## About Black Marble

Black Marble is a UK based, medium-sized company with a security cleared workforce. We have a reputation for a clear and direct approach to solving complex business problems and specialise in new user experiences on innovative technologies across a variety of form-factors and screen types.

We are a Microsoft Partner and internationally recognised experts, delivering solutions across the Microsoft platform from Azure and integration tools like Logic Apps and BizTalk, to Windows Development and MAUI. For over four years, Black Marble have received three Worldwide Microsoft Partner of the Year Awards and have been finalists in five additional categories.

We have a track record in delivering solutions using the key Microsoft building blocks, ensuring our customers benefit from solutions which address business challenges that are efficient and effective. Plus, with 3 Microsoft Most Valuable Professionals (MVPs), a team of Microsoft Certified Professionals, and 1 Microsoft Regional Director, we ensure you have the best people to deliver your solutions.

Black Marble has been on the G-Cloud framework for several years and has a wealth of experience delivering solutions for the Public Sector. Our customers range from the emergency services and health authorities to Government organisations.

# G-Cloud 15 Service Description

## Azure PaaS Solution Design, Development & Deployment Services

Black Marble delivers end-to-end Azure PaaS solution expertise—from initial architecture through full application development to secure, scalable deployment. Our team of experienced consultants and developers utilise Microsoft cloud technologies, including .NET and Azure platform services, to create modern, performant, and resilient applications tailored to your organisation's needs.

As a long-standing Microsoft Partner with multiple MVPs and Regional Directors, Black Marble ensures solutions follow best-practice cloud patterns, governance, and compliance standards. Whether designing a new cloud-native system, modernising an existing application, or deploying workloads into Azure PaaS, we provide the skills, guidance, and delivery capability to achieve successful outcomes across public-sector environments.

## This Service Provides

This offering delivers the full lifecycle of Azure PaaS solution creation, from early-stage technical design to cloud-native build and deployment, supported by Black Marble's extensive Microsoft expertise.

- Azure PaaS solution architecture and cloud-native design
- Application development using .NET and Azure services
- Deployment of workloads across Azure App Services, Functions, APIs, containers, and integration components
- Modernisation of on-premises or legacy applications to PaaS
- Best-practice governance, compliance, and cloud security patterns
- Performance optimisation, cost-management guidance, and operational readiness
- Integration using Logic Apps, Service Bus, Event Grid, and related services
- DevOps support using Azure DevOps and GitHub
- Technical consultancy, capability uplift, and knowledge transfer
- Flexible engagement models tailored to project size and complexity

## Outcomes

This service enables organisations to successfully design, build, and run Azure PaaS applications that are secure, scalable, and aligned with Microsoft best practices.

Outcomes include:

- Robust, scalable cloud-native applications
- Reduced operational overhead via managed PaaS services
- Improved agility through modern architectures and automated deployment
- Enhanced security and compliance aligned to public-sector requirements
- Lower cost through efficient resource usage and optimisation
- Faster delivery and higher quality via mature DevOps practices
- Greater organisational confidence in cloud adoption
- Future-ready technical foundations supporting innovation and growth

## Features

- Highly skilled and experienced consultants
- 3 x Microsoft Most Valuable Professionals

## Benefits

- Requirements Gathering
- Cost Effectiveness
- Innovative solutions
- Flexible approach
- Governance & compliance

## Black Marble Services

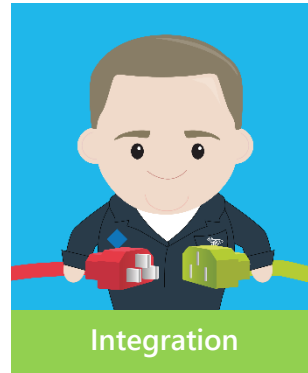

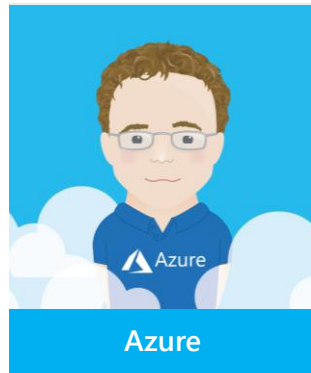

At Black Marble we provide a whole range of services across the Microsoft platform, from integrated solutions to DevOps, Azure, and AI. At our core we provide custom application development, utilising our skills and experience to produce innovative solutions for our customers.

We have taken advantage of the breadth of the Windows Platform, and our host of talented developers, to create solutions that make a real difference to our enterprise-level customers. Our award-winning frontline policing application, tuServ, is a prime example: a solution that increased patrol-time for officers, saving 1 hour 30+ minutes a day per officer, as well as greatly improving the quality of the data available to officers. Our pioneering team can bring your projects to life, making digital transformation a reality: for you, your business, and your customers.

- Cloud Optimisation – Cloud Planning, Cloud Hackathons, Application Architecture and Modernisation, and Cloud Application Implementation.
- Systems Integration – Integration Planning, Integration Health Check, Integration Performance Review, Integration Migration and Integration Implementation.
- Application Development – Application Design, Adopting and Enhancing Application services, Application Implementation and Application Code Review, including AI, App Modernisation, and Rescue Projects.
- Development Operations – DevOps Planning, DevOps Hackathon, DevOps Implementation, Azure DevOps/Services Migration, DevOps Tools Consolidation and ARM Templates, Bicep, and GitHub Migration, Planning and Implementation.

## Black Marble Consultancy

We have a highly skilled and experienced team of consultants that can provide specialist expertise and advice to our customers across the Microsoft platform (Azure, AI, Integration, Logic Apps, BizTalk, DevOps, GitHub, SharePoint, Office 365, Maui and the Windows Platform).

We can target your primary software development requirements, whether you need in-house staff augmentation or are looking for an outside partner to take complete responsibility for designing and developing the software you need to run your business or assist with a project or process implementation.

The application of Black Marble's accumulated knowledge to a client's situation often provides innovative, and unexpected solutions. Bring the best to your organisation through taking advantage of our Consultants' skills and knowledge acquired over years working with customers - solving their problems and providing elegant solutions.

*"Black Marble has extensive knowledge across the Microsoft stack, so I know when I recommend they speak to a customer they will be able to provide a holistic approach to meet their needs. Plus, they have a strong, ethical philosophy which means I know they won't push a solution that's not needed. When customers approach Microsoft for advice we need to know we're pointing them towards a partner they can trust – & Black Marble has proven our faith in them again & again." - Architect Evangelist, Microsoft Ireland.*
