

Asckey Data Services Ltd
G-Cloud 15 Pricing Document
Revision: 1.2
Date: December 2025

1. fmfirst® product suite

Our fmfirst® is a comprehensive facilities management and compliance software suite. The applications can be used independently, integrated with each other, or integrated with third-party systems, enabling you to build your own comprehensive toolkit. Full details on each of the modules and their features can be found in the Service Specification Document.

2. Pricing

Please note the following for the pricing listed below:

- All prices are ex. VAT.
- Other licence/device quantities are available.
- Minimum licence term is 12 months invoiced annually in advance.
- Longer term contract discounts are available.
- Discounts available if more than one product is purchased.
- During user implementation and testing, short term additional licences can be made available free of charge.

fmfirst® Estates

This application is our web-based Computer-Aided Facilities Management (CAFM) system which has evolved over many years to support the various and growing requirements of the FM world.

No. of concurrent user licences	Price per month
5	£1,205.00

Optional modules are available at additional cost:

fmfirst® Estates optional modules	5 user prices per month
Additional concurrent user licence	£295.00
Mobile Management (5 user)	£145.00
Asbestos Management	£295.00
Legionella Management	£295.00

Consultancy & Services	
Onsite consultancy per day*	£1,250.00
Remote system configuration	£850.00
System customisation/bespoke work	£995.00
System integration (e.g.: SFG20/Facilities iQ, Zetasafe, 3 rd party Audit tools)	Price on application

Notes:

- A 'day' assumes 6 – 8 hours on-site during weekdays.
- Discounted multiple day tailored packages available on request.
- All prices include expenses but exclude VAT.

Implementation	
System implementation and data load installation	£3,900.00

fmfirst® Tasking

fmfirst® Tasking is our cloud-based facilities management application that aims to streamline facility management operations.

With fmfirst Tasking® users can easily create defect and planned work and manage and report on tasks in just a few taps. The reporting dashboards allow Facility Managers to identify trends in the data and opportunities to improve efficiencies. Users can build their own reports tailored to display a variety of results from overdue tasks, compliance passes/fails, time spent, etc.

No. of devices	Price per month
5	From £650.00
10	From £950.00
Client Portal	From £125.00
System integration (e.g.: SFG20/Facilities iQ, Zetasafe, 3 rd party Audit tools)	Price on application

fmfirst® Cleaning

Our cleaning audit application is designed to simplify and support the undertaking, reviewing, and reporting of the cleaning audit process. Its functionality speeds up the auditing process, increases productivity, reduces overall costs, and meets the compliance requirements of the National Standards of Healthcare Cleanliness 2025.

No. of devices	Price per month
5	£345.00
10	£550.00

fmfirst® Survey

This is our digital survey solution that can accommodate a wide range of topics. It provides the opportunity to build your own question sets; it collates and analyses the results and provides a one-stop-shop platform for all the data collected. This allows you to identify high-risk areas, trends, and areas of improvement.

No. of devices	Price per month
5	£325.00
10	£415.00

fmfirst® Portering

This application is designed to be a quick and simple digital tool for the creation and management of porter tasks for busy, on the go departments.

The system can allocate tasks automatically to individuals or multiple porters to support larger jobs. There is functionality to have definable skills sets for jobs meaning they can be allocated to the right person, saving time and resources.

No. of devices	Price per month
5	From £500.00
10	From £650.00
Portal (contractor access)	From £125.00

3. Consultancy and implementation

We have a successful implementation plan template that outlines all the touch points of the development of your software solution. Like a Gantt chart, it outlines the schedule for each stage of the project and should further requirements be identified, the chart is amended to reflect revised timescales.

We understand that system rationalisation is key for some clients. To support this, we have a formal documented process for transferring key legacy data into our system which helps to identify any gaps in the data enabling us to strengthen the data collection process.

To ensure we're offering value to our clients, we provide face to face training on using our software. Each software solution is given a training programme tailored to the needs of its users.

4. Contact details
