G-CLOUD 15 – CLOUD SUPPORT – SETUP & MIGRATION - TERMS AND CONDITIONS

OVERVIEW

Allan Webb provides expert setup and migration services to support your cloud-based solutions, focusing on asset management to reduce whole-life cost. Leveraging AI and data science, we accelerate the migration of legacy systems into secure cloud environments. We transition your business-critical solutions with precision, building a reliable foundation for future asset management.

SERVICE ELEMENTS

- Cyber Essentials Plus, ISO 9001, 14001, 20000 and 27001 certified.
- Migrating complex technical documentation into digital cloud formats.
- Specialist-led bulk data cleansing and Codification for migration.
- Implementation of custom cloud-based technical support software tools.
- High-volume document scanning for ingestion into secure cloud repositories.
- AI-driven automated data extraction and classification during cloud migration.
- Establishing digital Integrated Logistics Support (ILS/IPS) frameworks in cloud.
- Securely transferring safety or operationally critical data into cloud systems.
- Data loading for cloud-hosted obsolescence monitoring (IEC 62402:2007).
- Deployment of modular training packages for new cloud system users.

CALL OFF ORDER FORMS

Allan Webb Limited acknowledges that the Crown Commercial Service General Terms and Conditions govern this Framework Agreement and establish the overarching contractual foundation. However, we recognise that each Call-Off Order presents its own distinct operational requirements, technical specifications, and delivery parameters. Consequently, supplementary terms specific to each individual call-off will be bespoke to the individual requirements and therefore will be agreed and documented at the point of order placement, ensuring contractual provisions remain appropriately tailored to the precise scope, complexity, and performance obligations of that particular engagement whilst maintaining full compliance with the Framework's governing principles.

SERVICE LEVEL AGREEMENT

Noting the abovementioned complexities around the Allan Web Limited services and their bespoke nature, upon contract award, we will issue a comprehensive Service Level Agreement that defines performance standards, response times, escalation procedures, and key performance indicators. This agreement will establish clear accountability frameworks and measurable service commitments, ensuring transparency and enabling effective performance monitoring throughout the engagement lifecycle.

OFF- PAYROLL WORKING LEGISLATION (IR35)

All orders placed under this Framework Agreement will be assessed against the requirements of the Off-Payroll Working Legislation (IR35) to ensure full compliance in accordance with the current HMRC legislation, including any requirements which are flowed-down from the relevant Buyers through individual Call Off Orders.

AllanWebb

SUPPORTABILITY ENGINEERING

Our supportability engineers help you manage your project from start to finish, ensuring your systems remain supported and secure with solutions tailored to fit your business.

OBSOLESCENCE MANAGEMENT

We offer a complete portfolio of obsolescence management services – from statusing and monitoring, risk analysis and case management to capability development, training and consultancy. We give you the confidence to support your systems throughout their life and identify problems as early as possible.

CODIFICATION

NATO Codification is the primary means of item identification and management used internationally, establishing the common supply language for all logistics operations. It has vast benefits, which we've applied to a number of industries since our beginnings in 1960.

SUPPLY CHAIN AND LOGISTICS

From procurement to inventory management, we utilise our extensive expertise to ensure your supply chain operates as efficiently as possible. Our ILS/IPS services are applicable in both a military environment and the commercial world.

TECHNICAL DOCUMENTATION

No matter the industry, we can deliver the ideal documentation solution, including user guides, maintenance manuals and much more. However complex the product or service, we'll communicate the right information to your target audience in a clear and concise manner.

TRAINING

Through our Supportability and Obsolescence Subject Matter Experts, we've been delivering training support for decades. With specialised training in key areas and bespoke delivery services, you can ensure that your team is armed with the knowledge they need, wherever you're based.
