Software and Services Overview

Senteon Software eliminates the risks of default configurations, misconfigurations and security drift by delivering Zero Trust Configurations and enforcing CIS and regulatory standards across every workstation, server, and browser automatically and continuously. No more manual fixes. No more sleepless nights before an audit.

Changes to cyber compliance frameworks are updated in the Solution and available for Pilot or distribution. Frameworks covered include NIST SP 800-53 and -171, NIST CSF 1.1, CMMC 2, HIPAA, PCI DSS, SOC2, MITRE ATT&CK, DORA, ISO 27001, CIS and Cyber Essentials.

APPtechnology, in addition to being an authorised reseller for EMEA, can provide Professional services to assist your CISO Team to implement, rollout and monitor compliance drift.

Features

Service features include:

- Set, monitors and enforces security settings for multiple cyber frameworks
- Automatically remediates configuration drift on Devices and Browsers
- Senteon enforces multiple security baseline standards
- Easy to provide Proof of Concept environment
- Easy to demonstrate non-compliance across a sample of your endpoints
- Senteon provides the continual reporting on improvements required for DORA
- Frameworks include CIS, NIST, DORA, SOC2, HIPAA, ISO27001
- Enforce Cyber Essentials and CE Plus configurations
- Maintains Audit readiness and reporting
- Enables rollback to previous configurations to remove rollout risk

Benefits

Service benefits include

- Reduce Risk of non compliance by automating drift remediation
- Streamline multiple compliance workloads
- Simple to demonstrate, fast to implement
- First device compliance reports within one hour of implementation

- Allows different compliance settings for different user and device groups
- Management of drift is as important as achieving initial compliance
- enforce AI restrictions in browsers to maintain data retention
- Discounts for annual subscriptions

How The Software and Services Works

Most tools stop at reporting problems. Senteon is the only platform that automates regulated hardening with Zero Trust Endpoint Configurations fixing and enforcing misconfigurations automatically so you stay compliant, secure, and audit-ready.

Senteon is provided as an Azure Enterprise Application, with distributed clients reporting back to the administration portal. From there configuration drift can be monitored and remediated, either automatically or subject to authorised approval.

The Software is available directly to Customers or managed and monitored by APPtechnology in a Managed Service Provider service.

Custom configurations can be implemented and maintained, covering client bespoke configurations.

Services can include daily or weekly administration, compliance report generation, executive reporting, escalation management and managed service provider solutions to meet the needs of your Business.

Pricing

Software

Senteon Monthly SaaS – List price of £2.00 per user per month

Number of devices (up to)	Price per device per month
2,000	£2.00
7,500	£1.90
10,000	£1.84
15,000	£1.84
20,000	£1.80
30,000	£1.76
40,000	£1.74
50,000	£1.72
60,000	£1.70
70,000	£1.68

80,000	£1.66
90,000+	£1.62

Further discounts may be available with combined Software and Services negotiations.

Services

Services pricing is dictated by a combination of resource experience required and the delivery requirements, but are based on Government Digital and Data Profession Capability Framework pricing for Data Engineering.

Maximum G-Cloud day-rates are shown, specific services may use lower rates due to economies of scale, service discounts or locations

About APPtechnology

APPtechnology is a leader in digital transformation services, covering project and BAU delivery for large organisations in the UK, Europe and Globally.

We supply flexible teams specialising in Modern Workspace delivery, covering Endpoint Management, Security, Data protection, End User Experience management and technology migrations. We also provide and support delivery of technology solutions covering Legacy application management, and Compliance automation for NIS, ISO, CIMA, DORA and HIPPA Frameworks.

Entirely managed from the UK, we bring experienced governance to all statement of work based delivery, incorporating measurable performance metrics and results analysis in our regular reporting. Where qualified resource supply only is requested we provide models for inside and outside of IR35 payroll, as appropriate to the role and delivery method.

We supply G-Cloud services to the largest (96,000 users) and the smallest local and central government departments and large NHS accounts.
