Cyber Security Leadership & Transformation

Description

Our Cyber Security Leadership and Transformation services enable you to achieve your organisational and business objectives using our pragmatic and proven risk aligned approach to deliver 'Digital Resilience' – the ability to enable the organisation, predicated on the assumption of compromise. We provide access to trusted cyber advisors, who can supplement the board by providing assurance to key decisions; CISO hiring, security investments, strategy and operating model design. CISO Support aids with key activities, knowledge sharing, coaching and mentoring to support the security leader in being successful.

Features

- Interim/Virtual CISO: Expert cybersecurity leader for transformation, crisis management, coaching
- Board Advisory: Advisor to core board members, including risk management
- Cyber Rapid Value Acceleration: Impactful services for new CISO/strategic refresh
- Cyber budget/ROI benchmarking: Including peer review
- Cyber Maturity Assessments: Broad or topic specific review with roadmap
- Crisis Simulation: Deliver bespoke cross-functional understanding and relationships via role-play

Benefits

- 'Digital Resilience' as a cybersecurity goal, functionally aligned organisational objectives
- Security will be a risk-aligned business enabler and partner
- User/data focus, emphasis on ability to detect, respond and recover
- Manage clear risk-appetite, measurable business return-on-security-investment
- Security capability maturity aligned, measured and managed providing stakeholder confidence
- Executive leadership, C-level and/or Board culturally own and drive security

Our Approach

This section gives a brief overview of our project approach that can be adapted depending on how you would like us to support you. We understand that there is no one-size-fits-all approach to Cyber Security Leadership & Transformation services.

Insights

During the Insights phase, we aim to understand your current situation, your challenges and desired outcomes. We will hold meetings with senior stakeholders to gain understanding on business objectives, operations and wider strategies. We will work with incumbent security leaders and the Board to understand how strategies and operations are being delivered, how they were conceived and if any challenges have presented themselves. Following this, we will present our findings on the current state of security leadership within the business, and how security leadership is contributing to the overall business outcomes.

Plan

In the planning phase, we will work with you to agree the next steps following the discovery phase. During this stage, we will work together to develop a delivery plan. The plan will include an agreed approach, a list of key stakeholders, details of deliverables and agreed timescales.

Deliver

We will work with you to deliver the outlined initiatives to improve the effectiveness of security within the Board and organisation. This may involve a mix of shorter-term deliverables and longer-term objectives that tie into your security programme strategy.

Review

This phase typically includes Project Reviews as well as capture, tracking and reporting of the benefits measured as agreed during the planning phase. The reporting associated drives subsequent change and adoption activities in response to any poorly performing benefit. Any issues identified during this stage are captured in a forward plan and addressed subsequently.

Long Term Support

We will provide ongoing oversight, delivery and reporting of the security programme, and lead on agreed discreet activities and initiatives to accelerate security improvement drawing on the wider FSP team as appropriate. We can also continue to attend board meetings to support the board in the delivery of security initiatives.

About FSP

Enterprise Transformation delivered through integrated capabilities

FSP is a leading, trusted transformation partner helping organisations modernise, secure and scale with confidence. Through integrated Data & AI, Cyber Security, Cloud and Change Delivery capabilities, we enable organisations to unlock tangible value, turning strategy into action, and innovation into measurable outcomes.

Our success is underpinned by an unwavering commitment to excellence, a people-centric culture, and best-in-class operations that deliver sustainable results. As a long-standing and highly accredited Microsoft Solutions Partner, with designations across Digital & App Innovation, Modern Work, Security, and Data & AI, we work alongside clients as one team to drive meaningful, lasting change.

We navigate the complexities of data sensitivity, confidentiality, governance and compliance with deep expertise, blending strategic insight with engineering-led delivery to meet the most demanding requirements across highly regulated sectors. Our security and quality credentials, including ISO27001, ISO9001, ISO20000, ISO14001, Cyber Essentials Plus, CREST-approved penetration testing and SOC capabilities, give clients complete confidence in resilience, maturity and operational integrity.

FSP is proud to have been recognised by Best Companies™ as a 3-star 'World Class' workplace (the highest level of accreditation) in 2022, 2023 and 2024, and to have been ranked as No.1 in the UK, No.1 in the South-East (Regional League Table) and Top 5 in the Technology sector. FSP has also been recognised three times as No.1 Best Workplace™ in the UK by Great Place to Work®.

Below is a detailed overview of the services and solutions we provide:

OUR CORE CAPABILITIES BY BUSINESS UNIT

DATA & AI

Data Discovery & Strategy

Data Management

Data Engineering

Data Products

Data Analytics

AI Strategy

AI Engineering

Microsoft AI

Change & Culture

Responsible AI

CYBER SECURITY

Advisory

WHY FSP

Strategy and Change Through Delivery

A holistic, end to end approach to solving client challenges, guiding organisations from strategic planning to successful implementation. As a trusted partner driving transformation, optimised operations and resilience.

Deep Expertise of Offerings and Vendor Independent

Comprehensive solutions across digital strategy, cybersecurity, AI, cloud and data, enabling clients to meet diverse needs through a single trusted partner.

Extensive Experience in Regulated Environments

ISO27001, ISO9001, ISO2000, ISO14001 certifications, along with CREST-approved penetration testing and SOC capabilities, demonstrate a commitment to the highest standards of security and quality. Extensive experience & people security cleared to work in highly regulated and secure environments.

World Class Culture

Multi-award-winning workplace that promotes innovation, collaboration and excellence. Our people-first culture ensures that our team members are motivated, engaged and empowered to deliver their best work.

Best in Class Client Experience

Consistent high NPS scores and externally evidenced at +83. Providing positive experiences that drive long term loyalty and growth, which elevates our client experience to world class standards.

Industry Leading Operations

Operational excellence ensuring scalable, efficient and sustainable delivery. This enables growth, reduces costs and enhances agility, whilst empowering organisations to adapt quickly to market changes.

Our Purpose

Thrive & Succeed

Enable people and organisations to thrive for a successful future

Always Human

Role model human and responsible leadership

Future Impact

Actively contribute to a sustainable future

Unite & Inspire

Unite people and inspire future generations

Our Values

True Belonging

Demonstrating fairness, compassion and empathy

Ensuring a supportive and inclusive environment

Respecting everyone for being themselves

Excellence Everywhere

Operating with pace and consistent high standards

Driving continuous improvement and innovation

Delivering remarkable experiences and interactions

Creating Opportunity

Prioritising mutual success, growth and win-win for everyone

Engaging and impacting our communities

Committing to continuous learning and challenging ourselves

Client Feedback

Major Defence Contractor

"I would like to double down on the statement that they deliver, they are rocksteady, they do what they say they will do, and they are always a pleasure to work with." – *IT Manager*.

Defence Organisation

"FSP impressed me from the very beginning in terms of their approach, knowledge, expertise and output. They are a very versatile organisation with good subject matter expertise and service delivery." – *Head of Programme Management*.

"I have nothing short of a perfect experience working with FSP. The workforce has partnered with me to deliver exceptional service and products to benefit our firm. FSP deliver a stellar service that embeds themselves within the department seamlessly, to the extent that the assumption is they are employees of the firm. They go above and beyond expectations and have personally assisted me in understanding technology offerings." – *Dominic Rodney, Business Relationship Manager*.

Financial Services Organisation

"FSP continually demonstrate experience and value by providing guidance during the process on best practice. The team are always on hand to support the process, and the feedback from the portfolio companies is always very positive. They are always consummate professionals and deliver on their commitments." – *Chief Technology Officer*.

"FSPs strengths are that feeling of partnership, we worked well collaboratively, and I could feel that. They were always approachable." – *Group Digital Workplace Manager.*

"We have been delivering a multi-year digital transformation programme across all aspects of our organisation, moving to a cloud-native architecture and undertaking a complete application transformation. FSP worked with us to define our vision, plan our programme and have been our strategic delivery partner providing invaluable expertise and commitment." – *Head of IT & Transformation.*
