

NODE4

G-Cloud 15 Service Description

**API Management and
Integration Services
(iPaaS)**

ABOUT THE SERVICE

API Management & Integration Services (iPaaS) offer seamless integration solutions to ensure smooth communication across various Azure software components, systems, and environments, both on-premises and in the cloud. By implementing Integration Services, this service promotes efficient interoperability within diverse IT ecosystems, improving operational performance.

Service features include the comprehensive integration of on-premises and cloud systems, full implementation of Azure Integration Services for unified system functionality, streamlined API management, customised solutions to meet specific business needs, data consistency across platforms, robust security protocols, scalable architecture, seamless data flow for operational efficiency, expert support for ongoing optimisation, and staff training on system management.

Benefits encompass enhanced business agility, smooth real-time data exchange for better decision-making, reduced IT complexity, improved user experiences, scalable solutions for business growth, strengthened data security and compliance, productivity gains through workflow automation, support for strategic initiatives with robust integration capabilities, innovation encouragement through advanced technologies, and long-term value with continuous improvement and support.

The service faces constraints due to the complexity of integrating varied systems, necessitating deep technical knowledge for effective setup and maintenance. Compatibility of existing IT infrastructure with Azure Integration Services is crucial. Significant investment in staff training is required for effective system management. Data privacy and security considerations may challenge seamless interoperability, demanding strict compliance. Customisation needs can also extend deployment times and affect budgets.

ON A JOURNEY TO CHANGE, WITH YOU

WORKING TOGETHER TO ACHIEVE YOUR GOALS

NODE4 ASPIRE FRAMEWORK

A delivery framework built for innovation and value creation.

Node4's ASPIRE Framework delivers a consistent customer journey across all our delivery practices and outlines our approach to delivering end-to-end, secure and transformative services.

CLIENTS

1800 CLIENTS, 1800 INDIVIDUAL STORIES OF CHANGE. HERE ARE JUST A FEW

 Foreign, Commonwealth & Development Office	 Ministry of Defence	 Ministry of Justice	 Department for Environment Food & Rural Affairs	 UK Export Finance
 Department for Levelling Up, Housing & Communities	 Homes England	 SSRO Single Source Regulations Office	 NHS Digital	 UKSBS Shared Business Services
	 Leicestershire Police Protecting our communities	 Cheshire East Council	 West Midlands Combined Authority	 CareQuality Commission
 Locala Health & Wellbeing	 Ofsted raising standards improving lives	 HS2	 HM Land Registry	 acas working for everyone

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

FROM 7 DAYS TO 5 MINUTES – A 99.9% REDUCTION IN TIME

ESFRS's previous manual SSRI process meant crews assessing the risk at premises had to make handwritten notes, fill out a Word document and then send an email to their respective Station Manager for approval. This was prior to the SSRI document being uploaded manually to a SSRI system and downloaded to the services' Mobile Data Terminals (MDT), located on each fire appliance, for use when in transit and at incidents. This process could take up to seven days to complete.

ESFRS identified this process needed upgrading to meet aspects of the Grenfell Tower incident recommendations and to modernise the technology in use and reached out to their ICT managed service provider and trusted partner, Telent, to help them kickstart the process.

With the support of strategic partners, Telent have been working with ESFRS since 2016 to transform key operational processes. In this instance, commercial, out-of-the-box solutions were available – but ESFRS and Telent felt that a purpose-built, configurable solution would be better placed to meet all requirements and deliver maximum impact and improve safety.

Telent introduced Node4, to ESFRS and what they had set out to achieve, and together we mapped a way forward for the organisation. The end solution would support ESFRS's digital strategy, with a focus on alignment of digital risk data collection and current guidance, and the introduction of an auditable digital process for collecting and communicating risk data.

“

Self-service was a key driver in this project for us, with risks continuously changing, and new risks regularly being discovered, it was important that any new requirements could be added to the form as and when needed.

CHANGE THAT MATTERS

We empower public and private sector organisations by delivering positive outcomes through technology and innovation.

Harnessing our knowledge, passion and talent we help our clients reach their full potential.

We call it change that matters.

THE JOURNEY SO FAR...

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.

WHY PARTNER WITH US?

1

PROVEN

20 years delivering outcomes as the IT partner of choice for over 1800 organisations

2

CAPABLE

Utilising our expertise & knowledge from the highest IT accolades & accreditations to deliver innovative technology solutions

3

SCALE & AGILITY

We are big enough to deliver yet agile enough to care, always ensuring exceptional service comes as standard

4

WE DELIVER

Everything we do is developed & executed with your outcomes in mind to ensure we deliver change that matters
