

# Microsoft Threat Protection Workshop

## A Bechtle Packaged Solution

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organisation's cloud environment as secure as you think it is?

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Bechtle can support achieving your broader security objectives by identifying current and real threats by scheduling a Threat Protection Engagement.

This workshop builds a strategic plan, which is customised for your organisation based on the recommendations of Bechtle's Microsoft experts in security.

*Please see the 4-step process below:*

**1.** Review your security goals and objectives

**2.** Identify real threats and discover vulnerabilities in your environment

**3.** Map identified threats and vulnerabilities to specific solution recommendations

**4.** Develop joint plans and next steps

Member of  
**Microsoft Intelligent Security Association**

*This workshop is designed for customers with 300-5000 Paid licenses for Microsoft Entra ID P1 AND 250+ Monthly Active Users (MAU) for Exchange Online, SharePoint Online or Teams.*

### Outcomes

- Analysis of cybersecurity threats that are found targeting your organisation.
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritise and address vulnerabilities and misconfigurations across your organisation.
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.
