

altia. | Capture

Evidence and intelligence capture
anytime, anywhere.

With the demand and complexities faced by police, security and regulatory bodies now higher than ever, innovative technology can increase mobility, efficiency and access to mission critical information in the field and for court.

Why Capture?

Effortless note taking

Record notes in less time with voice-to-text, voice recording, and text entry through Capture desktop and mobile apps. Use the 'quick note' function to capture mission-critical information for later use.

Full evidentiary trail

Meta tagging automatically records the time, date and place of each entry. When there is no internet connection, the entry time is recorded, then time-stamped when connection has been restored. Capture is PACE compliant.

Realtime classification

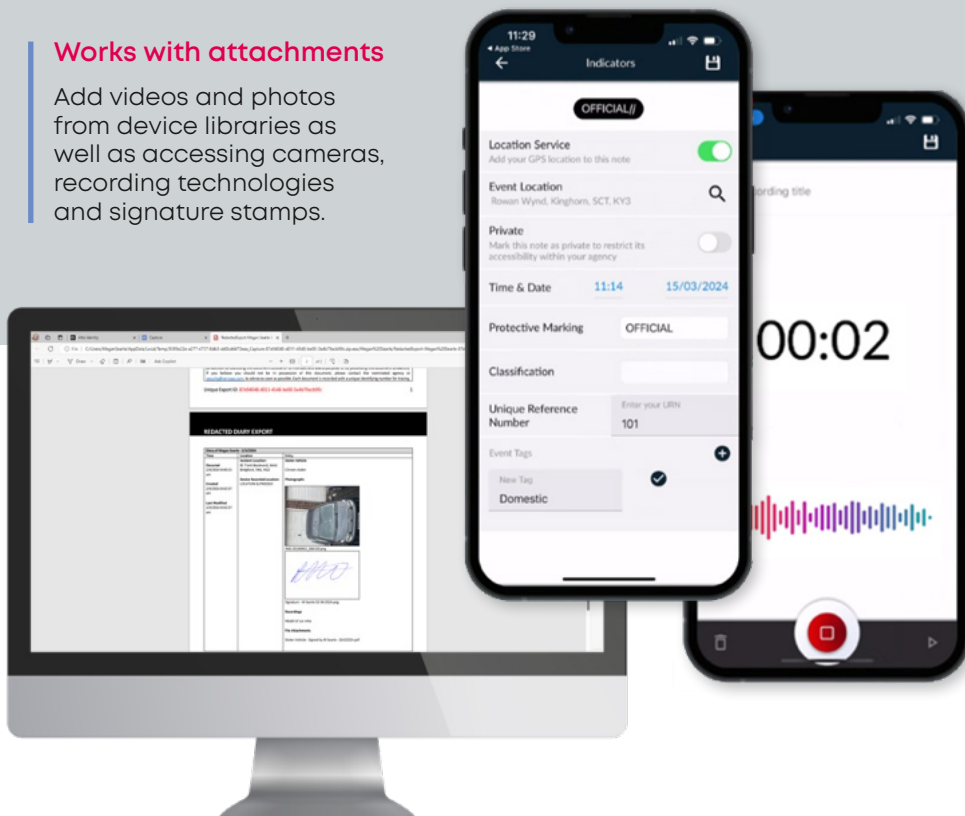

Classify your entries to protect sensitive information. Add warning markers and automatically redact notes for expedited court production and Freedom of Information disclosure.

Works across devices

The secure desktop portal allows access to total management of all your records. The native iOS and Android apps are designed for effortless and highly secure reporting, in the field.

Works with attachments

Add videos and photos from device libraries as well as accessing cameras, recording technologies and signature stamps.

The latest security and technology standards

Built using cloud native technology Capture comes with the latest standards in security, flexibility and resilience. It can be upgraded and adapted to meet compliance and new feature requirements faster than ever without creating a heavy IT or administrative burden.

Security and resilience

- Your own Microsoft Azure environment, plus additional security frameworks applied.
- Strict access control, with two factor authentication and data encryption.
- 99.9% uptime guaranteed by Microsoft Azure.
- 24/7 monitoring of threats.
- Single customer-specific data store, with unlimited storage available.

Always up to date

- We can update Capture to meet new compliance requirements, and adapt to new technology advances, faster than ever.
- New features and functionality are regularly released.
- Because we manage the software and infrastructure, there's no burden on you or your IT team to manage install, patches or upgrades. It's all automated.

Support and service

- Self-serve e-learning modules.
- Virtual training available on request.
- Learning videos.
- Technical support desk.
- Account manager.
