

Lantum Secondary Care: In-Check™ Compliance (formerly DRS)

Service Definition

DRS Compliance provides comprehensive clinical staff work scheduling functionality, ensuring full compliance with terms and conditions while automating rota management. The system checks staff schedules against individualised rotas, calculates pay and generates generic work schedules automatically, saving time for busy Human Resources teams.

Designed to meet the complex needs of NHS Trusts, DRS Compliance augments workforce planning, DRS Compliance also provides Exception Reporting functionality to maintain safe working hours, and significantly reduces the administrative burden on the Guardian of Safe Working.

Key Functionality:

- Design compliant work patterns in line with appropriate Terms and Conditions
- Calculate pay associated with work patterns
- Automated Generic & Personalised Work Schedule Creation
- Individualised work pattern creation tools
- Facilitate exception reporting to ensure prompt resolution and safe working hours
- Dashboard reporting for oversight and analysis
- Full customisation to meet organisational requirements

Key Benefits:

- Pre-emptive compliance: highlights potential rule breaches before they occur
- Reduces administrative workload for Guardians of Safe Working
- Supports specific contract assignments to influence staff management
- Enhanced version control for work patterns
- Exception reporting submissions via mobile app
- Tools for individualised work pattern creation
- Generates work patterns in a fraction of the time compared to traditional methods
