How The Service Works

Project Management and PMO resources, or technical resources for IT change delivery can be supplied via this service.

Your APPtechnology account Director will work with you to understand the remit of your project requirements, and based on previous ManagementStudio driven project activity define the roles and responsibilities required to complete your project delivery team.

APPtechnology can assist with Oversight and Governance, Project Management, administration technical delivery resources to help you deliver your projects faster, with less overall effort, lower risk, and with minimal user or business impact.

Exit Costs

Provided that the services terminate at the end of an agreed term, in line with the terms and conditions, there are no specific exit costs.

About APPtechnology

APPtechnology is a leader in digital transformation services, covering project and BAU delivery for large organisations in the UK, Europe and Globally.

We supply flexible teams specialising in Modern Workspace delivery, covering Endpoint Management, Security, Data protection, End User Experience management and technology migrations. We also provide and support delivery of technology solutions covering Legacy application management, and Compliance automation for NIS, ISO, CIMA, DORA and HIPPA Frameworks.

Entirely managed from the UK, we bring experienced governance to all statement of work based delivery, incorporating measurable performance metrics and results analysis in our regular reporting. Where qualified resource supply only is requested we provide models for inside and outside of IR35 payroll, as appropriate to the role and delivery method.

We supply G-Cloud services to the largest (96,000 users) and the smallest local and central government departments and larger NHS accounts.
