

Data Strategy

Service Definition

Service Overview

Stalis' Digital Transformation Data Services provide specialist consultancy to design and deliver digitally enabled transformation strategies that align with your organisational, clinical and financial goals

Service overview

Stalis specialises in developing digitally enabled transformation strategies that support whole-system change across NHS and wider health and care providers. Working collaboratively with clinical, non-clinical and digital leaders, we ensure your digital roadmap supports strategic, financial and risk objectives while driving sustainable improvement across the organisation

Service scope

Our Digital Transformation Data Services cover the advisory and consultancy elements required to shape, govern and deliver successful digital programmes. This includes strategy development, business case support, roadmap design, data and analytics strategy, benefits realisation planning, and assurance across major programmes such as EPR, PAS and wider digital modernisation.

Features of the Service

- Collaborative engagement with executive, clinical, operational and digital stakeholders to co-design an agreed digital vision and roadmap.
- Structured discovery and current-state assessment covering processes, systems, data quality, information flows, risks and constraints.
- Development of a prioritised digital roadmap aligned to organisational strategy, financial plans, and risk appetite, including clear milestones and dependencies.
- Expert guidance on data architecture, integration and migration approach to underpin safe and effective digital change.
- Support for options appraisal and business case development, including qualitative and quantitative analysis of costs, benefits and risks.
- Programme and governance advisory to ensure effective decision-making, clinical safety oversight and regulatory compliance (including DCB0129 and DCB0160 where applicable).
- Alignment with national policies, standards and assurance requirements for NHS and wider public-sector digital transformation.

Benefits of the Service

- Ensures your digital roadmap is directly aligned to organisational strategy, clinical priorities and financial reality, avoiding fragmented or technology-led change
- Reduces programme risk by using proven methods, tools and NHS-specific expertise to structure complex transformation initiatives
- Improves stakeholder engagement and ownership through co-designed strategies, clear governance and transparent decision-making.
- Maximises value from investments in EPR, PAS and wider digital solutions by focusing on data quality, information flows and measurable outcomes.
- Supports robust, evidence-based business cases that stand up to internal and external scrutiny, accelerating approval and funding processes.

Back Up and Recovery

Not applicable.

On-boarding / Off-boarding

- Stalis will engage with the Client/Trust team to understand how to engage for the project
- We typically hold a discovery/kickoff session to confirm that the understanding of the team is complete and aligned with the Client
- We maintain regular status meetings and reports
- We produce a project closure report to summarise activity, capture feedback and lessons learned

Implementation Plan – How is the Service Commissioned for the Buyer

Engagements typically begin with a structured discovery phase to understand your current digital landscape, strategic objectives and constraints. Outputs from this phase are used to co-develop a tailored digital transformation strategy, roadmap and implementation plan, with Stalis providing ongoing advisory support, assurance and subject-matter expertise as required throughout delivery.

Pricing Overview

The price for the Stalis Data Strategy work is based on scope and duration of work please **see Stalis Lot 3 Cloud Support pricing**

Service Constraints Summary

Each cloud-hosted instance of the Stalis Data Migration Service consists of an end to end service.

Resources required from the Client

- Access to source system documentation, if it exists
- Buyer data migration lead/project manager required
- To provide read only access to the systems in scope
- IT Infrastructure to support the data migration project

Security

Stalis Data Migration Service can be hosted in a secure Tier 3 data HSCN centre that is located within the UK.

Data is never removed from the installation without the explicit and prior permission of the buyer.

Stalis is DOH DSPT (formerly IGSoC), ISO 27001:2022, Cyber Essentials Plus and ISO 9001:2015 certified and DCB0129 Clinical Risk Management compliant.
