- The shared cloud hosting is not assured.
- Dedicated cloud hosting can be assured up to OFFICIAL-SENSITIVE, including threat assessment against IS1 and IS2, InfoSec assessment and IT Health Check (ITHC). Please discuss your needs with 3SL.
- An extra charge will apply per user per month for under 10 users. These charges are greater for smaller numbers of users. They are required to allow third party hosting charges to be spread across low numbers of users.

All cloud charges include hosting, third party and Cradle software licences, and 3SL monitoring and management of the environment. The setup / on-boarding charge is a once-only charge to build and configure the SaaS environment and to support the information assurance activities related to the assessment of the SaaS by the customer (such as, but not limited to, IT Health Check (ITHC) and threat assessment against IS1 and IS2, penetration testing and InfoSec architecture assessments). All 3SL SaaS environments are compliant with TCoP, NCSC and OWASP requirements.

3SL support for, assistance with, response to, and implementation of, the recommendations made by, any ITHCs that the customer may require once the environment is operational will be charged separately.

2 3SL Labour Categories

The labour categories for 3SL staff who may provide 3SL's Cloud Support services are:

Table 2: 3SL Labour Categories	
Engineer	Fully knowledgeable in Cradle operations and able to perform work in Cradle unattended
Senior Engineer	As Engineer but also able to advise on process definition and application in Cradle, to define operations to be performed by self and others, and to direct others
Principal Engineer	As Senior Engineer but also able to advise in the strategic approach to be used for the conduct of projects with Cradle, and the processes to be used by such projects

3 Training Service Rates

Table 3: Training Service Rates (£ ex VAT)
