G-Cloud 15 Service Description

**Dynamics 365
Business Central
Online Evergreen**

ABOUT THE SERVICE

Dynamics 365 Business Central Online Evergreen is a subscription-based update service synchronised with Microsoft's update schedule for Business Central Online (SaaS) systems. It ensures clients' systems remain current, offering enhanced functionality and security with bi-annual updates. This service is structured with monthly billing, providing a predictable and manageable approach to system maintenance and upgrades.

The service features bi-annual updates in line with Microsoft's release schedule for Business Central, offering regular system enhancements, improved security features, access to the latest functionalities, proactive issue resolution post-update, continuous system monitoring, monthly billing for financial predictability, expert support for seamless integration, system reviews to meet business needs, and training on new features.

Benefits of the Evergreen service include keeping systems up-to-date with Microsoft's latest releases, enhancing system reliability and performance, improving security and compliance standards, providing access to new functionalities, minimising disruptions by promptly addressing post-update issues, ensuring consistent system performance, simplifying budgeting with regular billing, reducing the IT management burden, aligning functionalities with evolving business needs, and offering continuous user training and support.

However, this service's effectiveness hinges on the team's ability to adapt to and integrate new features and changes, potentially requiring additional training and support. Success depends on effective communication and collaboration during updates to minimise operational disruptions. Access to improvements and consistent system performance requires a commitment to regular business process review and adaptation, all within a structured monthly billing framework for financial planning.

ON A JOURNEY TO CHANGE, WITH YOU

WORKING TOGETHER TO ACHIEVE YOUR GOALS

NODE4 ASPIRE FRAMEWORK

A delivery framework built for innovation and value creation.

Node4's ASPIRE Framework delivers a consistent customer journey across all our delivery practices and outlines our approach to delivering end-to-end, secure and transformative services.

 Locala Health & Wellbeing	 Ofsted raising standards improving lives	 HS2	 HM Land Registry	 acas working for everyone

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

FROM 7 DAYS TO 5 MINUTES – A 99.9% REDUCTION IN TIME

ESFRS's previous manual SSRI process meant crews assessing the risk at premises had to make handwritten notes, fill out a Word document and then send an email to their respective Station Manager for approval. This was prior to the SSRI document being uploaded manually to a SSRI system and downloaded to the services' Mobile Data Terminals (MDT), located on each fire appliance, for use when in transit and at incidents. This process could take up to seven days to complete.

ESFRS identified this process needed upgrading to meet aspects of the Grenfell Tower incident recommendations and to modernise the technology in use and reached out to their ICT managed service provider and trusted partner, Telent, to help them kickstart the process.

With the support of strategic partners, Telent have been working with ESFRS since 2016 to transform key operational processes. In this instance, commercial, out-of-the-box solutions were available – but ESFRS and Telent felt that a purpose-built, configurable solution would be better placed to meet all requirements and deliver maximum impact and improve safety.

Telent introduced Node4, to ESFRS and what they had set out to achieve, and together we mapped a way forward for the organisation. The end solution would support ESFRS's digital strategy, with a focus on alignment of digital risk data collection and current guidance, and the introduction of an auditable digital process for collecting and communicating risk data.

“

Self-service was a key driver in this project for us, with risks continuously changing, and new risks regularly being discovered, it was important that any new requirements could be added to the form as and when needed.

CHANGE THAT MATTERS

We empower public and private sector organisations by delivering positive outcomes through technology and innovation.

Harnessing our knowledge, passion and talent we help our clients reach their full potential.

We call it change that matters.

THE JOURNEY SO FAR...

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.

WHY PARTNER WITH US?

1

PROVEN

20 years delivering outcomes as the IT partner of choice for over 1800 organisations

2

CAPABLE

Utilising our expertise & knowledge from the highest IT accolades & accreditations to deliver innovative technology solutions

3

SCALE & AGILITY

We are big enough to deliver yet agile enough to care, always ensuring exceptional service comes as standard

4

WE DELIVER

Everything we do is developed & executed with your outcomes in mind to ensure we deliver change that matters
