Service Description

Microsoft AI Agent Implementation

NODE4 © 2026

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

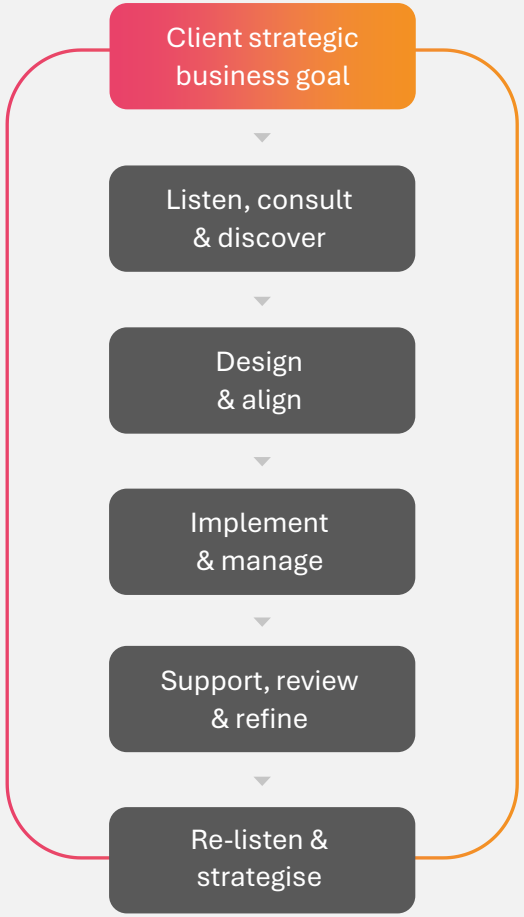

The Power AI Agents implementation service is tailored to provide customers with the expertise needed to design, implement, and effectively adopt Power Virtual Agents, a crucial part of the Microsoft Power Platform. It aims to create innovative chatbots to bolster customer engagement and increase productivity, covering all necessary steps including discovery, planning, configuration, integration, deployment, change management, training, and ongoing support.

Key features of the service include expert design and implementation of bespoke Power A Agents, strategic planning for chatbot deployment in line with business objectives, custom configuration for specific customer interaction needs, and seamless integration with existing business systems. The service also includes efficient deployment strategies for a quick rollout, comprehensive change management for smooth adoption, specialised training programs for user empowerment, and continuous support for chatbot performance optimisation.

The benefits of employing this service are significant, offering enhanced customer service through AI-driven virtual agent interactions, tailored chatbot solutions for business-specific communication needs, streamlined customer engagement processes for improved satisfaction, and rapid adoption of chatbot technology. It also empowers staff with the necessary tools and knowledge for chatbot management, provides expert guidance on strategic deployment, and ensures the continuous improvement and personalisation of chatbot functionalities through advanced AI.

However, there are constraints to consider. Customising chatbots to meet specific interaction requirements and ensuring their seamless integration with business systems demand strategic planning and expert execution. Effective deployment and user adoption hinge on comprehensive change management and specialised training. Moreover, ongoing support is critical for leveraging AI capabilities and optimising chatbot performance. While this service lays the foundation for improved customer service operations and increased satisfaction, it requires a commitment to continuous improvement and adaptability to maximise the effectiveness and engagement of chatbot solutions.

East Sussex Fire & Rescue Service

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

FROM 7 DAYS TO 5 MINUTES – A 99.9% REDUCTION IN TIME

ESFRS's previous manual SSRI process meant crews assessing the risk at premises had to make handwritten notes, fill out a Word document and then send an email to their respective Station Manager for approval. This was prior to the SSRI document being uploaded manually to a SSRI system and downloaded to the services' Mobile Data Terminals (MDT), located on each fire appliance, for use when in transit and at incidents. This process could take up to seven days to complete.

ESFRS identified this process needed upgrading to meet aspects of the Grenfell Tower incident recommendations and to modernise the technology in use and reached out to their ICT managed service provider and trusted partner, Telent, to help them kickstart the process.

With the support of strategic partners, Telent have been working with ESFRS since 2016 to transform key operational processes. In this instance, commercial, out-of-the-box solutions were available – but ESFRS and Telent felt that a purpose-built, configurable solution would be better placed to meet all requirements and deliver maximum impact and improve safety.

Telent introduced Node4, to ESFRS and what they had set out to achieve, and together we mapped a way forward for the organisation. The end solution would support ESFRS's digital strategy, with a focus on alignment of digital risk data collection and current guidance, and the introduction of an auditable digital process for collecting and communicating risk data.

> "Self-service was a key driver in this project for us, with risks continuously changing, and new risks regularly being discovered, it was important that any new requirements could be added to the form as and when needed."

DEREK HAMILTON
STATION MANAGER – OPERATIONAL LEARNING & INTELLIGENCE

THE JOURNEY SO FAR...

2004 - 2014

THE EARLY YEARS

Founded in 2004
By Andrew Gilbert
Opened 3 data centres
LETN acquisition

2015 - 2016

BUILDING SOLID FOUNDATIONS

Bowmark Investment
Premier IT & Reconnix acquisition

2017 - 2018

DEVELOPING PUBLIC CLOUD

N4Stack Launched covering public cloud, data & DevOps
HSCN achieved

2019

ACQUISITION SUCCESS

Secura acquisition
Employee Experience Awards winner

2020

PANDEMIC RESPONSE

Launched N4Engage
COVID-19 Response
Launch of SD-WAN

2021

EVEN MORE GROWTH

Starcom acquisition
TNP acquisition
MS Azure Expert MSP
Providence Investment

2022

LOOKING TO THE FUTURE

risual acquisition
Tisski acquisition
Launched Azure Hybrid Cloud
Great Place to Work 3 years in a row

2023

THE FUTURE IS HERE

TNP, risual, Tisski and core Node4 teams join together
BizApps and Power Platform capability rollout
Microsoft Inner Circle status acquired through Tisski
ThreeTwoFour acquisition

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.
