About Black Marble

Black Marble is a UK based, medium-sized company with a security cleared workforce. We have a reputation for a clear and direct approach to solving complex business problems and specialise in new user experiences on innovative technologies across a variety of form-factors and screen types.

We are a Microsoft Partner and internationally recognised experts, delivering solutions across the Microsoft platform from Azure and integration tools like Logic Apps and BizTalk, to Windows Development and MAUI. For over four years, Black Marble have received three Worldwide Microsoft Partner of the Year Awards and have been finalists in five additional categories.

We have a track record in delivering solutions using the key Microsoft building blocks, ensuring our customers benefit from solutions which address business challenges that are efficient and effective. Plus, with 3 Microsoft Most Valuable Professionals (MVPs), a team of Microsoft Certified Professionals, and 1 Microsoft Regional Director, we ensure you have the best people to deliver your solutions.

Black Marble has been on the G-Cloud framework for several years and has a wealth of experience delivering solutions for the Public Sector. Our customers range from the emergency services and health authorities to Government organisations.

G-Cloud 15 Service Description

API Management on Microsoft Azure

Black Marble's extensive Azure and systems integration expertise enables us to deliver a secure, scalable, and fully managed approach to publishing and governing APIs for private, partner, and public sector consumers. Our service assists organisations in modernising their integration landscape, improving interoperability, and ensuring consistent governance across all API endpoints.

Through this offering, our consultants work with you to assess your existing API estate, identify opportunities for optimisation, and implement best-practice patterns using Azure API Management. We ensure your APIs are securely exposed to internal and external users, or where functionality does not yet exist, our development teams design and build new APIs aligned to your architecture and compliance requirements.

This service is designed to support organisations at all stages of maturity, from early adoption through to enterprise-wide API governance, helping you achieve cost-effective, innovative, and compliant integration solutions.

Features

- Highly skilled and experienced consultants including multiple Microsoft Most Valuable Professionals.
- 3 x Microsoft Most Valuable Professionals
- Secure API Publication: A managed approach to presenting APIs to private, partner, or public consumers using Azure's enterprise-grade API gateway capabilities.
- Assessment of Existing APIs: Review and analysis of your current API implementations, including security, performance, structure, and governance.
- Creation of New APIs: Where required, our development teams build new, scalable, well-documented APIs that align with your data, integration, and compliance strategies.

- Flexible Engagement Approach: Suitable for both technical and non-technical stakeholders, ensuring cross-organisational adoption and clarity.
- Governance & Compliance: Implementation of governance frameworks and standards to support secure and auditable API operations.

Benefits

- Structured Requirements Gathering: Supporting discovery of organisational API needs and integration objectives.
- Cost Effectiveness: Provides a streamlined, modern integration approach aligned to Cloud-first strategies, reducing maintenance overheads.
- Consistent, Secure API delivery: Ensures APIs are standardised, well-documented, and protected.
- Improved Innovation & Agility: Enables faster delivery of digital services through reusable APIs and simplified integration patterns.
- Robust Governance & Compliance Controls: Ensures APIs operate within legislative, organisational, and sector-specific requirements.

Service Components

- Discovery and Assessment.
- Architecture & Design.
- Implementation & Development.
- Governance, Compliance & Best Practice.
- Knowledge Transfer & Ongoing Support.

Black Marble Services

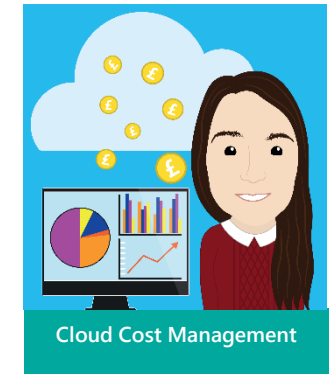

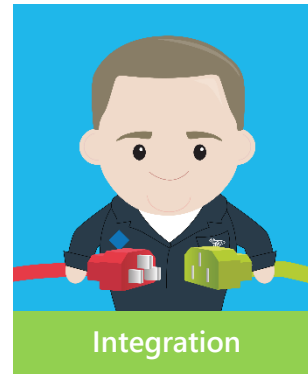

At Black Marble we provide a whole range of services across the Microsoft platform, from integrated solutions to DevOps and Azure. At our core we provide custom application development, utilising our skills and experience to produce innovative solutions for our customers.

We have taken advantage of the breadth of the Windows Platform, and our host of talented developers, to create solutions that make a real difference to our enterprise-level customers. Our award-winning frontline policing application, tuServ, is a prime example: a solution that increased patrol-time for officers, saving 1 hour 30+ minutes a day per officer, as well as greatly improving the quality of the data available to officers. Our pioneering team can bring your projects to life, making digital transformation a reality: for you, your business, and your customers.

- Cloud Optimisation – Cloud Planning, Cloud Hackathons, Application Architecture and Modernisation, and Cloud Application Implementation.
- Systems Integration – Integration Planning, Integration Health Check, Integration Performance Review, Integration Migration and Integration Implementation.
- Application Development – Application Design, Adopting and Enhancing Application services, Application Implementation and Application Code Review, including AI, App Modernisation, and Rescue Projects.
- Development Operations – DevOps Planning, DevOps Hackathon, DevOps Implementation, Azure DevOps/Services Migration, DevOps Tools Consolidation and ARM Templates, Bicep, and GitHub Migration, Planning and Implementation.

Black Marble Consultancy

We have a highly skilled and experienced team of consultants that can provide specialist expertise and advice to our customers across the Microsoft platform (Azure, AI, Integration, Logic Apps, BizTalk, DevOps, GitHub, SharePoint, Office 365, Maui and the Windows Platform).

We can target your primary software development requirements, whether you need in-house staff augmentation or are looking for an outside partner to take complete responsibility for designing and developing the software you need to run your business or assist with a project or process implementation.

The application of Black Marble's accumulated knowledge to a client's situation often provides innovative, and unexpected solutions. Bring the best to your organisation through taking advantage of our Consultants' skills and knowledge acquired over years working with customers - solving their problems and providing elegant solutions.

"Black Marble has extensive knowledge across the Microsoft stack, so I know when I recommend they speak to a customer they will be able to provide a holistic approach to meet their needs. Plus, they have a strong, ethical philosophy which means I know they won't push a solution that's not needed. When customers approach Microsoft for advice we need to know we're pointing them towards a partner they can trust – & Black Marble has proven our faith in them again & again." - Architect Evangelist, Microsoft Ireland.
