Service Overview

With the exponential adoption of Power Platforms many organisations are;

- *struggling to develop in time to realise the savings*
- *suffering a backlog of requests*
- *learning as they go – bad habits increasing downstream costs*

This service provides **end to end application build** (power apps, power automate, Power BI) from concept to deployment Ready. We undertake all interviews with sponsors to capture functionality and expectations, manage the build and test process and keep you involved with the project whilst we do the heavy lifting.

This enables rapid deployment, improved user experience, consistent standards. The service is 'on demand' so whether you need a single solution or a team to clear a backlog of requests you use as required.

Features

- Use as required
- Expertise on demand (power apps, power automate, Power BI)
- From a single app to a large backlog
- Remote service or onsite
- Follow agile delivery method
- SC cleared

Benefits

- Maintain output through holidays or busy teams
- Use as required – ramp up ramp down in real time
- Trained and experienced consultants pass on knowledge to your team
- Clear outstanding backlogs

Pricing

Each application is unique. We will conduct a scoping call to define a rough order of magnitude (ROM). This will estimate;

1. the number of sprints required
2. the duration to arrive at a bare bones working version of the application feature enhancements will add to this time
3. the team makeup. Complex applications may be written with (say) an architect and 2 developers. Simple applications may require just 1 developer

Phase	Skills	Remote	Onsite
Power Platform Architect	Works with your sponsor to capture requirements Identifies technical hurdles Works with your teams to overcome technical hurdles Writes the Sprint document Assists developers	£925 /day	£975 /day
Power Platform Developer	Follows guidance from our Architect Builds sprint to specifications Literate across: Power Apps, Power Automate, Power BI, Dataverse Can be remote	£715 /day	£765 /day

Companion Services

You can also procure via G-Cloud the following Power Platform related services.

Centre of Excellence – design, build and handover

We provide a 5 phase programme to assess, design, pilot, build, educate and handover your Centre of Excellence (CoE) to latest standards. This contained solution is the **fastest way to adopt**, govern and scale the Microsoft Power Platform whilst saving time **avoiding common pitfalls** of self-implementation.

We empower your business users (citizen developers) to innovate rapidly while ensuring IT maintains control, security and compliance.

Power Platform Professional Services

This provides you access to our skilled and experienced team. **You manage their workloads and they bring the experience** to work alongside your team and provide valuable knowledge handover.

This enables rapid deployment, improved user experience, consistent standards. The service is 'on demand' so whether you need a single solution or a team to clear a backlog of requests you use as required. These roles are inside IR35.

Exit Costs

Provided that the services terminate at the end of an agreed term, in line with the terms and conditions, there are no specific exit costs.

About APPtechnology

APPtechnology is a leader in digital transformation services, covering project and BAU delivery for large organisations in the UK, Europe and Globally.

We supply flexible teams specialising in Modern Workspace delivery, covering Endpoint Management, Security, Data protection, End User Experience management and technology migrations. We also provide and support delivery of technology solutions covering Legacy application management, and Compliance automation for NIS, ISO, CIMA, DORA and HIPPA Frameworks.

Entirely managed from the UK, we bring experienced governance to all statement of work based delivery, incorporating measurable performance metrics and results analysis in our regular reporting. Where qualified resource supply only is requested we provide models for inside and outside of IR35 payroll, as appropriate to the role and delivery method.

We supply G-Cloud services to the largest (96,000 users) and the smallest local and central government departments and NHS accounts.
