G-Cloud 15 Service Description

**VictimAssist: Victim
Support Solution for
Police**

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

VictimAssist utilises Microsoft Dynamics 365 to provide police forces with an integrated platform dedicated to offering outstanding support to crime victims. This system ensures efficient case management and communication, which facilitates timely, cost-effective, and consistent care while maintaining connectivity among all stakeholders involved, ultimately improving the support and guidance available to victims.

Key features of VictimAssist include an integrated case management system specifically tailored for victim support operations and built on the secure, scalable framework of Microsoft Dynamics 365. It streamlines communication between victims, police, and other support services and automates workflows to ensure prompt responses and support. The system hosts a consolidated database for all victim-related information and case notes, features customisable dashboards for real-time insights into case statuses and metrics, and maintains secure and compliant data handling protocols for sensitive information. Mobile access is provided for field officers to update and review cases on the go, and the system facilitates consistent follow-up and support throughout the victim's journey. It also integrates with other platforms and services for a more comprehensive support structure.

The benefits of using VictimAssist are significant: It notably enhances the level of support and care provided to victims and improves operational efficiency in managing victim support cases. The system ensures timely and effective communication with all involved parties and provides a secure, confidential platform for managing sensitive information. VictimAssist offers scalability to handle different case volumes and needs, reduces administrative workload through automation and streamlined processes, and delivers consistent, high-quality service across all cases. Additionally, it enables better resource allocation and management within police forces, supports data-driven decision-making with its comprehensive reporting and analytics capabilities, and increases transparency and accountability in victim support operations.

ON A JOURNEY TO CHANGE, WITH YOU

WORKING TOGETHER TO ACHIEVE YOUR GOALS

NODE4 ASPIRE FRAMEWORK

A delivery framework built for innovation and value creation.

Node4's ASPIRE Framework delivers a consistent customer journey across all our delivery practices and outlines our approach to delivering end-to-end, secure and transformative services.

 Locala Health & Wellbeing	 Ofsted raising standards improving lives	 HS2	 HM Land Registry	 acads working for everyone

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

FROM 7 DAYS TO 5 MINUTES – A 99.9% REDUCTION IN TIME

ESFRS's previous manual SSRI process meant crews assessing the risk at premises had to make handwritten notes, fill out a Word document and then send an email to their respective Station Manager for approval. This was prior to the SSRI document being uploaded manually to a SSRI system and downloaded to the services' Mobile Data Terminals (MDT), located on each fire appliance, for use when in transit and at incidents. This process could take up to seven days to complete.

ESFRS identified this process needed upgrading to meet aspects of the Grenfell Tower incident recommendations and to modernise the technology in use and reached out to their ICT managed service provider and trusted partner, Telent, to help them kickstart the process.

With the support of strategic partners, Telent have been working with ESFRS since 2016 to transform key operational processes. In this instance, commercial, out-of-the-box solutions were available – but ESFRS and Telent felt that a purpose-built, configurable solution would be better placed to meet all requirements and deliver maximum impact and improve safety.

Telent introduced Node4, to ESFRS and what they had set out to achieve, and together we mapped a way forward for the organisation. The end solution would support ESFRS's digital strategy, with a focus on alignment of digital risk data collection and current guidance, and the introduction of an auditable digital process for collecting and communicating risk data.

“

Self-service was a key driver in this project for us, with risks continuously changing, and new risks regularly being discovered, it was important that any new requirements could be added to the form as and when needed.

CHANGE THAT MATTERS

We empower public and private sector organisations by delivering positive outcomes through technology and innovation.

Harnessing our knowledge, passion and talent we help our clients reach their full potential.

We call it change that matters.

THE JOURNEY SO FAR...

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.

WHY PARTNER WITH US?

1

PROVEN

20 years delivering outcomes as the IT partner of choice for over 1800 organisations

2

CAPABLE

Utilising our expertise & knowledge from the highest IT accolades & accreditations to deliver innovative technology solutions

3

SCALE & AGILITY

We are big enough to deliver yet agile enough to care, always ensuring exceptional service comes as standard

4

WE DELIVER

Everything we do is developed & executed with your outcomes in mind to ensure we deliver change that matters
