With a focus on key operational areas such as Finance, Supply Chain Management, Project Operations, and HR, these services are designed to ensure a seamless transition and integration into business processes using a proven design, planning, and onboarding approach. This approach is further supported by robust SLA-backed service delivery and adherence to ITIL Service Management best practices to guarantee high-quality service.

The service encompasses comprehensive support throughout the lifecycle of Dynamics 365 F&O implementations, offering expert guidance for smooth integration and continuous system maintenance and updates. A strategic formulation is also part of the service, aimed at optimising the use of Dynamics 365 F&O features to support strategic business goals, enhancing system performance, and reducing operational risks through proactive support and incident management.

This tailored support is crucial for organisations looking to leverage Dynamics 365 F&O to enhance their business processes, providing reliable and consistent service that aligns with best practices for superior service quality and delivery. ## CAJA GROUP ENJOY PEACE OF MIND WITH 24/7×365 MANAGED SERVICE

Node4 and Caja's most recent project was to deliver a comprehensive 24/7×365 Managed Services support to enhance its IT department. The services include flexible and managed options, adjusted to the firm's needs, coping with workloads and covering multiple technologies. The services are secured by Microsoft technology and our engineers are security cleared. Caja are cyber protected and compliant with UK protection standards using our services.

Effective working – Node4's Managed Services has enabled Caja employees to focus on effective delivery of its consulting services without having to worry about IT enquiries.

24/7×365 protection - Using advanced technology the MS team will monitor and protect Caja employees and the organisation data from a potential breach. Each employee can now easily raise a case with MS through instant chat, enabling a seamless end user experience.

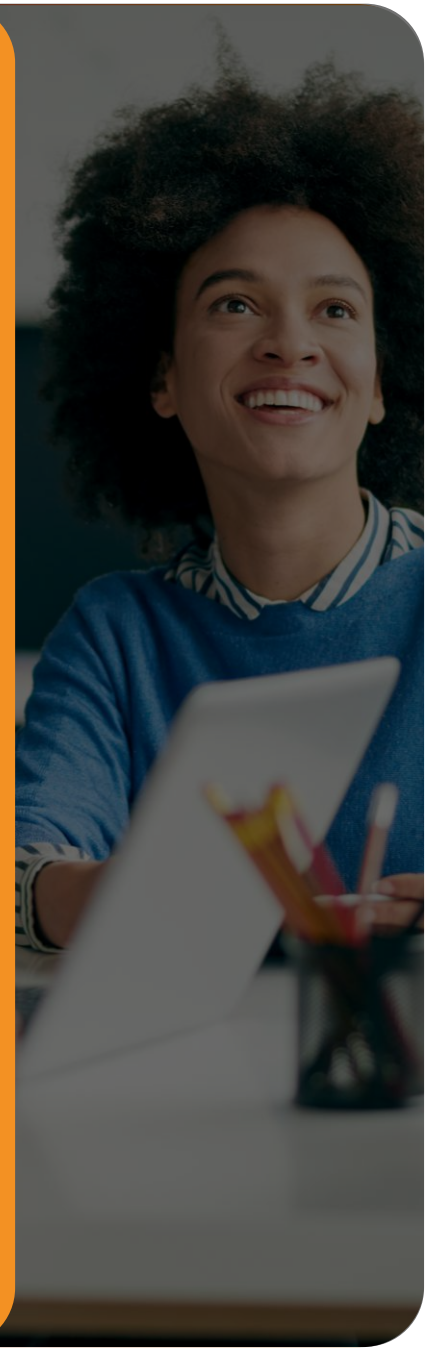

Ongoing monitoring - Monthly reviews are scheduled between both organisations to discuss the results of the services and upcoming projects.
