£700	QA / Test Engineer / Test Manager
£700	Delivery Manager / Scrum Master (PMQ) / Programme Manager

How pricing is applied

The roles and rates used for each engagement will depend on the specific service, scope, and delivery phase.

For each service offering, Full Fat Things proposes a right-sized, outcome-focused team, rather than requiring buyers to assemble teams role-by-role.

This approach:

- reduces commercial and delivery risk

- simplifies supplier management
- supports faster mobilisation

Blended delivery team rates

For delivery-focused engagements, Full Fat Things can offer a **blended team day rate**, based on an appropriate mix of senior and delivery roles.

Typical blended rates range from **£900-£980 per day**, depending on team composition and duration.

Blended rates:

- provide cost certainty
- reduce the need for role-level optimisation
- reflect efficient use of senior expertise

Discounts and flexibility

Full Fat Things aims to provide strong value for money while maintaining high delivery quality.

Discounts may be available in the following circumstances:

- longer-term engagements or higher-volume call-offs
- blended delivery teams
- where Full Fat Things delivers an initial discovery followed by subsequent delivery phases
- simplified governance or reduced delivery overhead

Any discounts are agreed at call-off stage and documented transparently.

Prices quoted are exclusive of VAT in British Pounds Sterling, and are subject to VAT at the prevailing rate in the UK at the time of invoice.
