CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

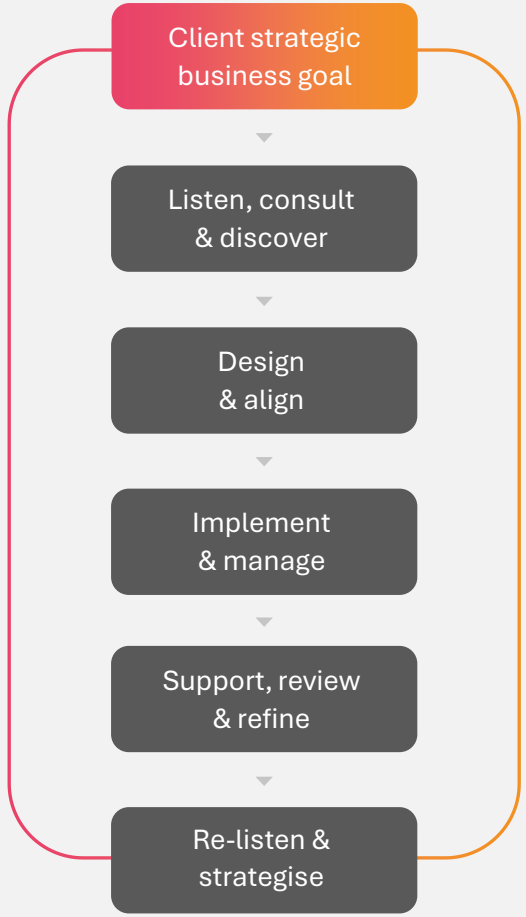

Microsoft Dynamics 365 Functional Training provides hands-on, in-depth knowledge of Dynamics 365, focusing on its application in improving business processes. Led by industry experts, the training covers core functionalities, customisation, integration, and best practices in sales, customer service, and financials, equipping users to efficiently implement and utilise Dynamics 365 solutions.

Key features include a detailed exploration of Dynamics 365 for Sales, Customer Service, and Finance, customisation techniques for tailored solutions, integration strategies with Microsoft products and third-party applications, best practices for data management, user adoption tactics to enhance productivity, scenario-based training for practical application, insights into effective customer relationship and sales pipeline management, financial management guidance, updates on the latest Dynamics 365 features, and access to expert trainers for personalised support.

Benefits of the training include empowering employees with Dynamics 365 knowledge, enhancing operational efficiency, improving customer engagement and satisfaction, facilitating informed financial decisions, driving software investment return, supporting strategic business growth, reducing dependency on external consultants, encouraging innovation, strengthening data-driven decision-making, and offering a competitive edge with the latest industry knowledge and skills.

This training specifically focuses on Dynamics 365, potentially not meeting the training needs of organisations seeking a broader CRM or ERP solution overview. Its effectiveness requires participants' basic understanding of business processes and CRM concepts. Additionally, as Dynamics 365 continues to evolve, ongoing learning is necessary to keep pace with new features and updates.
