PEN TESTING AS A SERVICE

THREAT **READY**

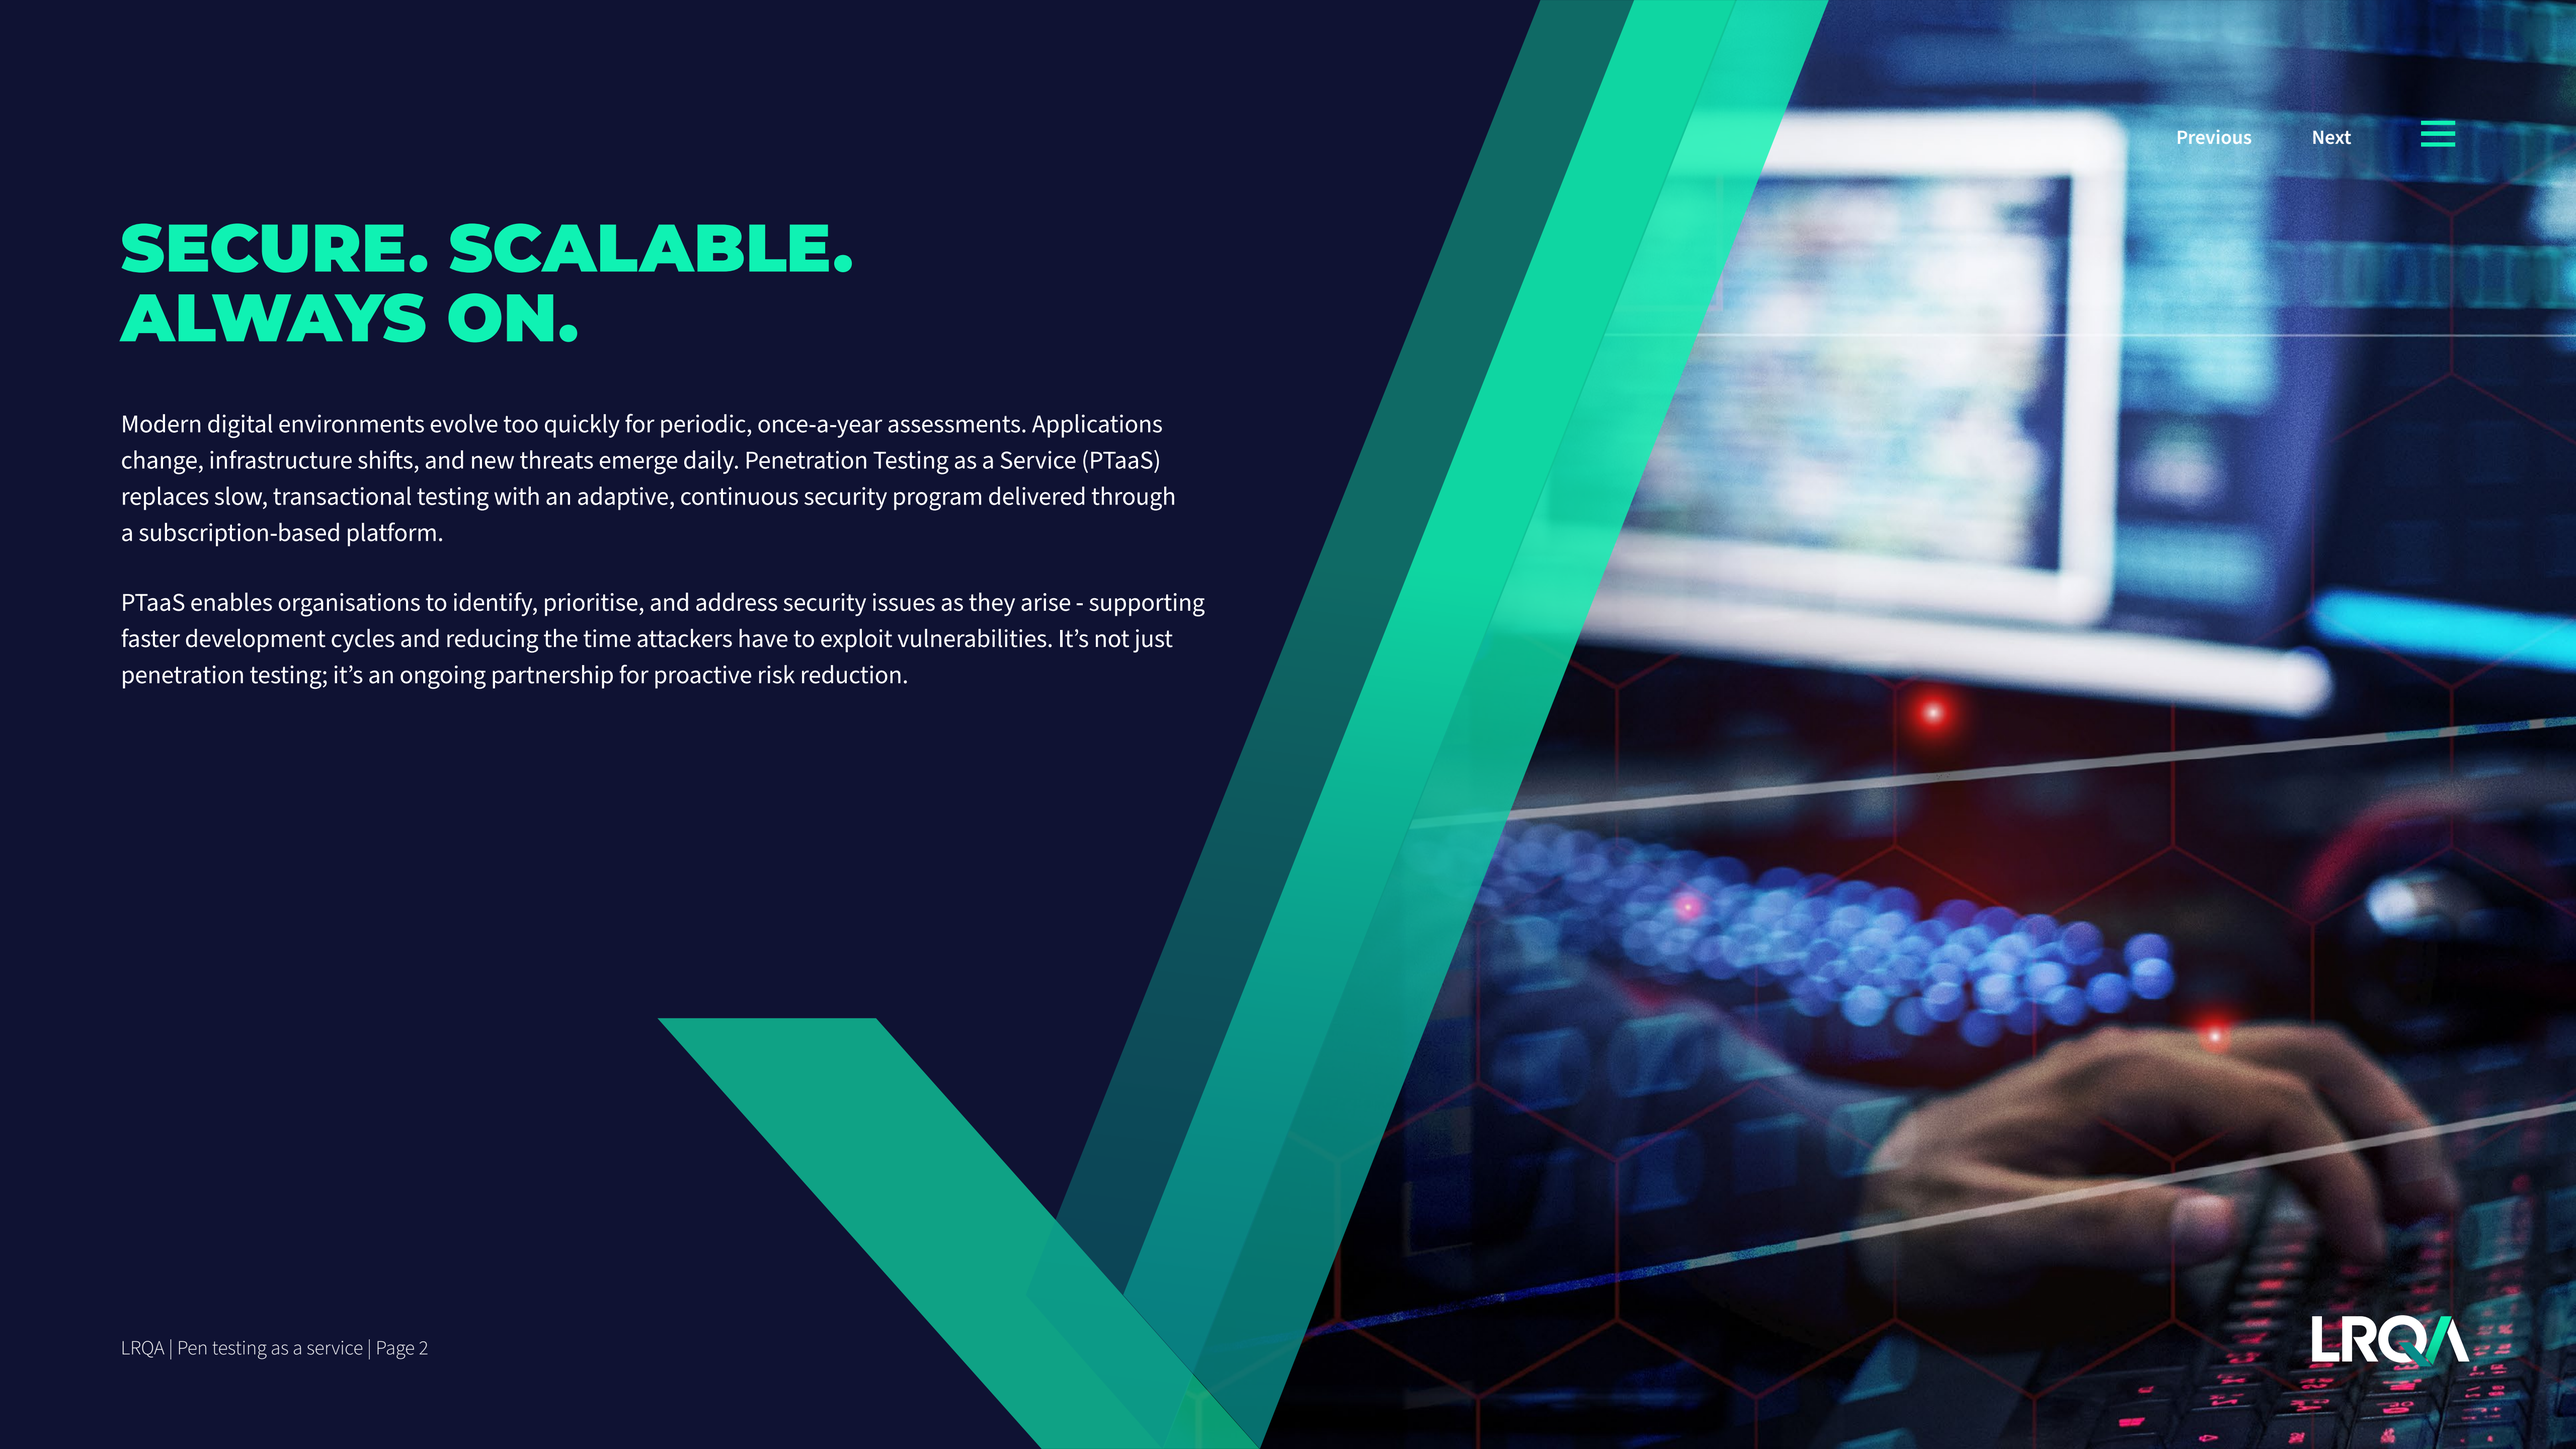

LRQA

Your Risk Management Advantage

SECURE. SCALABLE. ALWAYS ON.

Modern digital environments evolve too quickly for periodic, once-a-year assessments. Applications change, infrastructure shifts, and new threats emerge daily. Penetration Testing as a Service (PTaaS) replaces slow, transactional testing with an adaptive, continuous security program delivered through a subscription-based platform.

PTaaS enables organisations to identify, prioritise, and address security issues as they arise - supporting faster development cycles and reducing the time attackers have to exploit vulnerabilities. It’s not just penetration testing; it’s an ongoing partnership for proactive risk reduction.

WHAT MAKES PTAAS DIFFERENT?

Always ready
Launch assessments within days, no long scheduling queues or rigid timelines.

Continuous Assurance
Maintain visibility into security posture throughout the year, not just at audit time.

Agile & Scalable
Support for multiple applications, APIs, cloud environments, and infrastructure, with the flexibility to test as your environment grows.

Real-Time Insights
Findings appear as they're discovered, enabling rapid triage and remediation.

Modern Delivery
A platform-driven model that streamlines communication, tracking, and reporting.

KEY FEATURES

Automation-First Delivery
Leverages automation and AI-driven augmentation to accelerate testing workflows while preserving expert oversight.

Dedicated Expert Testers
Access to experienced penetration testers with diverse backgrounds - including web, mobile, cloud, network, and infrastructure specialties.

Self-Service Scoping
Define and initiate tests through a guided, intuitive interface without waiting on manual coordination.

Unlimited Retesting
Validate remediation efforts at no additional cost, ensuring vulnerabilities are fully resolved.

Integrated Workflows
Connects with collaboration and ticketing tools such as Slack, Microsoft Teams, and common issue-tracking systems for seamless remediation.

Centralised Reporting
Consolidated dashboards for findings, trends, and historical results, improving governance and oversight.

BENEFITS FOR YOUR BUSINESS

Reduce Risk Faster

Shorten exposure windows by identifying and resolving issues quickly.

Stay Ahead of Compliance

Continuous testing supports ongoing audit readiness and evolving regulatory requirements.

Boost Agility

Align security with DevOps and product release cycles without slowing innovation.

Improve Developer Efficiency

Clear, actionable guidance helps teams address vulnerabilities with less rework and fewer delays.

Simplify Security Management

One platform, one workflow - centralised insights that reduce administrative overhead.

THE PTAAS ADVANTAGE

Traditional penetration testing is often slow, static, and limited to fixed windows in time. PTaaS modernises this approach by combining expert-led testing with automated efficiencies and real-time delivery. The result is a faster, more flexible, and more transparent security capability built for today's dynamic enterprise environments.

PTAAS ISN'T JUST A BETTER WAY TO TEST, IT'S A SMARTER WAY TO SECURE YOUR DIGITAL ECOSYSTEM

ABOUT LRQA

LRQA is a leading global risk management partner.

Through our connected risk management solutions, we help you navigate an evolving global landscape to keep you one step ahead.

From certification and cybersecurity, to safety, sustainability and supply chain resilience, we work with you to identify risks across your business. We then create smart, scalable solutions, tailored to help you prepare, prevent and protect against risk.

Through relentless client focus, backed by decades of sector-specific expertise, data-driven insight and on-the-ground specialists across assurance, certification, inspection, advisory and training, we support over 61,000 organisations in more than 150 countries.

LRQA – Your risk management advantage.
