

Beespace

Beespace develops intuitive software and intelligent hardware that make building management simpler, smarter and more sustainable. The simple to install solution provides powerful analytics that deliver real savings.

Features

- Data from IoT sensors/gateways – temperature, light, occupancy, humidity
- Hive platform spots patterns and tracks energy use and usage
- “Laura” AI analyst providing chat driven insights
- Dashboard visualization in clean and intuitive user interface
- Insights support to drive actionable changes
- Integration into building management and other systems
- Extensive support for data insight and integration
- Extensive support for driving practical value from the data

Benefits

- Simpler, smarter and more sustainable building management
- Evidence base that creates actionable changes
- Real time understanding of how your building works
- Cost-effective solution that quickly pays for itself.
- Energy, services and space cost savings
- Live data and rapid reporting
- Toolset and playbooks for using data to manage buildings better
