altia. | OSINT Investigator

An internet intelligence investigation solution designed to tackle the growing volume of digital intelligence.

OSINT Investigator enables more investigators to capture content from the internet quickly, securely and evidentially. Data is integrated within our case management solution, Insight, or captured in an easy-to-access data repository.

Why OSINT Investigator?

Easy and direct content capture

With an extension that sits in any browser accessed via our secure isolated cloud, you can capture content with one click direct into Insight or a data repository. No data flows to third party applications.

Reduce bottlenecks

Because OSINT Investigator is easy to use, investigators will only need minimal training to self-serve and capture digital content as part of an investigation reducing reliance on specialist teams.

Monitor risk

Monitor URLs as often as required. Captured content (pages, videos, images) is compared against specified criteria and key words, triggering a user notification when a match is found.

Evidential compliance and audit trail

Information captured is hashed to maintain its integrity and indexed for efficient searching. All actions are recorded forming a verified audit trail of virus-checked, encrypted, and validated data. If you use Insight, you can generate compliant, court ready documents with just a click.

Collaborative working

Automated cross-case linking, promotes collaborative working and minimises operational duplication through auto-matching, when matching website data is captured.

Data security

Your investigation blends into the regular search traffic and captured data is stored securely and complies with all data capture and retention regulations. Sensitive investigations can be restricted to certain roles, individuals, teams, or departments, with access only granted to those who need it.

> "We've had excellent ongoing support from Altia. If we raise support queries, we get a fast response and we've valued the regular upgrades to the functionality of the product which show that user feedback is taken into consideration."

The latest security and technology standards

Built using cloud native technology OSINT Investigator comes with the latest standards in security, flexibility and resilience. It can be upgraded and adapted to meet compliance and new feature requirements faster than ever without creating a heavy IT or administrative burden.

Security and resilience	▪ Your own Microsoft Azure environment, plus additional security frameworks applied. ▪ Strict access control, with two factor authentication and data encryption. ▪ 99.9% uptime guaranteed by Microsoft Azure. ▪ 24/7 monitoring of threats. ▪ Single customer-specific data store, with unlimited storage available.
Always up to date	▪ We can update OSINT Investigator to meet new compliance requirements, and adapt to new technology advances, faster than ever. ▪ New features and functionality are regularly released. ▪ Because we manage the software and infrastructure, there's no burden on you or your IT team to manage install, patches or upgrades. It's all automated.
Support and service	▪ Self-serve e-learning modules. ▪ Virtual training available on request. ▪ Learning videos. ▪ Technical support desk. ▪ Account manager.
