Pentesting and Cyber Protection Services

Description

FSP has an experienced Attack Simulation Team offering a wide range of Pen Testing services for all of your organisational needs. All simulations provide actionable recommendations, and we can help your business by providing Cyber protection services for the cloud if you cannot remediate the risk yourself.

Features

- Assessment conducted by CREST certified specialists
- Vulnerability scanning and management
- Web Application Penetration Testing and post testing assistance
- Assessment of cloud services security
- Internal network service analysis
- Perimeter review
- Assignment scope tailored to customer requirements
- Ad-hoc or routine Pen Testing based on the current circumstance
- ISO 9001 and 27001 certified by UKAS
- Cyber Essentials Plus & CREST Penetration Testing and SOC Certified

Benefits

- Understand true business risks that expose your organisation
- A detailed report with full walk-through
- Highlight risks of data exposure
- Full management from assessment to post testing support
- Provide architectural view of the business cyber security
- Application of advice based on cross-industry expertise
- Pragmatic advice on risks associated with vulnerabilities
- Tailored remediation advice with solutions designed for your organisation
- Solutions to stop Cyber Attacks
- Delivered by an accredited Microsoft Solution Security Partner and Microsoft Cloud Security Specialist

Our Approach

It seems that on a daily basis, there are public announcements of the latest organisation that has fallen victim to a catastrophic or near catastrophic cyber-attack. With this comes increased pressure from regulators, the loss of customer confidence and damage to the brand affected, all of which could often be entirely avoided with the appropriate controls. Our consultants, whose experience spans all major standards and frameworks, have extensive experience protecting, detecting and responding to all types of malicious adversary.

Our goal is to protect your brand and ensure that you can continue to thrive as a business in an environment of increasing threats. Utilising our experience gained across global financial services companies, governmental departments, and military organisations, we will identify your cyber exposure and help you deploy resources effectively and efficiently to mitigate threats. In the ever-evolving digital landscape, staying ahead of cyber threats demands a dynamic approach. That's where we come in, pioneering a revolutionary cyber security capability that embodies the dual essence of attack and defence.

Defend: Protecting Your Digital Fortress

We can fortify your systems with cutting-edge defences, safeguarding your data, networks, and assets from malicious intrusions. Our experienced team employs advanced threat detection systems and proactive monitoring strategies to fortify your digital stronghold, ensuring its resilience against cyber threats.

Managed Detection and Response

FSP's Managed Detection and Response is an all-inclusive security service that combines advanced threat detection, incident response, and continuous monitoring to protect against cyber threats. We offer a proactive approach to security to help you monitor and report on security incidents. With a skilled team of security analysts and incident responders we aim to help you stay ahead of evolving threats by continuously optimising security controls.

Security Operations Centre

At FSP, we are proud to offer a modern Security Operations Centre (SOC) that combines advanced technology with expert human oversight. Our SOC utilises cutting-edge automation to swiftly detect incidents, ensuring rapid response times. Additionally, our highly skilled team is on hand to provide advanced expertise, promptly resolving any security challenges that arise. With our SOC solution, you can trust that your digital assets are in capable hands, protected by both advanced technology and human intelligence.

Attack: Your Strategic Offense

Defence alone is not enough in the relentless pace of cyber-attacks. We leverage our offensive capabilities to pre-emptively identify vulnerabilities within your infrastructure. By thinking like attackers, we uncover weaknesses before they are exploited, enabling you to proactively patch and reinforce your defences. Through controlled penetration testing and ethical hacking, we simulate real-world cyber threats to fortify your resilience.

Pen Testing and Red Teaming

FSP has an experienced Attack Simulation Team (Vulnerability Management, Pen Testing, Red Teaming) offering a wide range of Pen Testing services for all your organisational needs. All simulations have the stated goal of providing actionable and measurable recommendations that, if adopted, will materially reduce the risk of cyberattacks. We are accredited to provide Penetration Testing across Europe, Middle East and Africa (EMEA) by CREST.

Attack Surface Review

An Attack Surface Review (ASR) provides a company with an external view of the biggest risks to their organisation. Our tests simulate the information gathering undertaken by threat actors, who will be attempting to find routes of entry and vulnerabilities to gain unauthorised access to sensitive information or interrupt business operations.

Maximising Cyber Resilience: Purple Teaming

In addition to our core services, we also offer comprehensive purple teaming engagements. This collaborative approach involves both red team (offensive) and blue team (defensive) elements working closely together to assess and enhance your organisation's overall security posture. Through simulated attacks and meticulous analysis, we identify weaknesses in your defences, refine incident response procedures, and ultimately strengthen your resilience against evolving cyber threats.

As a Microsoft Partner, we have enrolled in their Cloud Solutions Partner (CSP) programme which allows us to manage your Microsoft licensing on your behalf. Microsoft tools can enhance the company's security posture through an integrated ecosystem, leveraging threat intelligence, and offering a comprehensive suite of security tools and services. We are an accredited Microsoft Solution Partner in Security, and we have obtained the Microsoft Cloud Security Advanced Specialisation. By capitalising on our Microsoft partnership, FSP can provide end-to-end solutions, from initial consultation and implementation to ongoing support and training, thereby delivering Microsoft services as a comprehensive and valuable offering to you.

About FSP

Enterprise Transformation delivered through integrated capabilities

FSP is a leading, trusted transformation partner helping organisations modernise, secure and scale with confidence. Through integrated Data & AI, Cyber Security, Cloud and Change Delivery capabilities, we enable organisations to unlock tangible value, turning strategy into action, and innovation into measurable outcomes.

Our success is underpinned by an unwavering commitment to excellence, a people-centric culture, and best-in-class operations that deliver sustainable results. As a long-standing and highly accredited Microsoft Solutions Partner, with designations across Digital & App Innovation, Modern Work, Security, and Data & AI, we work alongside clients as one team to drive meaningful, lasting change.

We navigate the complexities of data sensitivity, confidentiality, governance and compliance with deep expertise, blending strategic insight with engineering-led delivery to meet the most demanding requirements across highly regulated sectors. Our security and quality credentials, including ISO27001, ISO9001, ISO20000, ISO14001, Cyber Essentials Plus, CREST-approved penetration testing and SOC capabilities, give clients complete confidence in resilience, maturity and operational integrity.

FSP is proud to have been recognised by Best Companies™ as a 3-star 'World Class' workplace (the highest level of accreditation) in 2022, 2023 and 2024, and to have been ranked as No.1 in the UK, No.1 in the South-East (Regional League Table) and Top 5 in the Technology sector. FSP has also been recognised three times as No.1 Best Workplace™ in the UK by Great Place to Work®.

WHY FSP

Strategy and Change Through Delivery

A holistic, end to end approach to solving client challenges, guiding organisations from strategic planning to successful implementation. As a trusted partner driving transformation, optimised operations and resilience.

Deep Expertise of Offerings and Vendor Independent

Comprehensive solutions across digital strategy, cybersecurity, AI, cloud and data, enabling clients to meet diverse needs through a single trusted partner.

Extensive Experience in Regulated Environments

ISO27001, ISO9001, ISO2000, ISO14001 certifications, along with CREST-approved penetration testing and SOC capabilities, demonstrate a commitment to the highest standards of security and quality. Extensive experience & people security cleared to work in highly regulated and secure environments.

World Class Culture

Multi-award-winning workplace that promotes innovation, collaboration and excellence. Our people-first culture ensures that our team members are motivated, engaged and empowered to deliver their best work.

Best in Class Client Experience

Consistent high NPS scores and externally evidenced at +83. Providing positive experiences that drive long term loyalty and growth, which elevates our client experience to world class standards.

Industry Leading Operations

Operational excellence ensuring scalable, efficient and sustainable delivery. This enables growth, reduces costs and enhances agility, whilst empowering organisations to adapt quickly to market changes.

Our Purpose

Thrive & Succeed

Enable people and organisations to thrive for a successful future

Always Human

Role model human and responsible leadership

Future Impact

Actively contribute to a sustainable future

Unite & Inspire

Unite people and inspire future generations

Our Values

True Belonging

Demonstrating fairness, compassion and empathy

Ensuring a supportive and inclusive environment

Respecting everyone for being themselves

Excellence Everywhere

Operating with pace and consistent high standards

Driving continuous improvement and innovation

Delivering remarkable experiences and interactions

Creating Opportunity

Prioritising mutual success, growth and win-win for everyone

Engaging and impacting our communities

Committing to continuous learning and challenging ourselves

Client Feedback

Major Defence Contractor

"I would like to double down on the statement that they deliver, they are rocksteady, they do what they say they will do, and they are always a pleasure to work with." – *IT Manager*.

Defence Organisation

"FSP impressed me from the very beginning in terms of their approach, knowledge, expertise and output. They are a very versatile organisation with good subject matter expertise and service delivery." – *Head of Programme Management*.

"I have nothing short of a perfect experience working with FSP. The workforce has partnered with me to deliver exceptional service and products to benefit our firm. FSP deliver a stellar service that embeds themselves within the department seamlessly, to the extent that the assumption is they are employees of the firm. They go above and beyond expectations and have personally assisted me in understanding technology offerings." – *Dominic Rodney, Business Relationship Manager*.

Financial Services Organisation

"FSP continually demonstrate experience and value by providing guidance during the process on best practice. The team are always on hand to support the process, and the feedback from the portfolio companies is always very positive. They are always consummate professionals and deliver on their commitments." – *Chief Technology Officer*.

"FSPs strengths are that feeling of partnership, we worked well collaboratively, and I could feel that. They were always approachable." – *Group Digital Workplace Manager.*

"We have been delivering a multi-year digital transformation programme across all aspects of our organisation, moving to a cloud-native architecture and undertaking a complete application transformation. FSP worked with us to define our vision, plan our programme and have been our strategic delivery partner providing invaluable expertise and commitment." – *Head of IT & Transformation.*
