the Go To Cloud workshop?

Mapping of existing virtual infrastructure.

Measuring cloud maturity:
Assessing current use of Microsoft software and services.

Identifying hardware technical limitations.

Draw up a provisional budget including the migration, deployment and maintenance of a cloud infrastructure.

Contact with the host, publisher and selected service providers.

When to implement the workshop

Contractual changes
- renewals, additional licences etc.

Upstream of a cloud migration project.

In the event of a transfer from a 3rd party cloud to Azure.

WHY CHOOSE THIS PACKAGE?

As part of this workshop you will receive a documented analysis report including:

- Assessment of existing virtual infrastructure
- Summary of recommended Cloud strategy including the project budget

WHY BECHTLE?

- One of Microsoft's largest European partners.
- A Microsoft Solutions partner.
- Broad range of professional services, provided by certified engineers.
