Project Management as a Service

stoneseed^{IT}

Is your IT Project Delivery a challenge? Are you struggling to find skilled resource?

Do you...

- Find yourself constrained by a conventional contract resource model?
- Need resources who can flex up and down as your project demands it?
- Struggle to keep costs contained and predictable?
- Find your project management capabilities lacking?
- Encounter the same issues and failure on successive projects?
- Lack business intelligence reporting or an effective Programme Management Office?

Improve your IT Project Delivery with PMaaS...

Stoneseed's Project Management as a Service (PMaaS) offers you access to Project Management resources and tools at a flexible and predictable cost via a fully structured managed service, underpinned by KPIs and SLAs.

A true end-to-end portfolio of services, from IT Technical Advisory/Architecture, Business Analysis and P3MO Services through to Programme & Project Delivery. We provide consultancy, assessments, governance and P3MO reporting tools to improve your delivery capability and performance.

Stoneseed's innovative on-demand resource model allows you to dial up and down IT project resources in sync with your delivery needs. With some reasonable planning, Project Management as a Service (PMaaS) provides access to a wide portfolio of project skills, made available against your demand schedule.

Why Stoneseed?

Stoneseed is a specialist Project Management Service Provider. We understand the dynamics of the project delivery market, delivering high-quality services and resources at a competitive cost.

A key part of our competitive advantage is that there is no minimum number of days or contract period. Projects may be one month to two years, 1 day per week or 5 days per week. This gives you the unique opportunity to improve the efficiency and cost effectiveness of your internal IT organisation, by delivering projects through a predictable managed service.

whether delivered locally or via cloud services, our teams are experienced across multiple technology solutions, sectors and industries (Private, Public and Charities). We work on all types of projects and programmes such as Business Change, Transformation, Infrastructure, Digital and IT Project Delivery,

Project Manager as a Service

Need a Project Manager? Whether you need access to single resources for a flexible time period or a fully managed service, we have a resource pool of Programme and Project Management specialists, who are all experienced practitioners from across the complete portfolio of project and programmes – in fact, anything with an IT flavour.

Our memberships and accreditations include PRINCE2, Project Management Institute, P3M3, Agile Project Management Certification and MSP. Experience gained from multiple sectors and industries means our clients benefit from a practical, hands-on approach to programme and project delivery that works.

Business Analysis as a Service

Whether it is production of a business case for an IT project, requirements gathering or data analysis to help with project implementation, we can supply BA expertise and resources.

BAaaS (Business Analysis as a Service) can be tailored to your specific requirement.

Stoneseed's BA team are experienced with all types of projects and programmes such as Business Change, Transformation, Infrastructure, Digital or IT Project Delivery.

Technical Advisory Services

Stoneseed's Technical Advisory Service provides support for CEOs and CIOs looking to deliver digital and infrastructure transformation within their organisations. Our TOGAF qualified consultants focus on the business impact of technology and what level of maturity is needed across the Enterprise or Technical Architecture.

Stoneseed's range of services within the Technical Advisory portfolio, are a great way to ensure that there is a fresh pair of eyes always evaluating your organisations technical capabilities, programmes and projects to ensure that they're fit for purpose, and aligned with business needs.

So, whether its Transformation/Change, Mergers & Acquisitions, Vendor/Application selection or Maturity Model (Enterprise Architecture), refining IT Strategy, Service Delivery and much more, our Team can help...

PMO Services

At the heart of every successful project team lies a Project Management Office (PMO), ensuring well-defined processes and governance, planning, forecasting, project resourcing, the foundations for success. Providing that invaluable link between your business strategy and project delivery, the PMO sets and maintains standards for project management throughout an organisation and oversees the creation and embedding of procedures and best practices.

At Stoneseed, our Portfolio, Programme and Project Management Office (P3MO), with P3O qualified staff, is the backbone of every service we deliver via our PMaaS model. From onboarding clients to resourcing projects; through consultancy, service provision and transition, it is integral to the success of all our services.

We offer a complete PMO range of services from the provision of single resources to a full-service package.

We also offer PMO Consultancy and Technical Design Authority Services, if you have a PMO you wish to refine and improve.

Our PMO Consultancy, helps clients to identify their PMO needs; with a PMO reviews, through workshops, due diligence questionnaires and gap analysis to build a 100 day implementation plan for deployment.

If you need to improve governance or establish toolsets, we can help with PPM tool selection or offer expert build and rollout for Stoneseed's P3MO reporting platform constructed on Microsoft Office 365 technology.

These services help you enhance your existing PMO and project delivery capability, benchmarking against the best in class.

Cost Model

PMaaS has a simple commercial model. We work with you to forecast the project resources required and then provide a straightforward rate card, with resources defined by type and skill set.

Resources are called off against your demand schedule and may flex up and down throughout the project life cycle. One of the benefits of this model is you are simply billed for the resources consumed at the end of each month; this can often be more cost effective than employing permanent or contract resources.

PMaaS commercial benefits:

- Predictable cost
- Blended resource: access different project skillsets
- Flexible resource on demand
- No recruitment cost, resource on-boarding, retention and exiting

IR35:

The PMaaS model can help you negate IR35 for a very simple reason – it does not apply. We employ most of our Project Team, they are on our payroll and therefore comply with UK tax legislation.
