About Black Marble

Black Marble is a UK based, medium-sized company **with a security cleared workforce**. We have a reputation for a clear and direct approach to solving complex business problems and specialise in new user experiences on innovative technologies across a variety of form-factors and screen types.

We are a Microsoft Partner and internationally recognised experts, delivering solutions across the Microsoft platform from Azure and integration tools like Logic Apps and BizTalk, to Windows Development and MAUI. For over four years, Black Marble have received three Worldwide Microsoft Partner of the Year Awards and have been finalists in five additional categories.

We have a track record in delivering solutions using the key Microsoft building blocks, ensuring our customers benefit from solutions which address business challenges that are efficient and effective. Plus, with 3 Microsoft Most Valuable Professionals (MVPs), a team of Microsoft Certified Professionals, and 1 Microsoft Regional Director, we ensure you have the best people to deliver your solutions.

Black Marble has been on the G-Cloud framework for several years and has a wealth of experience delivering solutions for the Public Sector. Our customers range from the emergency services and health authorities to Government organisations.

G-Cloud 15 Service Description

GitHub Consultancy

Black Marble's GitHub Consultancy service supports organisations at every stage of their GitHub adoption journey. As one of the UK's first Verified GitHub Partners, our highly skilled consultants, including Microsoft and GitHub-certified engineers and multiple Microsoft MVPs, help organisations plan, migrate, secure, optimise, and innovate using GitHub's modern development platform.

Our team brings deep, hands-on experience across GitHub Enterprise, GitHub Actions, GitHub Advanced Security, GitHub Copilot, and GitHub governance and administration. We work directly with GitHub to ensure customers receive best-practice guidance aligned to the latest platform capabilities.

What This Service Provides

We offer specialist consultancy to help you:

- Plan and architect your organisation-wide GitHub adoption strategy.
- Migrate from any development toolset (Azure DevOps, GitLab, Bitbucket, CI/CD platforms) into GitHub using approved migration tooling and best practices.
- Improve security posture with GitHub Advanced Security features like code scanning, secret scanning, and dependency management.
- Increase engineering productivity with GitHub Copilot, including configuration, enablement and best-practice usage guidance.
- Deliver bespoke, consultant-led training on GitHub fundamentals, GitHub Actions, GitHub Administration, and secure development practices.
- Accelerate capability development through GitHub Partner Delivery Credentials (covering migrations, ADO→GitHub migrations, platform, AI and security)

Outcomes

Organisations using this service can expect:

- A clear and actionable GitHub adoption or migration roadmap
- Secure, automated and compliant development processes aligned with industry best practices
- Improved developer productivity through automation and AI-assisted engineering
- Reduced risk through enhanced governance, identity integration, and secure-by-default DevOps workflows
- Increased internal capability through hands-on knowledge transfer and bespoke training programmes

Features

- Highly skilled and experienced consultants, including Microsoft and GitHub certified.
- Verified GitHub Partner
- 3 x Microsoft Most Valuable Professionals

Benefits

- Requirements Gathering
- Cost Effectiveness
- Innovative solutions
- Flexible approach
- Governance & compliance

Black Marble Services

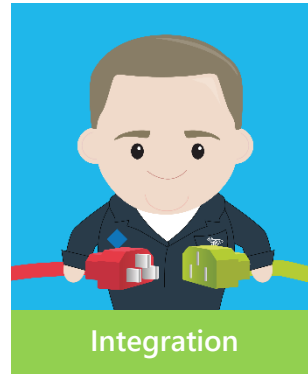

At Black Marble we provide a whole range of services across the Microsoft platform, from integrated solutions to DevOps and Azure. At our core we provide custom application development, utilising our skills and experience to produce innovative solutions for our customers.

We have taken advantage of the breadth of the Windows Platform, and our host of talented developers, to create solutions that make a real difference to our enterprise-level customers. Our award-winning frontline policing application, tuServ, is a prime example: a solution that increased patrol-time for officers, saving 1 hour 30+ minutes a day per officer, as well as greatly improving the quality of the data available to officers. Our pioneering team can bring your projects to life, making digital transformation a reality: for you, your business, and your customers.

- Cloud Optimisation – Cloud Planning, Cloud Hackathons, Application Architecture and Modernisation, and Cloud Application Implementation.
- Systems Integration – Integration Planning, Integration Health Check, Integration Performance Review, Integration Migration and Integration Implementation.
- Application Development – Application Design, Adopting and Enhancing Application services, Application Implementation and Application Code Review, including AI, App Modernisation, and Rescue Projects.
- Development Operations – DevOps Planning, DevOps Hackathon, DevOps Implementation, Azure DevOps/Services Migration, DevOps Tools Consolidation and ARM Templates, Bicep, and GitHub Migration, Planning and Implementation.

Black Marble Consultancy

We have a highly skilled and experienced team of consultants that can provide specialist expertise and advice to our customers across the Microsoft platform (Azure, AI, Integration, Logic Apps, BizTalk, DevOps, GitHub, SharePoint, Office 365, Maui and the Windows Platform).

We can target your primary software development requirements, whether you need in-house staff augmentation or are looking for an outside partner to take complete responsibility for designing and developing the software you need to run your business or assist with a project or process implementation.

The application of Black Marble's accumulated knowledge to a client's situation often provides innovative, and unexpected solutions. Bring the best to your organisation through taking advantage of our Consultants' skills and knowledge acquired over years working with customers - solving their problems and providing elegant solutions.

"Black Marble has extensive knowledge across the Microsoft stack, so I know when I recommend they speak to a customer they will be able to provide a holistic approach to meet their needs. Plus, they have a strong, ethical philosophy which means I know they won't push a solution that's not needed. When customers approach Microsoft for advice we need to know we're pointing them towards a partner they can trust – & Black Marble has proven our faith in them again & again." - Architect Evangelist, Microsoft Ireland.
