

Prison Surveillance

A UK legislation compliant solution for capturing intelligence within the prison system.

Why Prison Surveillance?

As well as offering a solution for capturing intelligence within the prison system the Prison Surveillance module ensures all risk is assessed, mitigated and managed at an acceptable level.

Authority capture

Automate the application and authorisation of relevant authorities including the ability to review, renew and cancel. A configurable workflow process ensures all records are assessed following the chain of command appropriate to your organisational hierarchy and business process.

Manage intelligence and risk

Record information and convert it into actionable intelligence using the 3x5x2 National Intelligence Model report. Effectively analyse data, establish key facts and share as appropriate. Record any instances of compromise.

Legislative compliance

Authorities, review, renewal and cancellation functions ensure legislative compliance. UK legislation compliant including RIPA, IPA, Police Act, Prison Act. Review and mark information for retention or disposal in accordance with IPCO record and product management guidelines.

Altia is highly experienced in the covert field

We have decades of experience working closely with officers in covert operations and some employees have experience of working in those teams. This partnership has enabled the development of solutions that truly meet operational needs. We provide all associated services, such as training, database administration, health checks and configuration work. All Altia staff engaged in the development and delivery of ACOS are cleared to SC level and a number to DV level.

The latest security and technology standards

Built using cloud technology ACOS comes with the latest standards in security, flexibility and resilience. It can be upgraded and adapted to meet compliance and new feature requirements faster than ever without creating a heavy IT or administrative burden.

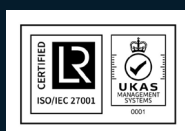

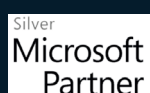

About ACOS

Prison Surveillance is one of nine ACOS modules:

- Communications Management
- Information in Confidence
- Intelligence
- Prison Surveillance
- Protected Persons
- Source Management
- Surveillance
- Technical Services Unit (TSU)
- Undercover

By using the complete suite, covert activity is managed end-to-end from a single central point, ensuring only those users with the right level of authority and clearance can see relevant data. With the ability to review, mark for retention or authorise for disposal, ACOS ensures adherence with record and product management guidelines.

ACOS is currently used by law enforcement in the UK and internationally, helping them manage covert operations effectively, discreetly, and securely while complying with regulations, policy, legislation and best practice procedures. Because of its modular design, ACOS can be easily tailored and scaled depending on organisational needs.
