Service Description

Database Migration (Azure SQL DB)

NODE4 © 2026

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

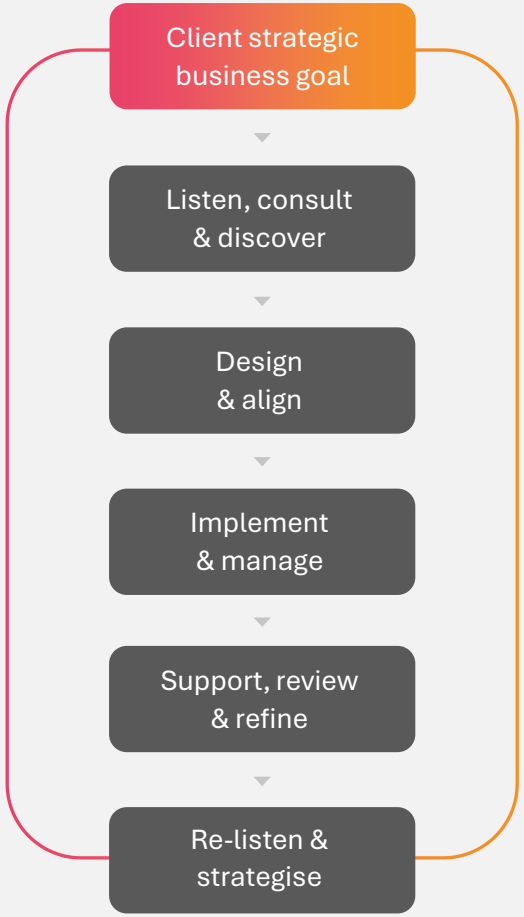

Navigating the transition of your databases to Azure SQL DB, our Database Migration service stands out for its comprehensive approach, ensuring your move to the cloud is smooth and efficient. Beginning with a qualification process, we evaluate the compatibility of your databases and applications with Azure's environment, laying the groundwork for a successful migration.

Key features of this service include expertise in moving databases to the Azure SQL Database platform, a thorough compatibility check for databases and applications, a strategy that minimises operational disruption, and the utilisation of Azure’s features for optimal post-migration performance. A detailed Statement of Work (SoW) crystallises our commitment and the specific outcomes you can expect.

The advantages of leveraging this service are multifaceted. From enhancing database scalability and performance to accessing Azure's cutting-edge functionalities, the benefits align with strategic business growth and technological evolution. Importantly, the service ensures that your data remains secure and compliant throughout the migration process, providing a solid foundation for your digital transformation journey.

Transitioning to Azure SQL DB with our service requires careful preparation to identify any necessary adjustments to your systems for cloud compatibility. While we aim to keep disruption to a minimum, some temporary downtime is often necessary to ensure a seamless migration. The specifics of each migration project, including timelines and deliverables, are outlined in the Statement of Work, ensuring alignment with your business objectives and readiness for a cloud-centric future.

ON A JOURNEY TO CHANGE, WITH YOU

WORKING TOGETHER TO ACHIEVE YOUR GOALS

CLIENT SUCCESS

AUTOMATING DATA PROCESSES AND ENHANCING COMPLIANCE WITH ACAS

Having worked in partnership with Acas since 2018, Node4 were on hand to provide insight, advice and a highly skilled team to help them achieve all they had set out to – and with Microsoft's Data Export Service coming to end of life in November 2022, Microsoft Azure Synapse was identified as the perfect tool to support the project.

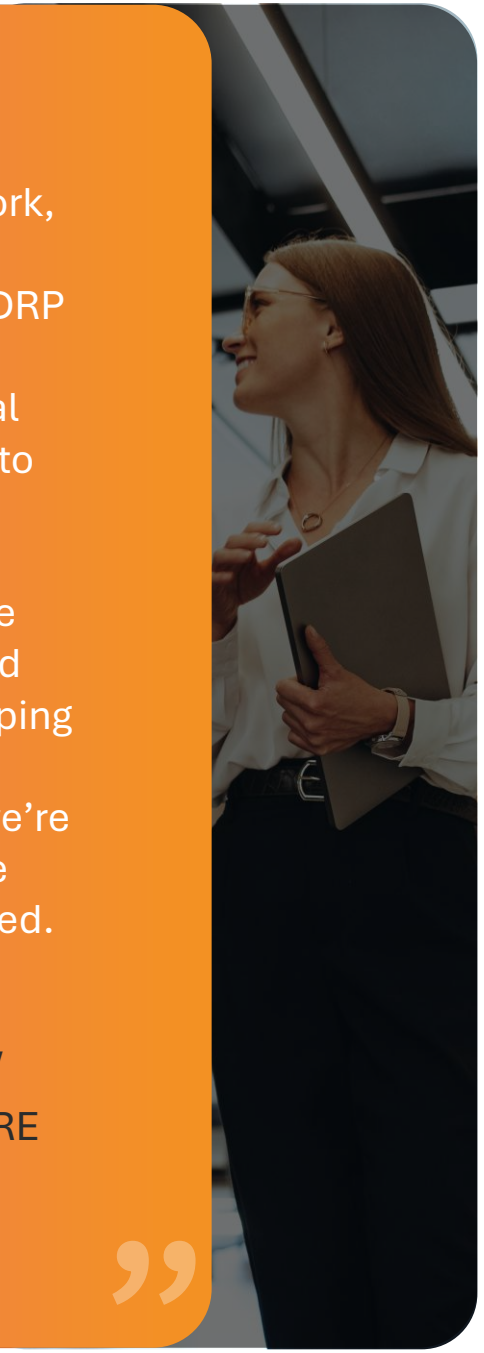

By combining Azure Synapse Link, Azure Data Lake and Azure Synapse Analytics functionality, our Innovation team were able to leverage Microsoft Azure technology to establish a reporting and analytics system to suit Acas's needs; the end solution provides a means to store data securely at an affordable cost, and offers the opportunity to scale up and down, ticking two important boxes.

Meanwhile, Synapse Spark Pools were used to create a Delta Lake to ensure any data stored meets Acas's data persistence and masking requirements. An automated data pipeline feeds into the Delta Lake daily with the latest Insert/Update/Delete operations, and a scheduled purging data pipeline is used to automatically anonymise sensitive data within the Delta Lake, meaning compliance with both internal and GDPR regulations.

Together, these automations give Acas the ability to keep hold of data, even if the process with which it was created has since expired, and harness automation to anonymise – or 'mask' – records to make sure data allows for insight into key performance indicators without the need for personal identifiable information present.

> "Given the nature of our work, it's vital our data is secure and that we're meeting GDRP obligations, as well as upholding our own internal standards when it comes to the anonymisation and archiving of data. By introducing Azure Synapse technology and automated processes, Node4 are helping reduce the burden on our team while making sure we're still handling data with the care and sensitivity required."

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

WORKING WITH NODE4 HAS HELPED ARRIVA TO DRIVE THEIR DATABASE DESIGN FORWARDS.

Arriva asked Node4 to address two requirements.

Firstly, it asked Node4 to review a key SQL Server database running a critical EPOS application which was suffering from significant performance degradation. Node4 undertook a detailed assessment of the environment including analysis of application queries and indexing strategy coupled with infrastructure performance. This resulted in a clear set of recommendations and agreed remediation actions.

Arriva also asked Node4 to assess the entire SQL Server estate and provide recommendations for a modernised and consolidated configuration. Through detailed onsite review sessions, Node4 were able to identify four alternative architecture options for the SQL Server environment. They documented the pros and cons of each solution, taking into consideration the complexity, supportability and cost implications for each of the options. This enabled Arriva to make an informed decision on the future design of the environment.

> Arriva wanted to optimise its growing SQL Server estate, so it turned to Node4 for advice and support.

THE JOURNEY SO FAR...

2004 - 2014

THE EARLY YEARS

Founded in 2004
By Andrew Gilbert
Opened 3 data centres
LETN acquisition

2015 - 2016

BUILDING SOLID FOUNDATIONS

Bowmark Investment
Premier IT & Reconnix acquisition

2017 - 2018

DEVELOPING PUBLIC CLOUD

N4Stack Launched covering public cloud, data & DevOps
HSCN achieved

2019

ACQUISITION SUCCESS

Secura acquisition
Employee Experience Awards winner

2020

PANDEMIC RESPONSE

Launched N4Engage
COVID-19 Response
Launch of SD-WAN

2021

EVEN MORE GROWTH

Starcom acquisition
TNP acquisition
MS Azure Expert MSP
Providence Investment

2022

LOOKING TO THE FUTURE

risual acquisition
Tisski acquisition
Launched Azure Hybrid Cloud
Great Place to Work 3 years in a row

2023

THE FUTURE IS HERE

TNP, risual, Tisski and core Node4 teams join together
BizApps and Power Platform capability rollout
Microsoft Inner Circle status acquired through Tisski
ThreeTwoFour acquisition

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.

WHY PARTNER WITH US?

1

PROVEN

20 years delivering outcomes as the IT partner of choice for over 1800 organisations

2

CAPABLE

Utilising our expertise & knowledge from the highest IT accolades & accreditations to deliver innovative technology solutions

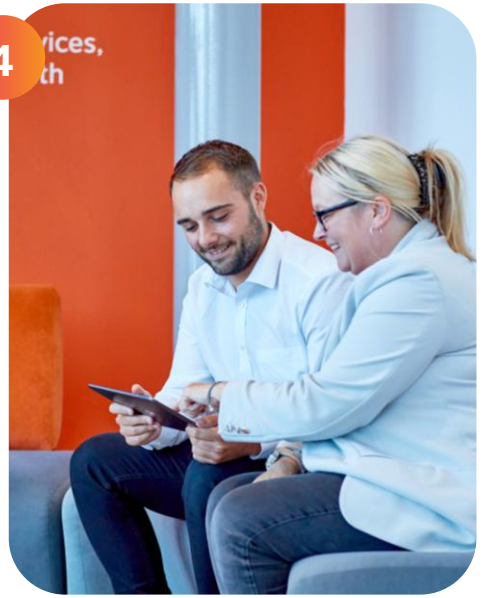

3

SCALE & AGILITY

We are big enough to deliver yet agile enough to care, always ensuring exceptional service comes as standard

4

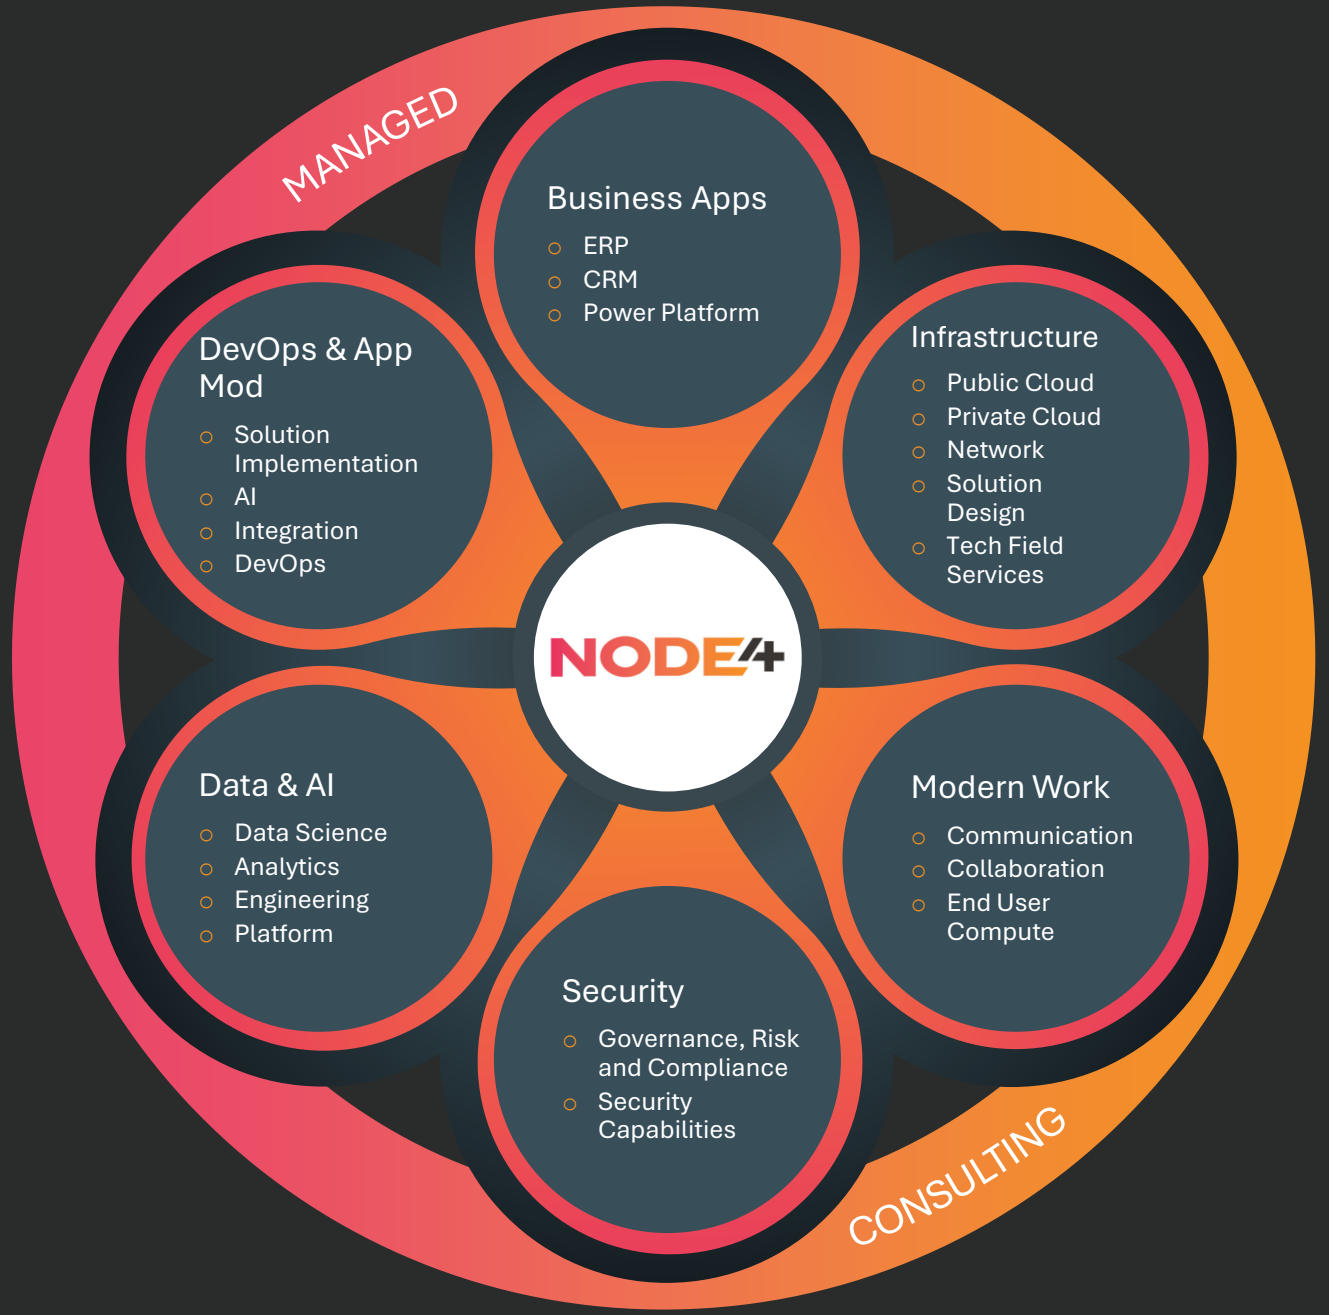

WE DELIVER

Everything we do is developed & executed with your outcomes in mind to ensure we deliver change that matters
