About Black Marble

Black Marble is a UK based, medium-sized company **with a security cleared workforce**. We have a reputation for a clear and direct approach to solving complex business problems and specialise in new user experiences on innovative technologies across a variety of form-factors and screen types.

We are a Microsoft Partner and internationally recognised experts, delivering solutions across the Microsoft platform from Azure and integration tools like Logic Apps and BizTalk, to Windows Development and MAUI. For over four years, Black Marble have received three Worldwide Microsoft Partner of the Year Awards and have been finalists in five additional categories.

We have a track record in delivering solutions using the key Microsoft building blocks, ensuring our customers benefit from solutions which address business challenges that are efficient and effective. Plus, with 3 Microsoft Most Valuable Professionals (MVPs), a team of Microsoft Certified Professionals, and 1 Microsoft Regional Director, we ensure you have the best people to deliver your solutions.

Black Marble has been on the G-Cloud framework for several years and has a wealth of experience delivering solutions for the Public Sector. Our customers range from the emergency services and health authorities to Government organisations.

G-Cloud 15 Service Description

Application Development & Cloud-Hosted Web, Mobile and Desktop Solutions

Black Marble delivers modern, secure, and scalable application development across web, mobile, desktop, and cloud-hosted platforms. We design, build, deploy, and enhance applications using Azure App Services and Microsoft's cloud ecosystem, ensuring enterprise-grade performance and resilience.

We develop responsive websites and cloud-hosted web applications using Azure's fully managed PaaS model, enabling organisations to modernise their digital services quickly and cost-effectively. Our cross-platform mobile development capability, powered by MAUI, allows us to deliver native-quality iOS, Android, and Windows applications from a shared codebase, significantly reducing time-to-market and maintenance overhead.

In addition to cloud and mobile solutions, Black Marble continues to provide full desktop application development, including modern Windows applications, client tools, rich UI applications, and hybrid connected desktop solutions integrated with cloud services.

This fully integrated offering covers architecture, design, development, deployment, cloud optimisation, and ongoing enhancement for applications across all major device types and platforms.

This Service Provides

This service delivers complete, multi-platform application development and cloud hosting capability.

- Cloud-hosted website and web app development (Azure App Services)
- Desktop application development for Windows and cross-platform scenarios
- Cross-platform mobile development (iOS, Android, Windows) using MAUI
- Bespoke application and software development across .NET and Azure
- Cloud-ready application architecture and environment configuration
- Secure-by-design development and cloud governance guidance
- Integration with backend systems, APIs, and cloud services

- Performance tuning, monitoring, and scaling in Azure
- DevOps-based CI/CD for all application types
- Consultancy, skills uplift, and ongoing enhancement

Outcomes

This service enables organisations to deliver consistent, modern digital applications across desktop, web, and mobile channels.

Outcomes include:

- Modern cloud-hosted web applications with enterprise-grade reliability
- Desktop applications that integrate seamlessly with cloud services
- Cross-platform mobile apps from a shared, efficient codebase
- Reduced development cost and effort through unified frameworks
- Faster delivery and improved quality via streamlined DevOps pipelines
- Future-ready applications built on modern Microsoft technologies
- Lower operational overhead thanks to Azure's managed PaaS
- Greater user reach across all device types
- Simplified long-term maintenance and updates
- Increased ability to innovate and evolve digital services

Benefits

- Requirements Gathering
- Cost Effectiveness
- Innovative solutions
- Flexible approach
- Governance & compliance

Black Marble Services

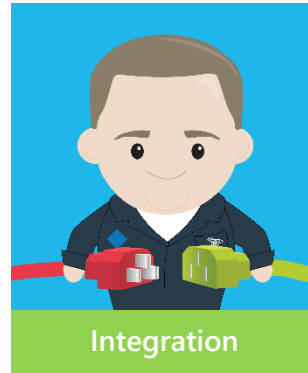

At Black Marble we provide a whole range of services across the Microsoft platform, from integrated solutions to DevOps and Azure. At our core we provide custom application development, utilising our skills and experience to produce innovative solutions for our customers.

We have taken advantage of the breadth of the Windows Platform, and our host of talented developers, to create solutions that make a real difference to our enterprise-level customers. Our award-winning frontline policing application, tuServ, is a prime example: a solution that increased patrol-time for officers, saving 1 hour 30+ minutes a day per officer, as well as greatly improving the quality of the data available to officers. Our pioneering team can bring your projects to life, making digital transformation a reality: for you, your business, and your customers.

- Cloud Optimisation – Cloud Planning, Cloud Hackathons, Application Architecture and Modernisation, and Cloud Application Implementation.
- Systems Integration – Integration Planning, Integration Health Check, Integration Performance Review, Integration Migration and Integration Implementation.
- Application Development – Application Design, Adopting and Enhancing Application services, Application Implementation and Application Code Review, including AI, App Modernisation, and Rescue Projects.
- Development Operations – DevOps Planning, DevOps Hackathon, DevOps Implementation, Azure DevOps/Services Migration, DevOps Tools Consolidation and ARM Templates, Bicep, and GitHub Migration, Planning and Implementation.

Black Marble Consultancy

We have a highly skilled and experienced team of consultants that can provide specialist expertise and advice to our customers across the Microsoft platform (Azure, AI, Integration, Logic Apps, BizTalk, DevOps, GitHub, SharePoint, Office 365, Maui and the Windows Platform).

We can target your primary software development requirements, whether you need in-house staff augmentation or are looking for an outside partner to take complete responsibility for designing and developing the software you need to run your business or assist with a project or process implementation.

The application of Black Marble's accumulated knowledge to a client's situation often provides innovative, and unexpected solutions. Bring the best to your organisation through taking advantage of our Consultants' skills and knowledge acquired over years working with customers - solving their problems and providing elegant solutions.

"Black Marble has extensive knowledge across the Microsoft stack, so I know when I recommend they speak to a customer they will be able to provide a holistic approach to meet their needs. Plus, they have a strong, ethical philosophy which means I know they won't push a solution that's not needed. When customers approach Microsoft for advice we need to know we're pointing them towards a partner they can trust – & Black Marble has proven our faith in them again & again." - Architect Evangelist, Microsoft Ireland.
