DIGITAL FORENSICS AND INCIDENT RESPONSE (DFIR)

Our Digital Forensics and Incident Response (DFIR) services enable organisations to effectively detect, respond to, and recover from cybersecurity incidents.
Delivered by CREST-accredited experts, our service provides rapid response, in-depth forensic investigation, and post-incident analysis - helping you minimise impact, restore operations quickly, and strengthen resilience against future threats.

By partnering with LRQA, you gain access to a comprehensive incident response capability, ensuring:

- Rapid containment and eradication of active threats
- Preservation and analysis of critical digital evidence
- Informed decision-making through expert forensic insights
- Long-term improvement of cyber resilience

CREST INCIDENT MANAGEMENT
Incident Response

Assured Service Provider
in association with National Cyber Security Centre
Cyber Incident Response: Standard Level

CORE SERVICE COMPONENTS

Forensic Investigation

We conduct in-depth forensic investigations to identify the source, scope, and impact of a cyber incident. Our experts utilise advanced tools and methodologies to examine digital evidence, including data from compromised systems, network logs, and other digital artefacts, providing a clear picture of the attack.

Data Preservation and Collection

Our experts ensure the integrity of digital evidence by following strict chain-of-custody protocols. We collect and preserve data from affected devices, servers, and networks in a forensically sound manner, maintaining the evidence's integrity for legal or internal purposes.

Malware Analysis

We analyse malware and other malicious code to understand their behaviour, entry points, and impact on your systems. This analysis helps in identifying vulnerabilities exploited during the attack and aids in developing effective countermeasures.

Incident Reconstruction

Our experts reconstruct the timeline of the cyber incident, detailing how the attack unfolded and identifying the attacker’s actions. This helps in understanding the full extent of the breach and assists in the development of more robust defences.

Expert Witness Services

When needed, our forensic specialists can provide expert witness testimony in legal proceedings, offering professional insights and presenting digital evidence in a clear, comprehensible manner to support your case.

Post-Incident Forensic Analysis

After containment and remediation, our team conducts post-incident forensic analysis to identify any remaining threats and provide recommendations for preventing future incidents. This includes a detailed review of the incident to uncover any overlooked aspects and ensure comprehensive recovery.

Key Benefits

- **Rapid Response:** Immediate containment and investigation by certified DFIR experts.
- **Forensic Integrity:** Evidence collected and preserved to legal standards.
- **Comprehensive Insight:** Full visibility into attack vectors and impact.
- **Resilience Improvement:** Actionable recommendations to prevent future incidents.
- **Trusted Expertise:** Delivered by CREST-accredited professionals with proven experience in critical sectors.

ABOUT LRQA

LRQA is a leading global risk management partner.

Through our connected risk management solutions, we help you navigate an evolving global landscape to keep you one step ahead.

From certification and cybersecurity, to safety, sustainability and supply chain resilience, we work with you to identify risks across your business. We then create smart, scalable solutions, tailored to help you prepare, prevent and protect against risk.

Through relentless client focus, backed by decades of sector-specific expertise, data-driven insight and on-the-ground specialists across assurance, certification, inspection, advisory and training, we support over 61,000 organisations in more than 150 countries.

LRQA – Your risk management advantage.
