SUPPLIER / THIRD PARTY RISK MANAGEMENT

THREAT **READY**

LRQA

Your Risk Management Advantage

IDENTIFY. ASSESS. MONITOR.

Your organisation is only as secure as its weakest link. As supply chains grow more complex and interconnected, reliance on third parties introduces “blind spots” where significant cyber and operational risks can hide.

LRQA provides a comprehensive Third-Party Risk Management (TPRM) service. We move beyond simple questionnaires to deliver data-driven segmentation, rigorous vendor assessments, and on-site validations where critical.

We enable you to clearly visualize risk across your entire supplier ecosystem. By identifying high-risk vendors early, you can enforce security standards, ensure compliance (e.g., GDPR, ISO 27001), and prevent supply chain breaches before they impact your business.

Our approach supports continuous monitoring, allowing you to react immediately if a supplier’s risk posture changes due to a cyber incident or operational failure.

SERVICE PRINCIPLES

RISK BASED SEGMENTATION

We categorize your vendors based on inherent risk (e.g., access to sensitive data, criticality to operations). This ensures you focus resources on third parties that pose an actual threat, rather than treating everyone the same.

VERIFICATION, NOT JUST TRUST

Self-assessments are often optimistic. We validate vendor claims through evidence-based auditing and, where necessary, skilled security testing. We look for proof that controls are effective, not just present on paper.

LIFECYCLE ASSURANCE

Managing third-party risk is an ongoing cycle, not a one-off gate. We support you from initial due diligence and onboarding through to ongoing performance monitoring and secure offboarding.

OUR APPROACH

Supplier Profiling & Triage

We work with you to map your supply chain and apply a rapid triage process. This filters your vendor base to identify “Critical” and “High Risk” partners who require deeper scrutiny versus those suitable for light-touch management.

Deep-Dive Assessments

For your most critical vendors, our consultants conduct detailed security reviews aligned with recognised standards. We interview their teams, review architectural diagrams, and audit their control environments.

Remediation & Reporting

We don’t just hand you a list of problems. We act as an extension of your team to explain findings to suppliers and drive remediation. We provide you with a clear “Risk Scorecard” for each vendor, empowering you to make informed procurement and partnership decisions.

ABOUT LRQA

LRQA is a leading global risk management partner.

Through our connected risk management solutions, we help you navigate an evolving global landscape to keep you one step ahead.

From certification and cybersecurity, to safety, sustainability and supply chain resilience, we work with you to identify risks across your business. We then create smart, scalable solutions, tailored to help you prepare, prevent and protect against risk.

Through relentless client focus, backed by decades of sector-specific expertise, data-driven insight and on-the-ground specialists across assurance, certification, inspection, advisory and training, we support over 61,000 organisations in more than 150 countries.

LRQA – Your risk management advantage.
