

MANAGED NETWORKING.

BECHTLE PACKAGED SOLUTION.

Bechtle provides a manageable, competitive solution for running and maintaining your network.

We deliver network support and maintenance services that incorporate all networking activities, from hardware replacement to a 24/7 fully managed network, including incident, change and problem management all in line with ITIL best practice.

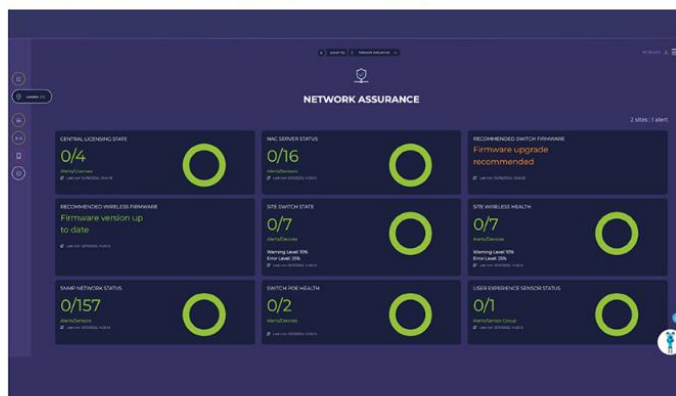

This is all supported by Bechtle's vendor agnostic platform 'VISION' where you can view your network and IoT key metrics. In addition to this, you have access to 27/7 UK Telephone (multilingual) technical support.

Not sure where to start?

Talk to us about an end-to-end assessment of your:

- WiFi
- Infrastructure

A single, easy to navigate view of the most important Network and IoT information from multiple vendor platforms:
